# APPENDIXES

Appendix A.—Treasury Department regulations re financial statements..	481
Appendix B.—GSA regulations re real property management.....	501

Each year the committee has reported to the public, through the House Committee on Governmental Organization and Administrative Reform, the results of its continuing study of the Federal Government's financial management system. In 1962, the committee reported that the Federal Government's financial management system was "seriously deficient" because of "inadequate property management, inadequate accounting control, and inadequate inventory control." A major objective of our previous inventory reports, as noted below, clearly was to identify the areas in which the Federal Government's financial management system was deficient and to recommend specific methods and procedures for improving it. In 1963, the committee reported that the Federal Government's financial management system was "seriously deficient" because of "inadequate property management, inadequate accounting control, and inadequate inventory control." This report, which is being discussed by the committee, is the first of the committee's reports on the subject of financial management.

**FEDERAL REAL AND PERSONAL PROPERTY INVENTORY  
REPORT (CIVILIAN AND MILITARY) OF THE U.S. GOVERN-  
MENT, COVERING ITS PROPERTIES LOCATED IN THE  
UNITED STATES, IN THE TERRITORIES, AND OVERSEAS,  
AS OF JUNE 30, 1963**

PART I

INTRODUCTION

This Federal property inventory report represents a compilation of assigned values of real and personal property owned or controlled by the Federal Government, located throughout the world, as of June 30, 1963. This comprehensive recording of assets of the Government is the ninth such report issued by the House Committee on Government Operations. Since 1955, the committee has issued, on an annual basis, inventory reports of Federal real and personal property on a fiscal year basis (as of June 30 of each year).

Each year the committee staff assigned to this project, together with the assistance of Government department and agency representatives, has delved further into the inventory accounting systems employed by the Federal departments and agencies in an effort to include assets previously omitted because of incomplete property records or because they were not under inventory accounting control. A comparison of our previous inventory reports, as listed below, clearly shows the great progress which has been made in improved accounting methods and recordkeeping operations employed in recording the amounts of real and personal property owned or controlled by the Federal Government, and the constant attention which is being focused on accurate and complete accounting of these assets. The utilization of up-to-date accounting systems, spurred by stimulated interest in property inventories, has strengthened the efforts of Government departments and agencies in bringing inventories under accounting control. This progress, which is being observed by the public, Members of the Congress, and especially by the membership of this committee, has been encouraging.

*Comparison of reported inventory values, worldwide*

[In billions of dollars]

Year	Personalty	Realty	Grand total
1955.....	\$168	\$40	\$208
1956.....	180	56	236
1957.....	186	63	249
1958.....	195	67	262
1959.....	193	72	265
1960.....	200	76	276
1961.....	201	82	283
1962.....	213	86	299
1963.....	225	90	315

In this report, as has been done previously, Capitol Hill realty is recorded at estimated present-day evaluations; also, public domain is recorded at estimated present-day evaluations. Federal realty listed on Government records at "zero value" or at "\$1 for accounting purposes" is listed in the report at estimated present-day evaluations.

In June 1960 the committee published a document entitled "The Federal Property Inventory Undertaking of the House Committee on Government Operations—An Endeavor To List Real and Personal Assets of the Federal Government on a Worldwide Basis—A Long Overdue Accomplishment." The document sets forth, in narrative history form, preparations involved in recording real and personal assets of the Federal Government, on a worldwide basis, as well as the accomplishments of the Committee on Government Operations from 1955 until 1960. The document is designed to be helpful to Members of Congress and others who are interested in studying and analyzing the improvements which have been made in real property management and accounting control over an investment aggregating billions of dollars—which is represented in real and personal property of our Government which is located throughout the world. The document also described how the inventory undertaking was conceived and the steps which have been taken to obtain data for compilation in inventory report form.

#### FEDERAL PERSONALTY

Most Federal personalty figures in this report are furnished directly by the Department of the Treasury, on request of the committee chairman. The Department of Defense reports all its inventories—real and personal—directly to the committee for inclusion in the report. These figures cover assets of the three military departments and the Corps of Engineers, civil functions. Personalty inventories of the Architect of the Capitol, the Sergeant at Arms of the U.S. Senate, the Clerk of the House of Representatives, the Library of Congress, the Supreme Court of the United States, the U.S. courts of appeals, U.S. district courts, and special U.S. courts are reported directly to the committee.

Federal personalty (exclusive of cash and related cash items) is reported herein at acquisition cost. This manner of reporting these assets has been discussed with, and approved by, officials of the General Accounting Office and the Department of the Treasury. It is the consensus that this approach represents a realistic method of recording personal property, especially when comparing replacement costs and amounts received for such items when they are declared surplus and offered for sale by the Government. In recording values of paintings, portraits, statues, numerous publications, and volumes of books where records are unavailable as to the known costs, an estimated value has been recorded. Numerous personalty assets of the Federal Government are listed on its inventory records at "no value" inasmuch as some such items were donated to the Federal Government (at no cost) and in many instances it is impossible to place a realistic value on these properties because of their patriotic

or sentimental value rather than intrinsic value. Such is the case of numerous items to be found in the Library of Congress, the Smithsonian Institution, the National Archives, and in other storehouses of the Nation. The famous Hope diamond has been donated to the Government. It has a value ranging from something like \$200,000 to \$2 million. Even though it is recognized that this asset is worth a considerable sum of money, its value is not included in the Committee's inventory reports.

The increase in personalty figures in our reports represents refinements brought about during the past few years by improved record-keeping within the Government or resulting from inventories having been brought under inventory accounting control. The Department of the Treasury has been instrumental in furnishing personalty data which reflect refinements in many areas of accounting throughout the Government.

#### FEDERAL REALTY (EXCLUDING PUBLIC DOMAIN)

Federal realty is listed herein, for the most part, at acquisition cost—with usage categories and number of acres noted. In 1960 the committee requested departments and agencies which had realty under their jurisdiction which had been donated to the Government, or obtained at no cost, listed on the books of the Government at "no value" or recorded at "\$1 (for accounting purposes)" to affix thereon an estimated present-day evaluation of such realty. Cooperation was received in this endeavor from each department and agency concerned. Methods and practices employed in the evaluation of public domain lands were used in the establishment of current evaluations of "no value" lands. This practice has been followed again this year and up-to-date figures on such properties are recorded herein. These revised current figures have been furnished the committee directly by the departments and agencies. This additional refinement has been accomplished by the efforts of experienced and qualified personnel within the departments, thus making unnecessary the expense of engaging outside appraisal firms for the undertaking. The committee is gratified at its accomplishment of having its property inventory report reflect either estimated present-day or acquisition cost values placed on all Federal realty.

In keeping with the desire of the committee, the Architect of the Capitol has again furnished realty figures for inclusion in this report which reflect estimated present-day evaluations on properties under his control.

Construction work-in-progress figures for all Government departments and agencies, including the Department of Defense, are again recorded in the realty portion of this report. Ordinarily the accepted procedure of recording a Federal project on the books of the Government is to await its completion. When the Government actually takes possession of a project, it is then recorded on the books of the Government. The committee feels that a realistic manner of recording the Government's investment in a project which is in the process of construction is to record the actual investment at the close of the fiscal year, rather than await a project's completion to record its value. Our manner of recording construction-in-progress figures is in keeping with our objective of providing a comprehensive and complete listing

of all Federal assets in all areas at a given time. This is also consistent with accepted bookkeeping practices.

It should be borne in mind that the acquisition costs recorded for some buildings and facilities may also represent present-day evaluations. This is true when considering the value of buildings and facilities which have been constructed or purchased recently.

Recorded in the realty portion of our report this year is a listing of Federal realty, excluding public domain, by departmental jurisdiction and general location (whether located in the United States, in the territories, or overseas), as well as a breakdown of acreage in the various States. This additional information is of particular interest not only to the congressional offices, but to the general public as well. A further breakdown of real property by State, county, and department, as well as cross-indexed Government department and individual State listings, is available in the offices of the Committee on Government Operations, House of Representatives, or from the General Services Administration.

#### PUBLIC DOMAIN PROPERTIES

The term "public domain land" embraces all the areas, title to which was vested in the U.S. Government by virtue of its sovereignty. The term, "public domain lands," includes original public domain lands which have never left Federal ownership and lands still within Federal ownership which were obtained by the Government in exchange for public lands or for timber on such lands. It also includes original public domain lands which have reverted to Federal ownership through the operation of public land laws.

Public domain acreage is listed in this report at estimated present-day evaluations. In some instances, Federal departments and agencies have been able to place an estimated present-day evaluation on buildings, structures, and facilities located on public domain lands. However, these estimates are included for information purposes only in the public domain summary table. In order to avoid duplication and for the sake of clarity, all buildings, structures, and facilities are recorded in the realty section of the inventory report at acquisition cost. The method used in this report has been adopted so as not to confuse the reader and at the same time so as to avoid the overlapping of figures and properties. In some instances, because of the nature of the property and the location of the installation itself, it has not been possible to determine, because of intermingling, whether some structures are located on public domain or other Federal property.

Estimated present-day evaluations of public domain have been determined by qualified field representatives employed in real property field offices of the departments. As a result of their assistance, evaluations have been determined without having to engage the services of private professional appraisers. Methods used in the appraisal of public domain lands have been determined by qualified field representatives, based on long experience in the property appraisal field and on evaluation criteria employed in the evaluating of adjoining federally or privately owned properties.

The Department of the Interior is responsible for determining overall values of mineral resources for all Government departments and

agencies. Estimated overall values of timberlands, grazing lands, and grazing rights are included in public domain data furnished the committee directly by the department or agency controlling such property.

Since its Federal property inventory report, as of June 30, 1956, the Committee on Government Operations has listed public domain lands in inventory reports at a realistic estimated present-day evaluation. Prior to that date those lands had been listed at "no value." An attempt was made in 1937 by representatives of the Federal Government to evaluate public domain acreage. After considerable time, effort, and funds had been expended in this endeavor, the end result was an overall evaluation of these properties at \$1.25 per acre. Such an unrealistic figure in no way reflects the true value of these lands either in 1937 or today. One of the objectives of the committee's preparation of a Federal property inventory report has been to encourage improved accounting of known Federal property assets on a realistic basis.

As a result of much effort, coupled with experience and concentrated interest, it has been possible for all departments and agencies to complete the job of placing estimated present-day evaluations on public domain acreage under their control.

#### FEDERAL REAL ESTATE—THE UTILIZATION OF PRESENT-DAY ESTIMATED EVALUATION PROCEDURES

As pointed out previously, Federal realty under the jurisdiction of the Architect of the Capitol, public domain acreage, as well as realty previously listed at "zero value," are recorded in this report at estimated present-day evaluations. Other realty is recorded at acquisition cost. In most instances the acquisition cost figures in no way represent present-day value. Certain properties have increased tremendously in value since acquisition; while on the other hand, some properties have decreased in value because of location, age, and use.

For the past few years avenues have been explored in an effort to reach agreement between Government representatives as to a suitable approach to this undertaking. The multitude of properties, their age, location, and departmental jurisdictional status make the undertaking a complex one.

It has been concluded that an honest approach to the reevaluation of Federal realty is to use a formula of "estimated replacement cost, less estimated depreciation." As early as August 1961, representatives of the Department of the Interior, General Services Administration, Bureau of the Budget, and the Committee on Government Operations discussed reevaluation criteria. At that time the chairman of the Committee on Government Operations had been advised by the General Services Administration Administrator that the Department of the Interior had agreed to serve as a "pilot agency" to assist in our endeavor to have one department initially to reevaluate its acquired Federal realty holdings in the United States to reflect estimated present-day values. Representatives of the Department of the Interior, working with the General Services Administration and the other Government departments and agencies, prepared draft guidelines to be utilized in the initial undertaking.

Subsequently, the suggested criteria were furnished the Committee on Government Operations by the General Services Administration for review and comment. The guidelines as submitted were approved by the Committee on Government Operations. It was agreed that the real property holdings of the Department of the Interior located in the States of Washington, Oregon, and Idaho, excluding public domain lands, were to be reevaluated initially, based on "yardstick criteria" agreed upon by the Government departments and approved by the committee.

The reevaluation study was begun in September 1962, and was concluded in January 1963. Since January of this year, the tabulation of estimated values took place and the completed results were furnished the Committee on Government Operations in September of this year. The revaluing process was accomplished by the utilization of Department personnel. In the three mentioned States, a total of 1,094,369 acres of land, and 531 installations were involved. A total of 1,033 man-hours were used at a cost of \$4,255, averaging approximately \$8 per installation. The end results are as follows:

*Noted difference in acquisition cost and estimated present-day values*

	Acquisition cost	Estimated present-day value
Land.....	\$70,961,000	\$42,874,000
Buildings.....	30,087,000	32,543,000
Structures and facilities.....	1,313,476,000	1,421,210,000
Total.....	1,414,524,000	1,496,627,000

NOTE.—An overall increase of \$82,103,000, or 5.8 percent.

*Overall estimations by States*

[Dollar amounts in thousands]

State	Acquisition cost	Estimated present-day value	Difference	Percentage of difference
Idaho.....	\$179,139	\$169,760	\$9,379	-5.0
Oregon.....	306,288	360,696	54,408	+18.0
Washington.....	929,097	966,171	37,074	+4.0
Total.....	1,414,524	1,496,627	82,103	+5.8

The guidelines employed in this undertaking were necessarily broad in scope. It had been anticipated that following the pilot agency study by the Department of the Interior, recommendations would be made by the Department which could strengthen the employed guidelines so that they could apply to all Government departments rather than solely the Interior Department properties.

A 5.8 percent increase in the values of the properties involved seems not significant. However, it should be borne in mind that included in the guidelines was one segment dealing with nondepreciable properties. Included in this category were structures and improvements which (1) were generally considered unmarketable and for which no market data was available on which current-day values could be based, (2) increased current-day construction costs have not lessened

in value, and, (3) have not materially deteriorated since the date of acquisition or completion of construction. Such properties were recorded in the reevaluation study at known or estimated acquisition cost. Grand Coulee Dam is an example of this property category. The Department of the Interior's inventory figures revealed that 56 percent of its properties in the three States covered by the pilot agency study were nondepreciable.

The net result of the pilot study was an increase in estimated appraisal values of less than 6 percent in the bulk of one department's real property holdings in the States of Idaho, Oregon, and Washington. For the time being, further reevaluations are being held in abeyance by the committee.

#### "FUNCTIONAL USE BASIS" DATA

This Federal property inventory report reflects assets—real and personal—in a manner prescribed for Federal usage. Major categories, as listed, represent inventories as of June 30, 1961, 1962, and 1963 (for comparative purposes), and cover the major functions of—

- (a) national defense;
- (b) international affairs and finance;
- (c) space research and technology;
- (d) agriculture and agricultural resources;
- (e) natural resources;
- (f) commerce and transportation;
- (g) housing and community development;
- (h) health, labor, and welfare;
- (i) education;
- (j) veterans' benefits and services; and
- (k) general government.

This functional breakdown follows the same analysis as the receipts and expenditure classifications, and has some utility in illustrating how the assets of the Government are being utilized.

#### ACKNOWLEDGMENTS

Acknowledgment is made to the Government department and agency representatives who have been of such great assistance to the committee in the preparation of this report. Representatives of the property offices of the Architect of the Capitol, the Supreme Court, of the United States, the Library of Congress, the Sergeant at Arms, U.S. Senate, the Clerk of the House of Representatives, and the Administrative Office of the U.S. Courts have also been most helpful in furnishing data direct to the committee for inclusion in this report.

Without this able assistance, the compilation of accurate and comprehensive data in the realty and personalty fields, as represented herein, would not have been possible. The committee is grateful for this continued interest and cooperation.

#### CONCLUSION

Federal property inventory reports, compiled annually by the House Committee on Government Operations, contain such a wealth of information concerning assets of the Federal Government that they con-

tinue to stimulate interest among Government representatives—Federal, State, and local—as well as schools, organizations, and private citizens. Our report contains a compilation of both real and personal property. Such a compilation in one single document is not available elsewhere. These data are particularly helpful to congressional offices, libraries, news media, and individuals who may be writing articles or compiling statistics about Federal assets, whether located in a particular area of our country, the entire United States, or worldwide. Rather than having to refer to several documents or contact individual Government departments and agencies, it is possible to obtain the desired information from this one document.

Increased inquiries about, and requests for copies of the report, are being received from congressional offices, Federal departments and agencies, schools, and universities located throughout the United States and abroad as well as from State governments and private research organizations.

State governments for some time have been interested in having up-to-date inventories of their real properties which reflect acquisition cost as well as present-day values. At the present time there exist differences in the methods and manner of recording property values in States; however, methods for establishing a uniform evaluation procedure are under consideration and study by State officials. Interest is mounting in an effort toward improving real property accounting and evaluation processes. The Federal property inventory report, issued by the Committee on Government Operations, is being used as a handbook in many areas at the present time and more and more attention is being focused on this publication, not only in the Washington area, but throughout the United States and abroad.

Our report has been the subject of several newsletters originating in congressional offices. It has been mentioned in discussions on the floors of the Senate and House of Representatives of the United States.

The committee feels that each Federal property inventory report it releases is a step forward in realizing the full objectives of House Resolution 26, introduced in the House of Representatives on January 5, 1955, by former Congressman Martin Dies, which was referred to the House Committee on Government Operations. Our initial report was a starting point of recording Federal assets in one document—in the form of an annual property inventory report. Until that time there was no one central location where all real and personal assets of the United States, located throughout the world, were recorded. A primary objective in improving our Federal property inventory reports has been the recording of real and personal assets of the Federal Government in a realistic way—recording realty assets at acquisition cost as well as at estimated present-day evaluations, and to record personalty assets at acquisition cost. The undertaking of evaluating public domain properties, as well as real property previously recorded at “zero value, or at \$1 (for accounting purposes)” has been a tremendous task. It has been accomplished as a result of efforts of property representatives of departments and agencies having an interest in such properties under their control. Participation in this endeavor has been unanimous, and the results are evidenced in figures listed in this report.

Federal personalty will continue to be reported at acquisition cost. This decision has been made by the chairman of the committee as a

result of recommendations made by General Accounting Office representatives and other accounting specialists within the Government.

The scope of an inventory covering properties owned by the Federal Government is tremendous in size and complex in nature. These inventories are located in areas throughout the world and the recording and reporting of such assets is a massive undertaking. Improved bookkeeping methods and accounting controls are proving to be most helpful, both within the civilian and military departments of the Government. Government property representatives assisting in this endeavor are keenly interested in constantly improving property records. It has been definitely established that the need is great for an up-to-date Federal property inventory accounting such as the committee has undertaken. This project will continue to reflect various economic changes in values, as well as improved inventory reporting practices. These results, represented in informative report form, will be of constant utility.

In compiling and reporting data of a classified nature for inclusion in this report, the committee has, of course, complied with necessary security regulations. Efforts have been made to record classified data in a manner which will insure secrecy, and at the same time remain informative and accurate. This is particularly reflected in some areas of Department of Defense inventories. Breakdown figures have been used in each instance possible, and only in restricted areas have lump-sum figures been recorded. Substantiating data covering classified areas are available within the departments for those qualified to see and study on a need-for-use basis.

This Federal property inventory report records Federal real and personal property assets located throughout the world as being \$315.2 billion, as of June 30, 1963. It is evident that recordkeeping operations involved in the accurate accounting of inventories of this magnitude is an exacting undertaking. Likewise, when considering the values of real and personal property listed in our Federal property inventory, it is interesting to observe the recorded amount of our national debt. It was \$306.1 billion as of June 30, 1963.

Constant efforts will be made in the future to make additional improvements and refinements in our property inventory undertaking.

Favorable commendations continue to be received on the inventory project and the work the committee is doing in continuously improving this long overdue public undertaking. The results so far attained bear eloquent validating evidence of an effective performance by the Committee on Government Operations of a task assigned to it by the Congress of the United States. Even so, we remain mindful of the fact that there is still work to be done and that constant surveillance of our inventories is necessary to assure that they are kept up to date and that our property assets are properly and accurately accounted for.

Washington, D.C.

## *Summary Statement*

The statements on personal property that follow, compiled by the Treasury Department on the basis of reports submitted by Government agencies, were prepared in accordance with the request of the chairman of the Committee on Government Operations, House of Representatives.

Supplement No. 1 of Treasury Department Circular No. 966 requires all agencies of the Government to submit financial statements as of June 30 of each year. The cooperation of 158 agencies of the Government, submitting a total of 269 statements of financial condition and asset reports, is acknowledged in the effective collaboration of Treasury with the committee staff. These reports made possible the compilation by Treasury of the "Statement of Personal Property of the U.S. Government" shown in part III and a statement on "Related Real Property of Selected Agencies, Other Than Defense" shown in part VI of the report.

As in previous years, the asset reports of the Defense Department, certain segments of the Legislative Branch and the Judiciary were sent direct to the committee. However, selected items of Defense Department personal property and the amounts reported direct to the committee by the Legislative Branch and the Judiciary are included in this section of the report by mutual agreement. In addition to the comparative summaries that follow, overall summaries, including figures on public domain and other real property, were prepared and are shown in part II of this report.

*Comparative figures on personal property of the U.S. Government (excluding the greater part of the Department of Defense shown elsewhere in this report) as of June 30, 1963 and 1962*

[In thousands of dollars]

Classification	June 30, 1963	June 30, 1962	Increase or de- crease (—)
Cash on hand, in banks, etc.....	\$12,853,788	\$11,243,968	\$1,609,820
Investments (other than public debt).....	5,842,749	5,693,672	149,077
Accounts and notes receivable.....	5,268,529	4,486,533	781,996
Commodities for sale.....	4,942,077	4,670,251	271,826
Work in process.....	810,563	659,920	150,643
Materials and supplies.....	9,166,674	9,215,706	—49,032
Loans receivable.....	28,360,980	26,899,454	1,461,526
Machinery and equipment.....	13,042,203	12,164,090	878,113
Other assets.....	11,814,673	10,344,438	1,470,235
Total.....	92,102,236	85,378,032	6,724,204

NOTE.—All assets herein reported are shown in gross amounts with no deductions for allowances for losses or depreciation. Only wholly Government-owned corporation assets and other wholly owned assets are included. Assets under trust arrangements and interagency assets, including public debt securities, are excluded. The assets are in the main valued at acquisition cost (known or estimated).

The personal property inventories compared in the above summary show net increases as of June 30, 1963, over June 30, 1962, in the total amount of \$6,724 million. The main increase is the cash on hand of \$1,610 million represented primarily by the increase of \$1,686 million in the cash balance of the Treasurer of the United States, offset by a decrease of \$76 million in other cash balances. The increase of \$1,462 million in the amount of loans outstanding is analyzed by type of loan in the summary below. Other asset classifications increased as follows: Investments, \$149 million; accounts and notes receivable \$782 million; commodities for sale, \$272 million; work in process, \$151 million; machinery and equipment, \$878 million; and other assets, \$1,470 million. The increase in other assets consisted of \$1,018 million increase in selected assets of the Defense Department, and \$452 million increase in assets of other agencies. Materials and supplies decreased by \$49 million.

*Comparative figures on gross loans outstanding*

<sup>1</sup> Includes materials for national defense.

<sup>2</sup> Includes foreign currency loans amounting to \$3,674,807,231 (see footnote 3). These currencies, acquired primarily without the payment of dollars, were generated under various Government programs, principally the Agricultural Trade Development and Assistance Act of 1954, as amended, and the Mutual Security Acts, as amended. Dollar equivalents are computed, for reporting purposes, to provide a common denominator for the currencies of the many countries involved. Foreign currencies on hand and on deposit, and loans under sec. 104 (c) of the Agricultural Trade Development and Assistance Act of 1954, are stated at the rates as of June 30, 1963, at which the United States could purchase currencies on the market for regular operating purposes. Other loans are stated at the rates at which they are to be repaid or at rates in effect when the loans were extended. Currencies that are dollar denominated or guaranteed as to rate of exchange, are stated at rates specified in the agreements.

<sup>3</sup> Excludes \$894,133,695 representing loans financed by the sale of certificates of interest by the Commodity Credit Corporation to private financial institutions, and included in the Corporation's liabilities.

<sup>4</sup> Includes certain figures on personal property for the Department of Defense not included under the special section of real and personal property of that Department in this report.

<sup>5</sup> Does not include the principal of World War I debt accounts amounting to \$11,427,523,084 on which payments have not been received since 1933.

<sup>6</sup> Includes World War I indebtedness of Finland amounting to \$5,425,097. Does not include an amount of \$28,102,000 representing loans to various States pursuant to the act approved June 23, 1936, on which payments have not been received.

<sup>7</sup> Excludes \$520,000,000 representing loans financed by the sale of participation certificates to private financial institutions, and included in the Corporation's liabilities.

\* Less than \$500.

NOTE.—All assets herein reported are shown in gross amounts, with no deductions for allowances for losses and depreciation. Only wholly Government-owned corporation assets and other wholly owned assets are included. Assets held under trust arrangements and interagency assets, including public debt securities owned, are excluded. The assets are, in the main, valued at acquisition cost (known or estimated).

PERSONAL PROPERTY INVENTORY OF THE ARCHITECT OF THE CAPITOL  
AS OF JUNE 30, 1963

Property under this heading is valued at acquisition cost and covers properties located at the Capitol Building, Senate Office Buildings and House Office Buildings and Grounds, Capitol Power Plant and Grounds, Library Buildings and Grounds, U.S. Supreme Court Building and Grounds, and U.S. Botanic Garden and Nursery.

<i>Personal property</i>	
1. Office furniture, furnishings, and equipment-----	\$2, 047, 705. 62
2. Mechanical equipment-----	1, 133, 888. 89
3. Supplies and materials (including plant material of Botanic Garden and Nursery)-----	1, 647, 268. 35
4. Works of art-----	1, 512, 932. 80
Total, personal property-----	6, 341, 795. 66

U.S. SENATE,  
OFFICE OF THE SERGEANT AT ARMS,  
*Washington, D.C., December 19, 1963.*

Hon. WILLIAM L. DAWSON,  
*Chairman, Committee on Government Operations,  
House of Representatives, Washington, D.C.*

DEAR CONGRESSMAN DAWSON: Enclosed is the inventory report of personal property under the jurisdiction of the Sergeant at Arms of the U.S. Senate, as of June 30, 1963, according to your request.

Very truly yours,

JOSEPH C. DUKE,  
*Sergeant at Arms.*

PERSONAL PROPERTY INVENTORY (UNDER THE JURISDICTION) OF THE  
SERGEANT AT ARMS, U.S. SENATE, AS OF JUNE 30, 1963

Cash held by disbursing officer-----	\$383,725.31
Office supplies and equipment, furniture and carpets-----	569,543.03
Mechanical equipment-----	3,285,665.27
Total-----	4,238,933.61

OFFICE OF THE CLERK,  
HOUSE OF REPRESENTATIVES,  
*Washington, D.C., December 11, 1963.*

Hon. WILLIAM L. DAWSON,  
*Chairman, Committee on Government Operations,  
House of Representatives, Washington, D.C.*

DEAR MR. CHAIRMAN: In compliance with your request, I have the honor to submit herewith an inventory of personal property of the House of Representatives. This statement reflects the specific number of items in various classifications as well as the actual or approximate cost of a class of items, as nearly as possible obtainable, to the date of June 30, 1963. This inventory is classified in nine categories identified as schedules A through I, inclusive, with totals as follows:

A. Furniture, carpet, and drapes .....	\$2, 127, 186. 61
B. Supplies and material (for construction and repair of furniture, drapes, venetian blinds, rugs, etc.) .....	47, 514. 59
C. Machinery, tools, and accessories (for repair shops) .....	12, 996. 30
D. Cleaning and other supplies (for committees and offices in the Capitol) .....	15, 200. 00
E. Manual typewriters .....	195, 199. 35
F. Electrical and mechanical equipment .....	2, 295, 597. 00
G. Stationery room .....	97, 220. 00
H. Recording studios .....	37, 168. 61
I. Miscellaneous equipment .....	167, 214. 04
<b>Total</b> .....	<b>4, 995, 296. 50</b>

Sincerely yours,

RALPH R. ROBERTS,  
*Clerk, U.S. House of Representatives.*

RECAPITULATION—PERSONAL PROPERTY INVENTORY OF THE CLERK  
OF THE HOUSE OF REPRESENTATIVES, AS OF JUNE 30, 1963

Cash held by disbursing officer .....	\$412, 973. 18
Furniture, carpet, and drapes .....	2, 127, 186. 61
Supplies and material (for construction and repair of furniture, drapes, venetian blinds, rugs, etc.) .....	47, 514. 59
Machinery, tools, and accessories (for repair shops) .....	12, 966. 30
Cleaning and other supplies (for committees and offices in the Capitol) .....	15, 200. 00
Manual typewriters .....	195, 199. 35
Electrical and mechanical equipment .....	2, 295, 597. 00
Stationery room .....	97, 220. 00
Recording studios .....	37, 168. 61
Miscellaneous equipment .....	167, 214. 04
<b>Total, personal property</b> .....	<b>5, 408, 269. 68</b>

THE LIBRARY OF CONGRESS,  
Washington, D.C., October 30, 1963.

HON. WILLIAM L. DAWSON,  
*Chairman, Committee on Government Operations,*  
*U.S. House of Representatives,*  
*Washington, D.C.*

DEAR MR. DAWSON: I forward herewith three copies of the estimate of the Library's personal property evaluation, including collections, card catalogs, and other categories as reported in previous years. Should further information be desired in this connection I shall be happy to provide it.

Sincerely yours,

RUTHERFORD D. ROGERS,  
*Acting Librarian of Congress.*

PERSONAL PROPERTY INVENTORY OF THE LIBRARY OF CONGRESS AS  
OF JUNE 30, 1963

Cash held by disbursing officer .....	\$121, 401. 87
Collections, catalogs, supplies and materials, furniture, equipment, office machines, automotive equipment, and commodities for sale .....	2, 370, 600, 633. 00
Total personal property .....	2, 370, 722, 034. 87

*Report on personal property assets as of June 30, 1963*

1. The Library of Congress collections .....	\$2, 267, 472. 615
2. The card catalogs .....	99, 604. 000
3. Supplies and materials (exclusive of maintenance and en- gineering supplies to be reported by the Architect of the Capitol) .....	26, 310
4. Furniture, equipment, typewriters, and office machines (exclusive of shop equipment to be reported by the Architect of the Capitol): Furniture and equipment .....	\$2, 193, 781
Typewriters and office machines .....	674, 877
	2, 868, 658
5. Automotive equipment .....	11, 299
6. Commodities for sale: .....	
(a) Printed card catalogs .....	\$599, 261
(b) Miscellaneous near-print publications .....	18, 490
	617, 751
Total .....	2, 370, 600. 633

ADMINISTRATIVE OFFICE OF THE U.S. COURTS,  
*Washington, D.C., August 26, 1963.*

Hon. WILLIAM L. DAWSON,  
*Chairman, Committee on Government Operations,  
House of Representatives, Washington, D.C.*

DEAR MR. CHAIRMAN: In accordance with your request of March 15, 1963, I am submitting the acquisition cost of personal property of the U.S. courts of appeals, U.S. district courts, U.S. Customs Court, Emergency Court of Appeals, and the Administrative Office of the U.S. Courts, located within the continental limits of the United States and in the territories of the United States, which was acquired through the expenditure of appropriated funds. This report was compiled as of June 30, 1963. The various categories of property and the costs thereof are as follows:

Item	Units	Acquisition cost
Electric typewriters.....	2, 167	\$910, 331. 51
Manual typewriters.....	1, 846	286, 600. 49
Portable typewriters.....	215	14, 428. 49
Dictating machines and auxiliary equipment.....	943	343, 551. 79
Adding machines.....	576	202, 181. 45
Duplicating machines and auxiliary equipment.....	330	171, 651. 59
Copying machines.....	465	166, 415. 79
Addressing machines.....	169	13, 105. 54
Folding machines.....	76	27, 531. 71
Registers.....	336	26, 761. 78
Flags and standards.....	491	19, 249. 59
Ledger trays, Kardex, etc.....	582	45, 782. 65
Envelope sealers.....	115	18, 033. 52
Microfilm equipment.....	32	19, 463. 31
Check signing machines.....	25	10, 974. 58
Intercommunication and sound amplifying equipment.....	21	11, 356. 92
Tabulating machines and auxiliary equipment.....		31, 718. 26
Miscellaneous items: Seals, jury boxes, brief cases, copyholders, pen sets, etc.....		136, 820. 35
Furniture.....		4, 675, 053. 38
Total.....		7, 131, 017. 70
Miscellaneous supply items in stockroom.....		47, 300. 00
Law libraries.....		20, 372, 853. 79
Total acquisition cost.....		27, 551, 171. 49

This report covers personal property only as the Federal judiciary does not have title to any real property. Also, this report necessarily excludes furniture which has been provided by the General Services Administration since July 1, 1962.

Sincerely yours,

WARREN OLNEY III, *Director.*

# **REAL AND PERSONAL PROPERTY**

**OF THE**

## **DEPARTMENT OF DEFENSE**

**AS OF 30 JUNE 1963**

## INTRODUCTION AND SUMMARY

Introduction

The National Security Act of 1947 requires the Secretary of Defense to report annually to the President and to the Congress on the property records on " - - the fixed property, installations, and major equipment items, and stored supplies of the military departments maintained on both a quantitative and monetary basis - - -" (Section 410 of the National Security Act of 1947, as amended, as codified in Section 2701 of Title 10, United States Code).

This report showing the status of Department of Defense real and personal property as of 30 June 1963 has been designed to meet the statutory requirement and also to meet the requirement of the Committee on Government Operations of the House of Representatives for information of a similar type.

The values reflected in the report for land and buildings and for long-life equipment, such as ships, represent acquisition cost. Acquisition costs of ships as well as land and buildings are often substantially below current replacement values. Construction in progress is valued on the basis of cost of material and labor incorporated in the projects under construction. The value of items other than major equipment in supply system inventories is generally based upon standard prices, representing replacement or estimated purchase price. The value of major equipment is derived from the unit cost based on the most recently executed contract for large quantity production.

As has been the case year by year, this report reflects improved coverage over previous years in several segments of personal property: (1) Army capital equipment in overseas areas; (2) Army tactical and strategic communications - electronic equipment and surface-to-surface and surface-to-air missile systems; (3) Navy consumable ordnance in the hands of operating units; (4) Navy aircraft maintenance support equipment in use; (5) further expansion by Air Force of coverage of estimates of Government-owned material, originating from procurement sources, located in contractors' plants; (6) additional Air Force ground communications and electronics equipment accounted for by a world-wide inventory; and (7) expansion of accounting for property held by the newly-formed Defense Agencies. These items of additional coverage are explained in some detail in the applicable sections of Part II of this report.

The total value as reported is exclusive of: (1) properties and equipment of the National Industrial Plant and Equipment Reserve, which is under the custody of the General Services Administration; and (2) properties and supplies under the jurisdiction of the Civil Works Division, Office of the Chief of Engineers, Department of the Army. The value of properties in these two excluded segments are shown separately however; the value of the National Industrial Reserve being shown in Section C of Part II of this report and the value of Civil Works properties shown in a footnote to Table 2.

Although reports on some of the inventories of the Department of Defense contain details which, for reasons of military security, cannot be publicly released, detailed classified data will be made

available to appropriate committees of the Contress as required.

Department of Defense Summary (Tables 1 and 2)

The value of Department of Defense property at the end of the fiscal year, 30 June 1963, was \$171.4 billion, \$6.5 billion more than was reported a year ago. Of this increase, \$1.2 billion represents the increased cost of real property which rose from \$35.4 billion to \$36.6 billion during the year. Construction in progress increased \$0.5 billion, from \$1.7 billion to \$2.2 billion. The value of personal property increased \$4.9 billion more than half of which was as a result of the increased coverage cited above.

The acquisition of expensive new combat and supporting equipment, together with the new and improved facilities needed to accommodate these modern weapons, can only result in a continuing increase in the total value of Department of Defense-owned property, unless the increasing individual cost of these weapons and facilities can be offset by the ability to get rid of much larger amounts, from a quantitative standpoint, of obsolete and unneeded property which was acquired at lower costs. Thus, the net decrease of \$499 million in the value of over-all supply system inventories (including supplies held by the Defense Agencies other than DSA) during fiscal year 1963 represents a much more substantial reduction in the physical quantities of equipment and supplies held than the values would imply. This is reflected in the decrease of occupied storage space during the year of 4.8 million square feet or more than 2 percent of the total of covered and improved open storage space in major supply installations.

Table 1 shows the total value of property held by each department. Weapons and supporting equipment assigned to tactical units, amounting in value to \$77.4 billion, comprises the largest segment (45.1 percent) of the \$171.4 billion total, and is growing (it was 44.8 percent last year); supply system inventories is the next largest segment, accounting for \$40.2 billion or 23.4 percent (24.7 percent last year); and the third largest, real property consisting of land and buildings, accounted for \$36.6 billion or 21.3 percent.

Air Force reported the largest value of property of all kinds, \$67.7 billion, an increase of \$1.7 billion during the year, and 39.5 percent of the total. Navy owned \$65.2 billion as of 30 June 1963, \$4.7 billion more than last year. Army reported a total of \$35.7 billion, a decrease of \$0.7 billion during the year. Defense Supply Agency and other elements of the Department of Defense account for \$2.7 billion, less than 2 percent of the total.

Table 2 shows the geographic distribution of properties by major type located (1) in the United States, (2) in U. S. possessions including the Commonwealth of Puerto Rico, and (3) in foreign countries and afloat. Of the \$171.4 billion total, \$34.9 billion was in the foreign countries and afloat category, more than half of which is accounted for by the Navy active fleet and the Fleet Marine Forces; \$2.3 billion was in U. S. possessions; and \$134.2 billion was located in the United States. Just over 60 percent of the \$6.5 billion increase during the year is reflected in property located in the United States.

## PART I - MILITARY REAL PROPERTY

Section A - Inventory of Military Real Property1. General

This section of the report presents a summary and a brief analysis of the inventory of military real property as of 30 June 1963. Detailed statistics on Civil Works property (river and harbor and flood control property under the jurisdiction of the Secretary of the Army) are not included in this report.

The real property under the control of the military departments is one of the most important assets of the Department of Defense. In order to achieve maximum defense at minimum cost, such real property must be administered in accordance with modern management principles. The real property inventory provides information required to achieve management objectives of better utilization, use of existing real property in lieu of new acquisitions, and reduction of real property holdings and maintenance costs by effecting prompt disposition of excess property.

The first inventory report of the military departments submitted under uniform instructions (Department of Defense Instruction 4165.14) covered an inventory of 1 January 1954 which was completed in November 1954. Data from this first report and each of the subsequent inventory reports have been used in the preparation of Congressional reports by the Department of Defense and the General Services Administration.

The inventory data covering military real property include land and improvements on such property including installed equipment such as fixed overhead crane runways, elevators, lavatories, plumbing and

electrical systems. Machine tools and production equipment at such installations, however, are not included, but are included under personal property, Part II.

## 2. Department of Defense Summary of Real Property

(a) Cost of Property Controlled - The total cost to the United States Government of real property controlled by the three military departments as of 30 June 1963 was \$36.56 billion, an increase of 3.3 percent over the \$35.38 billion reported one year earlier. Of the \$1.18 billion increase, resulting primarily from new construction, 76.4 percent was in properties of the Air Force, 17.6 percent in those of the Army and 6.0 percent in those of the Navy. During the preceding year (i.e., that ending 30 June 1962) a smaller proportional segment (59 percent) of the total increase of \$1.34 billion was in properties of the Air Force.

Of the increase of \$1.18 billion during the year ending 30 June 1963, 79 percent (\$944 million) was within the United States; 18 percent (\$210 million) occurred in foreign countries; and three percent (\$32 million) was recorded in United States possessions.

The distribution by military department is illustrated in Chart 3. Of the \$36.6 billion total, \$30.6 billion was in the United States, \$1.3 billion in United States possessions, and \$4.7 billion in foreign countries friendly to the United States.

"Controlled," as used throughout this report, has reference to the right of directing the use of property. In connection with buildings, structures, or land, it includes (1) owned (acquired through purchase, condemnation, donation, or transfer); (2) leased; (3) public domain (withdrawn permanently or temporarily by the military departments);

Table 3.--Cost of Military Real Property Controlled - by Location 1/  
As of 30 June 1963

## DEPARTMENT OF DEFENSE

(Thousands of Dollars)

Location	Department of Defense	Army	Navy (Including Marine Corps)	Air Force
<u>TOTAL</u> <u>2/</u> . . . . .	\$ 36,564,710	\$10,742,390	\$10,095,365	\$15,726,955
United States <u>3/</u> .	30,625,372	9,716,476	8,487,757	12,421,139
Possessions <u>4/</u> . .	1,247,327	143,726	770,887	332,714
Foreign Countries	4,692,011	882,188	836,721	2,973,102

1/ Does not include amount of rentals paid (see Table 12) nor the value of property under lease; does include costs of improvements on leased properties.

2/ Includes DoD Agencies.

3/ Excludes real property in the amount of \$6,477 million under the jurisdiction of the Civil Works Division, Office, Chief of Engineers, Department of the Army.

4/ Excludes real property in the amount of \$623 thousand under the jurisdiction of the Civil Works Division, Office, Chief of Engineers, Department of the Army.

Chart 3  
COST OF MILITARY REAL PROPERTY CONTROLLED  
AS OF 30 JUNE 1963

(4) temporary use (acquired through license or permit, temporary public land order, temporary executive or territorial order); (5) easements (utility, clearance, etc.); (6) foreign rights (base rights agreements, reciprocal aid, requisitioned, etc.).

This \$36.6 billion of military real property does not indicate present market value. Some of the land now owned by the military departments was donated, such as Governors Island which was donated to the Army by the State of New York. Also, some of the land was withdrawn from the public domain. There is no cost for public domain lands and in many instances no costs, or only nominal costs, for donated lands. Land and buildings in some cases were acquired a century or more ago when land prices and building costs were only a fraction of today's prices and costs. Cost data, in some instances, include estimates from old records, and are not always precisely accurate representations of original cost.

Offsetting this tendency to understate real property values is the fact that no allowance for loss of value as a result of depreciation is reflected. However, because the data represent an inventory as of a given date, they do not include costs of structures which were demolished prior to that date. As additional construction or acquisition is accomplished, it is written into the inventory at the cost to the United States. The original cost figure is of significance as an historical measure of the military real property holdings of the Department of Defense, and, in the absence of current appraised valuations (which would be very costly and of doubtful utility), is the only monetary measure of the Federal proprietary interest.

The data on cost to the Government do not include the amount of rentals paid nor the value of the property under lease. These data, however, do include costs of any improvements made and owned by the Government on the leased properties.

At the request of the House Committee on Government Operations, an estimate has been made of the current value of the donated land and of the public domain land which is controlled by the Department of Defense. These estimates for either public domain or donated lands are not included in the \$171.4 billion book value total of the real and personal property for military use or in the \$10.0 billion total reported separately for civil functions.

The estimates for public domain lands are shown in Tables 4 and 5. Table 4 shows total estimates for military and civil functions separately, and Table 5 distributes the estimates for military functions by military department.

The estimates for the lands donated to the Department of Defense are shown in Tables 6 and 7. Table 6 shows total estimates for military and civil functions separately, and Table 7 distributes the estimates for military functions by military department.

The types of activities on the donated lands used for military and civil functions include:

Military Functions

Reserve Training Centers	Naval Air Stations
National Guard Training	Naval Stations
Military Headquarters	Shipyards
Hospitals	Industrial
Depots and Supply Centers	Radio Stations
Military Schools	Cemeteries

Civil Functions

Flood Control	Harbor and Port Terminals
Navigation	Storage
Harbors	Boatyard

(b) Real Property in Foreign Countries - The \$4.7 billion investment in real property in friendly foreign countries represents the cost of that real property to the United States. It consists of troop and family housing, storage facilities, airfields, maintenance facilities, hospitals, and various other kinds of real property required by our armed forces overseas.

International agreements which make it possible to station our armed forces in friendly countries provide the basis for the occupancy by our forces of real property in those countries and for United States investment in such real property. In recent years negotiation of such agreements has provided some recognition of the residual value of United States facilities constructed with appropriated funds. Occupancy, in effect, is on a term basis varying from month to month (revocable at the sole discretion of the host government) to a firm term of 99 years. Areas occupied vary from small amounts of privately-owned space to large holdings of host governments.

In occupied territories some occupancies have been effected through the use of requisitions. These programs are financed by the governments of the occupied countries with their own currency, such as the Deutsch Mark financed properties improved or constructed in West Germany. This report includes only the cost, if any, to the United States of properties in occupied territories.

1/ Less than \$500.

During the past few years, a number of properties in Japan, Korea, West Germany, and other countries have been released by the Department of Defense to the governments of these countries.

In certain countries, title to improvements constructed by the Department of Defense is vested in the United States until termination of agreements by which occupancy was established. Upon expiration of such an agreement disposition of the property is accomplished in accordance with terms of the agreement. (Title may pass automatically to the host country or the property may be removed or sold by the United States or its ultimate disposition may be left open for further negotiations.) In other instances residual value clauses provide that, upon termination of agreements, the host government agrees to pay the residual value of the improvements constructed by the Department of Defense in such amounts as may be jointly agreed upon by the host government and the United States.

These facts emphasize the desirability of awareness that our real property in foreign countries is carried on the books of the Department of Defense and in this report at its cost to the United States. The physical facility represented by an investment in a foreign country may be identical with a facility within the United States owned by our Government but it represents a very different type of an investment. It is an investment arising from the world situation at the time it was made and the resulting national commitments of the United States.

The report does not include any investment by the United States for Infrastructure (the NATO common infrastructure program), which is a term

used to identify the fixed military facilities needed to support effective combat operations by the integrated NATO forces. Construction costs for Infrastructure facilities are shared by all NATO nations. Actual construction is the responsibility of the nation in whose territory a project is located.

(c) Ownership and Status - The figures in Table 3 show that on a cost basis more than four-fifths (83.8 percent) of the military real property controlled is located within the United States. Of the remainder, 3.4 percent is in the United States possessions and 12.8 percent in foreign countries.

The distribution by military department of world-wide military real property of the Department of Defense has continued to change slightly with the Air Force total moving up more rapidly than that of the other two military departments. A large part of this is accounted for by construction, which has been larger for the Air Force during the past few years than for the other two military departments. As of six years ago (30 June 1957), the distribution of real property, on a dollar basis, was 33.3 percent for Army, 33.0 percent for Navy and 33.7 percent for the Air Force. Distribution as of 30 June 1963 was 29.4 percent Army, 27.6 percent Navy and 43.0 percent Air Force. Whereas the major portion of the indicated increase during the past several years for the Air Force is from new construction, a small part is due to improved coverage.

On a dollar cost basis, Air Force controlled the largest portion (40.6 percent) of the Department of Defense total within the United States, Navy had the largest part (61.8 percent) of properties in the United States

possessions, and Air Force controlled nearly two-thirds (63.4 percent) of the Defense total in foreign countries on 30 June 1963.

It should be recognized that from the standpoint of construction, Air Force installations are generally newer than those of either of the Army or Navy, and thus, their costs are generally more fairly representative of current value. Some of the facilities transferred to the Air Force, however, fall into the category of rather old structures for which original costs are not truly representative of current values.

The cost of properties at nonindustrial installations (training centers, depots, hospitals, command headquarters, ports, housing, etc.) was five-sixths (83.7 percent) of the cost of all properties on a world-wide basis. This proportion has been increasing slightly during the past few years because new construction is generally for these types of facilities. As of five years ago (30 June 1958) nonindustrial total cost was 78.9 percent of the total dollar cost.

Reference to Table 8 shows that properties located at installations in an inactive or standby status on a world-wide basis cost \$2.8 billion, 7.8 percent of all properties. This proportion at the end of fiscal year 1960 was 9.1 percent. The reduction of properties in an inactive status is partially the result of continuing efforts to effect prompt disposals and return property to the local economy.

(d) Types of Properties - Table 9 shows the military real property costs for the entire Department of Defense by broad geographical locations and by major facility groupings. The largest single facility group is utilities and ground improvements which is made up mainly of heat, power, water and sewer systems coupled with roads, bridges, walks and

Real Estate - Land . . . . .	752,419	704,593	36,046	11,780

parking areas. This group accounts for 23.6 percent of the entire world-wide amount. Next in order are operational and training facilities (22.3 percent of total), and housing and community facilities (20.9 percent).

Table 10 shows the ten categories of real property, listed in order of cost, in which the Department of Defense has the largest dollar investment. These data are illustrated in Chart 4. The ten categories on a world-wide basis represent a total cost of \$23.1 billion or nearly two-thirds (63.2 percent) of the cost of all Defense-controlled real property. Family housing moved into first place as the largest single category followed by airfield pavements and troop housing. As of 30 June 1963, the cost of family housing inventory was \$3.2 billion as compared with \$2.9 billion a year earlier. Comparable data on the ten largest categories within the United States are presented for each of the military departments in Tables 21 (Army), 25 (Navy), and 29 (Air Force).

The cost of land controlled by the Department of Defense represents only 2.1 percent of the total cost of all real property controlled by the Department of Defense. Cost of buildings, on the other hand, represent 55.5 percent of the total costs of military real property controlled. Other improvements not classified as buildings such as airfield pavements, communication towers, utility systems, and roads and streets account for 42.4 percent. Table 11 shows the cost of buildings by broad geographical areas and by military department.

(e) Lease Rentals - The total world-wide annual rental bill paid for properties used by the Department of Defense on the basis of leases

Cost of Buildings as a Percent of Cost of all Properties . . .	55.5	65.7	49.2	52.6

NOTE: Where applicable, these building cost data are included in all tables showing costs in this section of the report.

in effect on 30 June 1963 was \$36.87 million as compared with \$36.71 million a year earlier (see Table 12). A sizeable decrease (\$1.1 million) in Army rentals paid was offset by increases recorded for the Navy and Air Force. Offsetting in part the \$36.87 million paid out in rentals was receipts of \$11.15 million for properties leased to others (see Table 13).

(f) Acreage Controlled - The Department of Defense through the three military departments controlled a total of 30.2 million acres of land throughout the world on 30 June 1963 (Table 14). This was a decrease of 455 thousand acres, or 1.5 percent from that reported a year earlier. The over-all decrease was attributable in part to return of some public domain lands to the Department of Interior. The present world-wide holdings of the Department of Defense are 4.8 million acres less than the 35.0 million of 30 June 1957.

Decreases of 547 thousand acres for the Air Force and 37 thousand for the Army were partly offset by an increase of 129 thousand acres for the Navy during the year ending 30 June 1963.

The largest acreage changes recorded on a world-wide basis were indicated in public domain withdrawals and lands used on a temporary basis. A large segment of land used by the Army on a temporary use permit was changed during the year to a permanent withdrawal from the public domain. Total fee owned land declined about 69 thousand acres during the year. The Department of Defense has about 286 thousand acres less of fee owned land than it controlled five years ago (30 June 1958).

Foreign Countries . .	3,162,302	593,094	389,078	2,180,130

1/ Excludes 5,947,703 acres under the jurisdiction of the Civil Works Division, Office, Chief of Engineers, Department of the Army.

2/ Excludes 6 acres under the jurisdiction of the Civil Works Division, Office, Chief of Engineers, Department of the Army.

Total land holdings include owned, withdrawn from the public domain, used on a temporary permit, leased and various occupancy rights (easements and foreign rights of different types). The distribution of world-wide acreage controlled by the Department of Defense is shown in Table 14 and Chart 5. Table 15 shows the type of occupancy of the land on a geographic basis.

Of Defense-controlled acreage, about 89 percent is within the United States, one percent in the United States possessions, and 10 percent in foreign countries. The Air Force has 42 percent, the Army 40 percent, and the Navy 18 percent of the total acreage of the Department of Defense.

Acreage controlled by the military departments in the United States represents 1.18 percent of the total land area in the 50 States and the District of Columbia. The 26,791,392 acres owned or leased, or under permit, represent about 41,862 square miles. This total DoD-controlled acreage in the 50 States and the District of Columbia is just slightly more than the land area of the State of Tennessee. The relationship of the Defense-controlled lands to the total acreage in the United States is shown in Table 16.

In each of six states the Department of Defense controls more than one million acres. The six are, in order of magnitude of acreage controlled: California, Nevada, Arizona, New Mexico, Alaska, and Utah. Total acreage in these six states under Department of Defense control is 19.97 million, representing 74.5 percent of total Defense-controlled

acreage in the United States. Table 17 lists the total cost and acreage included in Defense-controlled real property for each state and the District of Columbia.

The seven states in which the Department of Defense has more than one billion dollar investment in real property in order of magnitude of investment are California, Texas, Alaska, Virginia, New York, Florida, and Maryland. Total costs of the military real property controlled in these seven states (\$12.7 billion) represent 41.4 percent of the total controlled in the 50 States and the District of Columbia.

### 3. Department of the Army

Real properties owned and controlled on a world-wide basis by the Department of the Army on 30 June 1963 cost \$10.7 billion, a 2.0 percent increase over the \$10.5 billion one year earlier. The major portion of the total Army net increase during the year ending 30 June 1963 resulted from new construction. Of the Army world-wide total on a cost basis, 90.5 percent was located within the United States, 1.3 percent in U. S. possessions, and 8.2 percent in foreign countries.

Annual rentals (\$21.8 million) paid by Army for property it was leasing on 30 June 1963 was about one million dollars less than at the previous year end. Of the total Army rental bill about 36 percent is for properties in foreign countries. Rentals paid in overseas areas dropped from \$8.0 million to \$7.8 million.

On the basis of leases in effect on 30 June 1963, the Army was receiving \$4.6 million for properties it was outleasing for nondefense use. Part of this is from grazing and agricultural uses.

1/Land and Improvements.

Total world-wide acreage under Army control at 30 June 1963 was 12.1 million acres; 94.3 percent within the United States, 0.8 percent in U. S. possessions, and 4.9 percent in foreign countries. The Army world-wide total decreased 37 thousand acres despite an increase of 79 thousand acres in foreign countries. The latter was mainly for use as maneuver areas.

Military real property under Army control within the United States as of 30 June 1963 had a total cost of \$9.7 billion. The proportion of Army installations in active status, on a dollar cost basis, at the close of the year within the United States was 84.0 percent as compared with 82.9 percent a year earlier. Table 18 presents cost and rental data reported by the Army for the military real property under its control within the United States on 30 June 1963.

On a basis of cost to the Government, Army's nonindustrial installations within the United States constituted 77 percent of the cost of all Army installations in the United States. Based on cost, 90 percent of the nonindustrial type installations were in an active status. Of the active industrial installations, 53.5 percent on a dollar basis, was operated by the Government and the remainder (46.5 percent) was operated by contractors.

Annual rentals paid by Army for property it leases in the United States, amounting to \$14.0 million, were offset partially by rentals received in the amount of \$4.5 million. Of the rentals received, 55 percent was from industrial properties.

<sup>1/</sup> Land and improvements.

<sup>2/</sup> Includes excess and standby.

The total acreage controlled by Army within the United States is reported in Table 19 by status and by type of tenure and installation. Of the 11.4 million acres controlled by the Army within the United States, 3.9 million (34 percent) were owned and 6.6 million (57 percent) were public domain lands. A slight reduction (10 thousand acres) occurred in the amount of owned acreage.

The acreage and cost to the Government of the military real property controlled by Army in each of the States and the District of Columbia within the United States are shown in Table 20. Four states had Army real properties costing more than one-half billion dollars; these were Virginia, Texas, California, and Alaska in size of cost. The cost of the properties in these four States constituted 25.4 percent (one-fourth) of Army's total United States cost.

The total acreage (6.4 million) controlled by Army in the four States each having over one million acres; i.e., Alaska, New Mexico, California and Arizona, constituted 55.5 percent of its United States acreage. Virtually all (97.2 percent) of the public domain land under Army control was located in the five States of Alaska, New Mexico, Arizona, Utah, and California.

The ten categories of real property in which Army had the greatest dollar investment in the United States are presented in Table 21. They are illustrated in Chart 6 along with Navy and Air Force data. The total cost represented by the ten largest Army categories is \$6.4 billion, 66.4 percent or two-thirds of the total Army United States

Chart 6

## COST OF 10 LARGEST CATEGORIES OF REAL PROPERTY

## UNITED STATES

AS OF 30 JUNE 1963

See Tables 21, 25, and 29

cost. Slightly more than one billion dollars is invested in troop housing, the largest category.

The same 10 categories as on 30 June 1962 made the list of the 10 largest categories (dollar-wise); however, the roads and streets category moved up to third place in the relative standings. Family housing was in the number two position.

Department of the Army real properties in foreign countries represented a cost of \$882 million on 30 June 1963, as compared with \$800 million one year earlier. The Army exercised base rights on 593 thousand acres in foreign countries at the end of fiscal year 1963.

Troop housing continued to comprise the Army's largest cost category in foreign countries. In U. S. possessions family housing is the largest category, dollar wise, followed by troop housing.

#### 4. Department of the Navy

Real property controlled and used by the Navy on a world-wide basis cost \$10.1 billion, an increase of less than one percent over that reported one year earlier. Of the \$71 million increase during the year ending 30 June 1963, 29 percent was in the United States, 37 percent in the U. S. possessions, and 34 percent in foreign countries.

Annual rentals received by the Navy on a world-wide basis, as of 30 June 1963, amounted to \$4.9 million as compared to rental payments of \$3.7 million. Of rental receipts by the Navy for use of its properties within the United States, 61 percent is returns from industrial properties.

Navy's acreage controlled, on a world-wide basis, was 5.4 million acres as compared with 12.1 million for the Army and 12.6 million for the Air Force. During the year, world-wide acreage controlled by the Navy increased 129 thousand acres. This increase was within the United States.

On a cost basis, 84.1 percent of Navy-controlled property is located within the United States, 7.6 percent in the U. S. possessions, and 8.3 percent in foreign countries. Table 22 presents data showing costs and rentals for Navy-controlled installations in the United States by nonindustrial and industrial types.

Of Navy properties controlled on 30 June 1963 within the United States only 1.7 percent were at inactive installations, measured on a cost basis. Properties classified as industrial type facilities comprised 32.1 percent of the Navy real properties within the United States.

Of the total acreage Navy had under its control within the United States on 30 June 1963, 29 percent, or 1.4 million acres, was owned outright. An additional 2.2 million acres (44 percent of the total) were public domain lands. The data in Table 23 provide certain detail relative to Navy acreage by type of tenure and installation. Of total acreage controlled by the Navy in the United States, 97.7 percent was located at installations which were in an active status on 30 June 1963.

In Table 24 data are presented showing State detail as to total cost and acreage of the military real property controlled by Navy within the United States. Navy has properties exceeding one-half billion dollars

1/ Data represent the cost of land and improvements.

2/ Includes 35,310 acres public land.

in cost in the three States of California, Virginia, and Hawaii. These properties make up approximately 41 percent of the cost of Navy properties in the United States. The cost to the U. S. Government of Department of the Navy activities in the State of California amounted to \$2.1 billion on 30 June 1963. This was nearly 25 percent of the cost of all Navy Department activities in the United States.

In terms of acreage, 54.4 percent of the Navy United States total on 30 June 1963 was California land. The next largest amount was in Nevada, which represents 21.6 percent of the Navy U. S. total.

The ten real property categories representing the greatest cost to Navy are shown in Table 25 and are illustrated in Chart 6. In total, they constituted 60.8 percent of the over-all Navy real property costs in the United States. The broad diversification of Navy activities in the country is illustrated by the data in Table 25. While shipbuilding is one of the Navy's leading peacetime activities and accounts for a large part of its industrial activity, the Navy has numerous other activities of importance within the industrial field, namely, ordnance plants, various test stations (underwater laboratories, torpedo, radar, electronics, ballistics, etc.), propellant plants, ammunition depots, and other munitions type production facilities. Within the United States the largest Navy amount is invested in the maintenance facility category. Covered storage and family housing are the next two largest categories in order of investment.

Of the Navy real property total, 8.3 percent (\$837 million) was in foreign countries as of 30 June 1963. Acreage controlled by the Navy in

4/ Piers and wharves; excludes seawalls, bulkheads and other waterfront facilities.

5/ Feet of berthing.

foreign countries as of 30 June 1963 amounted to 389 thousand, a drop of about 11 thousand acres from that for one year earlier.

5. Department of the Air Force

World-wide real property under Air Force control on 30 June 1963 cost the Government \$15.7 billion. This represented 43 percent of the Department of Defense total. Most of the 6.1 percent increase (\$906 million) over that of one year earlier was attributable primarily to completion and transfer to inventory of properties constructed during recent years. The recorded increase in the Air Force inventory total during the last five years (since 30 June 1958) has been \$6.2 billion. A small portion of this is attributable to improved reporting coverage.

Air Force annual rentals paid for property used throughout the world on the basis of leases in effect on 30 June 1963 amounted to \$11.4 million. Of this amount 64 percent was for properties in foreign countries.

Land controlled by the Air Force all over the world totaled 12.6 million acres on 30 June 1963, a decrease of 547 thousand acres from the 13.2 million acres reported a year earlier. Most of this decrease occurred within the United States. The 1963 world-wide amount is six and one-half million acres less than that reported by the Air Force on 30 June 1957.

The data in Table 26 show that military real property controlled by the Air Force within the United States represented a cost to the Government of \$12.4 billion. Of the total world-wide Air Force

<sup>1/</sup> Land and improvements.<sup>2/</sup> Includes excess and standby.

investment, 79 percent represented installations within the United States, two percent in U. S. possessions and 19 percent in foreign countries.

Of the U. S. total investment, 8.3 percent is at inactive and standby installations. Industrial activities under Air Force control, all of which are contractor operated, constituted only 6.5 percent of the total Air Force property cost in the United States. As of 30 June 1963, on a dollar basis, only 3.5 percent of the industrial properties were in a standby status.

The reduction of 547 thousand acres under Air Force control within the United States during the year ending 30 June 1963 was accounted for primarily by a return of certain public domain lands to the Department of the Interior and to dispositions of fee-owned lands. Of the 10.4 million acres on hand in the United States on 30 June 1963, 1.5 million (14.5 percent) was owned and 8.0 million (77.0 percent) was public domain land.

Of the 16.8 million acres held as withdrawals from public domain by the Department of Defense within the United States, the Air Force controls 48 percent. Much of this land is used for missile ranges and advanced fighter bomber training. Table 27 provides additional detail on categories of lands held by the Air Force.

The state pattern of military real property controlled by the Air Force is shown in Table 28. The Air Force has properties costing more than one half billion dollars in the states of California, Texas, Alaska, and Florida. These properties amount to one-third of the total

1/ Data represent the cost of land and improvements.

2/ Includes 4,696 acres public land.

cost for the Air Force in the United States. The Air Force has some real properties in each of the 50 States and the District of Columbia.

The acreage of land controlled in three states, each with over one million acres--Nevada, Arizona, and New Mexico--comprised 68 percent of the total Air Force-controlled acreage in this country. Of the Air Force-controlled acreage in these three states 93 percent is land from the public domain.

On the basis of cost, Table 29 presents the ten largest categories of Air Force-controlled real property in the United States. The comparisons are shown in Chart 6. The total cost of these ten major categories (\$8.9 billion) represented 71.7 percent of the Air Force total costs within the United States. Airfield pavements with \$1.7 billion accounted for the largest segment of total Air Force investment within the United States. Three other categories costing more than one billion dollars each were land operational facilities, family housing and maintenance facilities.

Air Force-controlled properties in foreign countries, on the basis of cost, amounted to nearly \$3.0 billion on 30 June 1963. There was an increase of about \$104 million during the year in properties controlled by the Air Force in foreign countries. Of the Department of Defense investment in real property in foreign countries, 63 percent was under Air Force control on 30 June 1963.

Foreign base rights of varying types held by the Air Force in foreign countries involved about 2.2 million acres of land. Airfield pavements constitute the single largest Air Force investment category in countries followed by troop housing.

Section B - Military Construction in Progress

The cost of work in place, as reported by the military departments, on construction projects which had been started but not completed and transferred to the inventory, is shown by geographical area in Table 30. The cost reported represents the cost of labor and materials incorporated on the construction projects. The Federal Government has a property interest in these projects--most of them are being built on Government-owned land.

Upon satisfactory completion of the project and acceptance by the military department, the total cost of the completed project is added to the real property inventory account of the respective department.

<sup>3</sup>/ Excludes \$3,262 million cost of work in place on civil works projects.

## PART II - MILITARY PERSONAL PROPERTY

Section A - Inventory of Military Equipment and Supplies in the Consolidated Supply Systems and in Stock Funds1. General

This section of the report deals with the inventories in the supply systems of the Department of Defense. For each of the four military services, and for the Defense Supply Agency, dollar data are presented in terms of the major purposes for which the supplies and equipment are held, i.e., peacetime operating stock, mobilization reserve stock, economic retention stock, contingency retention stock, and excess stock for which disposal or screening action has not yet been initiated. The inventories are also subclassified into broad commodity categories representing families of similar kinds of items.

Inventories are accounted for in the supply systems of the military services and the Defense Supply Agency from time of acceptance until they have been issued to a using unit. The supply system inventories are those being held in the storage or warehousing facilities of these services for issue to the consumer. They constitute that segment of the overall materiel supply system which is defined in the Joint Chiefs of Staff dictionary as the "phase of military supply which extends from receipt of finished supplies by the military services through issue for use or consumption".

The stocks are physically located at depots, posts, camps, stations, and bases in the United States and possessions, and in foreign countries. They are stored in warehouses, open storage spaces, ammunition dumps, fuel tanks, etc.

Supply items which have been issued to the consuming military units, such as divisions, air-wings and most ships, are not considered as assets of the supply system. These items are in the hands of the ultimate user and as such are carried in unit records, until consumed, destroyed, captured, lost or otherwise disposed of. Part II, Section B, of this report includes data on major items which have been issued from the supply system to the ultimate users and are still on hand. If such an item in a military unit becomes unserviceable, it is normally replaced by a serviceable item from the supply system. The unserviceable item (if of a repairable type) is returned to the supply system where it may be repaired and put back in supply channels or declared excess and disposed of.

Also not included in the supply inventory totals is the value of excess stocks for which screening or disposal action has been initiated. Table 45 includes the value of such stocks as well as excess and surplus stocks from other sources such as using units.

#### Stock Funds

Stock funds do not constitute a separate supply system. They are operational and financial systems employed by the military services and the Defense Supply Agency principally to facilitate financial control over consumption-type supply items for which there is recurring demand. The stock fund mechanism permits these services to handle inventories of such continuous demand items on a replacement basis much as private business firms do when they replace stocks depleted by sales with new stocks purchased with the proceeds from such sales. Because

of the widespread interest in stock fund operations as a means of improving supply and fiscal management and controlling of inventories, data representing stock fund inventories for each military service and the Defense Supply Agency are shown separately in this section; however, they are also included in the overall totals for the entire supply system of each military service.

#### Reporting of Inventory Categories and Strata

Data representing the dollar value of inventories in the aggregate supply system, both the items which are financed by stock funds and those financed by appropriated funds, are shown for each of the military services and the Defense Supply Agency (stock fund only) in the tables in this section.

Each of these tables shows the dollar amount of inventories in each major commodity category (groupings of similar kinds of supplies and equipment) and in each stratum (groupings according to the purpose for which the supplies are retained).

The stratification accounts in use by the services and DSA are uniform, and are (1) Peacetime Operating, (2) Mobilization Reserve, (3) Economic Retention, (4) Contingency Retention, and (5) Excess Stocks. These inventory accounts are defined as follows:

a. Peacetime Operating Stock is that portion of the total quantity of an item on hand which is required to equip and train the planned peacetime forces and support the scheduled establishment through the normal appropriation and lead-time periods.

b. Mobilization Reserve Stock is that portion of the total quantity of an item on hand which is designated to meet the Mobilization Reserve Materiel Requirement. Included are pre-positioned stocks held in specific locations in condition for immediate shipment or use on or after M-Day.

c. Economic Retention Stock is that portion of the quantity in long supply which it has been determined will be retained for future peacetime issue or consumption as being more economical than future replenishment by procurement.

d. Contingency Retention Stock is that portion of the quantity in long supply of an obsolete or non-standard item for which no programmed requirements exist and which normally would be considered as excess stock, but which, it has been determined will be retained for possible military or Defense contingencies.

e. Excess Stock as reported herein is stock which is indicated to be above the sum of a, b, c, and d, above, and for which specific determination as being within the needs of the holding service or agency has not been made or disposal action initiated.

f. In-transit Stock is that owned by a military service, which is en route: (1) from manufacturers or suppliers; (2) from United States depots to overseas commands or vice versa; (3) from United States depots to United States commands or vice versa; and (4) between United States depots; and which has not been received by the consignee.

2. Summary of Department of Defense Supply System Inventories.  
(Tables 31 and 32)

During fiscal year 1963 the value of the military supply system inventories was reduced by \$556 million dollars from \$40,652 million to \$40,096 million. These include inventories of Army, Navy, Marine Corps, Air Force, and DSA, and do not include those of OSD and other Defense Agencies. This reduction comprises a net increase of \$373 million, or six percent, in stock fund inventories, and a net decrease of \$929 million, or three percent, in appropriated fund inventories.

The stock fund inventories of the military services were reduced; those of the Defense Supply Agency were increased. Army stock fund inventories were reduced \$158 million; Navy inventories were reduced \$77 million; Marine Corps and Air Force inventories were reduced by \$15 million and \$37 million, respectively. DSA inventories increased \$660 million or about 38 percent, chiefly as a result of the capitalization of stocks received from the services.

Appropriated fund inventories decreased substantially: \$929 million or about 3 percent of the 30 June 1962 total. Army inventories of appropriation-financed principal and secondary items were reduced in total \$796 million. Navy inventories of appropriation-financed principal and secondary items increased \$1.3 billion, more than half of which was accountable for by extended coverage. Marine Corps appropriation-financed stocks decreased \$47 million and Air Force decreased almost \$1.4 billion. DSA has no appropriation-financed inventories.

With respect to the stratification of stocks in accordance with purpose for which held, a significant change during fiscal year 1963 was the reduction of \$412 million in the amount of unstratified stocks,

## DEPARTMENT OF DEFENSE

(Thousands of Dollars)

Service	TOTAL STOCKS	UNSTRATIFIED STOCKS	S T R A T I F I E D S T O C K S					Contingency Retention	Excess Stocks
			Total	Peacetime Operating	Mobilization Reserve	Economic Retention			
Department of Defense - Total . .	\$39,684,238	\$1,425,235	\$38,259,003	\$15,379,396	\$10,920,876	\$5,911,634	\$636,254	\$5,410,843	
Army. . . . .	12,273,125	111,362	12,161,763	3,206,485	5,202,465	1,982,816	---	1,769,997	
Navy. . . . .	11,954,468	854,952	11,099,516	5,250,890	3,666,973	999,937	541,797	639,919	
Marine Corps. . . . .	1,422,529	117,813	1,304,716	360,362	659,809	82,940	57,411	144,194	
Air Force . . . . .	11,621,904	293,796	11,328,108	5,609,687	875,608	2,295,509	37,046	2,510,258	
Defense Supply Agency . . . . .	2,412,212	47,312	2,364,900	951,972	516,021	550,432	---	346,475	

as more and more inventories were brought under management control. With a reduction of total stocks in the military supply system inventories (Table 32) of \$615 million, the Peacetime Operating stocks were reduced \$222 million, Contingency Retention stocks were reduced \$403 million and Excess stocks, \$232 million. Increases were registered in Mobilization Reserve stocks (\$196 million) and Economic Retention (\$458 million). Unstratified stocks were reduced \$412 million.

At the end of fiscal year 1963, the Army owned 31 percent of the \$39.7 billion total military supply system inventories, with Navy (including Marine Corps) owning 34 percent, and Air Force owning 29 percent. DSA accounts for 6 percent. (Table 32 and Chart 7.) Not included in this table are about \$85 million of stock owned by Defense Agencies (other than the DSA) which are retail or in-use stocks and not considered part of the Military Supply System, nor the \$412 million of Shipboard Supplies included in Table 31.

Appropriated fund inventories accounted for about 84 percent of the total inventories, and stock fund inventories for the remaining 16 percent, up from 15 percent last year. The value of appropriated fund inventories of \$33.6 billion is divided among the departments as follows: Air Force accounts for 34 percent, Army for 30 percent and Navy (including Marine Corps) for 36 percent. Of the \$6.5 billion in stock fund inventories, however, Army accounted for 33 percent, down from 38 percent last year; Navy, together with the Marine Corps, accounted for 26 percent; Air Force accounted for 14 percent; and DSA for 37 percent, as contrasted with 28 percent a year earlier.

Chart 7

# DOD SUPPLY SYSTEM INVENTORIES BY SERVICE

AS OF 30 JUNE 1963

<sup>1/</sup> Includes "In Transit" and properties of the Office, Secretary of Defense and other Defense Agencies.

<sup>2/</sup> Includes \$412 million Shipboard Supplies not included in chart of Navy Supply System inventories.

The stratification of supply system inventories as of 30 June 1963 (Table 32) shows that \$15.4 billion, or 40.2 percent, of the value of stratified stocks was classified as Peacetime Operating; \$10.9 billion, or 28.5 percent, as Mobilization Reserve; \$5.9 billion, or 15.5 percent as Economic Retention; \$636 million, or 1.7 percent, as Contingency Retention; and \$5.4 billion, or 14.1 percent, as Excess.

### 3. Army Supply System Inventories (Table 33)

The total value of Army supply system inventories on 30 June 1963 was \$12.3 billion, of which stock fund inventories accounted for 17.6 percent and appropriated fund inventories for 82.4 percent. The \$12.3 billion represents a net decrease of \$954 million during the year. The implementation of the Department of the Army Realignment Program was effective 1 July 1962. The impact on the status of supply system inventories resulting from the realignment and transfer of items between funding areas (O&MA, PEMA, and Stock Fund) which generated sizeable increases and decreases in the dollar value of major categories of materiel with corresponding changes in line item count precludes a realistic comparison with the data reported as of 30 June 1962.

Extension of coverage in the supply system to include tactical and strategic communication-electronics equipment and surface-to-surface and surface-to-air missile systems added over 1,000 line items with an inventory value of almost \$735 million. As opposed to this, however, inventories of the older, substitute models of principal items of equipment and components particularly those used for CONARC training purposes and for other non-combat use were revalued to bring them more

1/ Includes excess stocks for which disposal or screening action prior to disposal has been authorized or initiated. These are included in Table 45.  
2/ Unstratified as of 30 June 1963.  
3/ Secondary items in hands of U. S. Property of Fiscal Officers.

closely into alignment with standard pricing policies. Inventories of appropriation-financed secondary items were drawn down \$44 million dollars in total, with quartermaster-type items, engineer, signal, and transportation equipment showing the largest reductions in stocks. Ordnance-type materiel and medical items increased in inventory.

Of the total stratified stocks in the Army supply system inventories (including stock funded items), the largest segment was Mobilization Reserve stocks, accounting for 42.8 percent; Peacetime Operating stocks accounted for 26.4 percent; and Economic Retention and Excess stocks accounted for 16.3 percent and 14.5 percent, respectively (Chart 8). The percentage of Mobilization Reserve stocks is somewhat less than last year, whereas Operating and Retention stocks are slightly greater, percentagewise.

Appropriation-financed stocks are distributed into strata in somewhat different proportions than the total inventories, which are weighted by stock-funded inventories. Mobilization Reserve and Retention stocks account for slightly higher proportions, 45.7 percent and 17.8 percent, respectively; Operating and Excess stocks represent lower proportions, 23.9 and 12.6 percent, respectively.

#### Army Stock Fund Inventories (Table 34)

Included in the Army supply system inventories shown in Table 33 are \$2.2 billion in the Army Stock Fund, almost 18 percent of the total. Inventories under stock fund decreased \$158 million during the fiscal year, representing an excess of issues from the system over receipts into it, as well as decapitalization, i.e., transfers to the Defense Supply Agency. The principal categories of materiel that reflected net

 $\frac{1}{2}$  Excludes excess stocks for which disposal or screening action prior to disposal has been authorized or initiated. These are included in Table 35. $\frac{2}{2}$  Includes stocks temporarily in use. $\frac{3}{2}$  Stock excess to one Army command, but not necessarily excess to the Army Supply System. $\frac{4}{2}$  Not stratified as of 30 June 1963.

decreases in inventory were ordnance-type materiel, comprising anti-aircraft and fire control equipment, parts, and supplies; weapons equipment, parts and tools; guided missile and rocket systems parts; tank and automotive equipment, supplies, and parts, special weapons' parts, tools, and equipment, and common hardware, cleaning, and preserving materials. Engineer equipment, parts, and supplies, and surface transportation secondary support item inventories were also reduced.

Gains in inventory were shown in air transportation secondary support items, quartermaster-type items, and medical-dental supplies.

At the end of the year, 36.3 percent of the stratified stocks were Peacetime Operating, 29.6 percent were Mobilization Reserve, 9.5 percent were Economic Retention, and 24.6 percent were Excess stocks.

#### 4. Navy Supply System Inventories (exclusive of Marine Corps)(Table 35)

The Navy supply system inventories totaled almost \$12.0 billion at the end of fiscal year 1963, an increase of almost \$1.2 billion from 30 June 1962. These figures exclude, as noted in Table 35, the \$412 million of Shipboard Supplies that are included in Table 31, since these are not, strictly speaking, considered part of the "managed" supply system. The inventories, totaling \$11,954 million, are divided into \$1,454 million, or 12 percent of the total, in Stock Fund inventories, and \$10,500 million, or 88 percent, in appropriation-financed inventories. This compares with a total of \$10,784 million as of 30 June 1962, divided into \$1,531 million (14 percent) Stock Fund and

Also excludes \$412 million of Shipboard Supplies included in Table 31.

Chart 9

SUPPLY SYSTEM INVENTORIES  
(Including Stock Funds)

DEPARTMENT OF THE NAVY

AS OF 30 JUNE 1963

BILLIONS OF DOLLARS

\$9,253 million (86 percent) appropriation-financed inventories. The \$1,170 million increase results from a decrease of \$77 million in the Stock Fund, and an increase of \$1,247 million in the appropriation-financed inventories. Over half of this increase results from the inclusion of consumable ordnance materiel afloat, not heretofore covered. This has now been brought under management control though not financial inventory control reporting.

Changes in and composition of Stock Fund inventories are discussed in the section following. For the appropriation-financed inventories, as of 30 June 1963, the three largest categories, Major Ordnance Equipment, Ammunition and Consumable Ordnance, and Aeronautical Material, account for nearly 61 percent of the total Navy Supply System Inventories.

Reductions during the year in the long supply (releasable assets) strata of Economic and Contingency Retention total \$457 million. Potential excess stocks were increased slightly in the move toward disposal, but an increase of \$278 million in Peacetime Operating stocks and of \$1,445 million in Mobilization Reserve (much of it the shipfills of ammunition already mentioned) offset these reductions. A healthy management improvement is indicated by the reduction of unstratified stocks, largely in-transit, by \$164 million.

Of the total stratified stocks at the end of fiscal year 1963, 47.3 percent were classified as Peacetime Operating, 33.0 percent as Mobilization Reserve, 13.9 percent as Economic and Contingency Retention, and 5.8 percent as Excess stocks.

1/ Excludes excess stock for which disposal or screening action prior to disposal has been authorized or initiated. These are included in Table 45.

Navy Stock Fund Inventories (exclusive of Marine Corps)(Table 36)

Included in the total of \$11,954 million of Navy supply system inventories are \$1,454 million (about 12 percent of the total) carried in the Navy Stock Funds. This represents a decrease of about \$77 million from the previous year, due chiefly to transfers to the Defense Supply Agency Stock Fund. With the exception of some small amount of realignment among some of the Stock Fund divisions, there was not a great deal of change in the inventory levels during fiscal year 1963.

On 30 June 1963, the stratified Stock Fund inventories were distributed as follows: Peacetime Operating, 49.3 percent; Mobilization Reserve, 18.6 percent; Economic and Contingency Retention, 17.4 percent; and Excess stocks, 14.7 percent.

5. Marine Corps Supply System Inventories (Table 37)

The value of Marine Corps supply system inventories at the end of fiscal year 1963 totaled \$1.4 billion, a decrease of \$62 million from the total on 30 June 1962. Principal decreases occurred in inventories in the Ordnance-Tank-Automotive, Engineers, and General Supplies categories. Unstratified inventories, such as stocks in-transit and in hands of contractors, decreased, as well.

The largest categories of stocks on 30 June 1963 were Ammunition with \$616 million, and Ordnance-Tank-Automotive with \$394 million, which together accounted for about 70 percent of the total value of stocks in inventory.

At the end of fiscal year 1963, 27.6 percent of the stratified stocks in the Marine Corps supply system were classified as Peacetime

BILLIONS OF DOLLARS

Operating; 50.6 percent, as Mobilization Reserve; 10.8 percent, as Economic and Contingency Retention; and 11.0 percent, Excess stocks (Chart 10). In percent distribution this follows more closely the Army pattern, with substantial Mobilization Reserve stocks, rather than that of the Navy, with its higher proportion stratified as Peacetime Operating.

#### Marine Corps Stock Fund Inventories (Table 38)

Marine Corps Stock Fund inventories amounted to \$236 million on 30 June 1963, almost 17.0 percent of Marine Corps total supply system inventories. Stock Fund inventories showed a reduction of \$15 million, or about 6 percent, since the beginning of the fiscal year. Most of this reduction occurred in the Ordnance-Tank-Automotive and General Property categories, which was partly offset by a \$6 million increase in the Communications-Electronic category.

The big reduction (\$122 million) that was taken in Economic and Contingency Retention stocks in fiscal years 1961 and 1962 was partly offset in 1963 as \$8 million was added in Economic Retention inventories and a Contingency Retention stratum at about \$10 million was established. As of 30 June 1963, stratified stocks in the Marine Corps Stock Fund were classified as follows: Peacetime Operating, 39.8 percent; Mobilization Reserve, 14.9 percent; Economic and Contingency Retention, 16.8 percent; and Excess, 28.5 percent.

#### 6. Air Force Supply System Inventories (Table 39)

1/ Excludes excess stocks for which disposal or screening action prior to disposal has been authorized or initiated. These are included in Table 45.

1963 was \$11.6 billion of which only 2.2 percent was in stock fund inventories and 97.8 percent under appropriated funds.

The \$11.6 billion represents a decrease of \$1.4 billion, or about 11 percent, during the fiscal year. Slightly more than \$1.0 billion of this decrease was in the Aircraft Replenishment Spares inventory; however the spares inventory still accounts for 54 percent of the total Air Force supply system inventory. Other categories that showed large reductions were Electronic and Telecommunications Equipment (down \$382 million), Spare Engines, Aircraft and Aerodynamic Missiles (down \$214 million), and Base Maintenance and Support Equipment (down \$46 million). Sizeable increases were registered in the Munitions (\$103 million), Missile Spares (\$69 million) and Missile Ground Equipment (\$47 million) categories.

As of 30 June 1963, the two largest categories of equipment were again Aircraft Replenishment Spares, and Spare Engines - Aircraft and Aerodynamic Missiles, with inventories of \$6.3 billion and \$1.9 billion, respectively. The large decrease in aircraft replenishment spares is accounted for by transfers to disposal, to inter-service supply support, and to the Defense Supply Agency.

Peacetime Operating stocks decreased almost \$1.0 billion and Mobilization Reserve stocks (Air Force "War Readiness Materiel") decreased about \$200 million. While Economic Retention stocks increased about \$140 million, Contingency Retention stocks were reduced \$75 million, and Excess stocks were reduced \$272 million. Stocks in transit were reduced \$45 million.

1/ Excludes excess stocks for which disposal or screening action prior to disposal has been authorized or initiated. These are included in Table 45.

2/ Stocks in transit.

3/ Disestablished 30 June 1963.

As of 30 June 1963, Peacetime Operating stocks represented 49.5 percent of the stratified supply system inventories; Mobilization Reserve, 7.7 percent; Economic and Contingency Retention, 20.6 percent; Excess stocks 22.2 percent.

#### Air Force Stock Fund Inventories (Table 40)

The value of Air Force Stock Fund inventories at the end of fiscal year 1963 was \$261 million, down \$37 million during the fiscal year, chiefly as a result of the disestablishment of the General Supplies division of the stock fund.

Peacetime Operating stocks gained a little, but Mobilization Reserve stocks were reduced and Economic Retention and Excess stocks were virtually eliminated.

On 30 June 1963 stratified stocks were distributed as follows: Peacetime Operating, 60.2 percent; Mobilization Reserve (almost all Aviation Fuel), 39.6 percent; Economic Retention and Excess stocks about 0.1 percent each.

#### 7. Defense Supply Agency Supply System Inventories (Table 41)

The Defense Supply Agency became operational on 1 January 1962 with the four stock fund divisions of clothing and textiles, medical material, subsistence and general supplies. Two more categories of material were capitalized in fiscal year 1962: industrial supplies and construction supplies.

During fiscal year 1963, three more categories of materiel were brought into the DSA supply system, financed under the Defense Stock

Packaged Petroleum Products . . . . .	8,626	---	8,626	6,510	1,087	1,029	---	---
Stocks in Hands of Contractors (UTW). . . . .	22,015	22,015	---	---	---	---	---	---
Stocks in Transit . . . . .	23,555	23,555	---	---	---	---	---	---
Other Unstratified Inventories. . . . .	1,742	1,742	---	---	---	---	---	---

1/ Excludes excess stocks for which disposal or screening action prior to disposal has been authorized or initiated. These are included in Table 45.

Fund and managed by Defense Supply Centers: Automotive repair parts, electronic supplies, and packaged petroleum products. Table 41 shows the stratification of the inventories by category.

Stocks of the Defense Supply Agency as of 30 June 1963 totaled \$2,412 million, an increase of \$660 million over those recorded at 30 June 1962. This net increase, due to the capitalization of stocks transferred from both stock fund and appropriated-fund accounts of the military services, is also the result of both increases and decreases in the several materiel categories operated by the DSA Centers. For the most part, the old-line categories, clothing and textiles, medical supplies and subsistence, decreased somewhat as those stocks were drawn down about \$85 million. General supplies increased about \$15 million. Inventories of those items that are managed by the more recently-created centers, Industrial Supplies, and Construction Supplies, increased about \$268 million. Added during the year were inventories of automotive repair parts, electronic supplies, and packaged petroleum products as Supply Centers managing these categories became operational. The three added over \$500 million to the total of DSA inventories.

During the year, unstratified inventories: materiel in the hands of contractors (GFM), in-transit stocks, stocks temporarily in use, and the like, were reduced \$43 million. Stratified stocks increased over \$700 million, with Peacetime Operating stocks increasing \$283 million, Mobilization Reserve stocks increasing \$95 million, Economic Retention stocks increasing \$204 million, and Excess increasing \$119 million. The stratification of DSA stocks at 30 June 1963 was as follows: Peacetime Operating, 40.3 percent; Mobilization Reserve, 21.8 percent; Economic Retention, 23.3 percent; and Excess, 14.6 percent. DSA has never established a Contingency Retention stratum.

BILLIONS OF DOLLARS

Section B - Personal Property Other Than Supply System Inventories

This section of the report covers personal property owned by the Department of Defense other than material in the military department supply system inventories. It includes various types of personal property, as follows:

1. Weapons and Other Military Equipment in Use.

This category of equipment generally comprises items of materiel traveling with troop movements and includes all major weapons and supporting equipment. The equipment may have been issued from the supply system inventories, at which time accountability is picked up by the using unit or (as in the case of aircraft, ships, etc.) it may have been purchased from a manufacturer, military or private, for direct shipment to a using unit.

Quantitative property records are maintained on major items in use until the item is destroyed, lost or otherwise disposed of; minor and consumable type items are not maintained on property records since they are assumed to be consumed at time of issue. In addition to quantitative records, the Navy and Air Force maintain monetary accounting records of the principal equipment in use. Army derives statistical values of such property by periodically pricing-out quantities of items.

The total value of this type of equipment which had been issued or assigned to using units at the end of fiscal year 1963 was \$77.4 billion. Comparable figures for the end of fiscal year 1962 were \$73.8 billion. Because this category includes the more costly types of military items, it constitutes by far the largest element of the total

property of the Department of Defense, and one which has been steadily rising in value, as the more expensive modern weapons are added.

Almost one-third of it is located outside the United States.

a. Army

Army reported that the value of weapons and supporting equipment in tactical use with troops was \$7.9 billion as of 30 June 1963, a decrease of \$788 million during the year. This equipment consists of Army aircraft (\$774 million, up \$7 million), guided missiles (\$1,190 million, off \$257 million), tanks and other combat vehicles (\$1,771 million, off \$298 million), tactical and support vehicles (\$1,715 million, up \$6 million), artillery, small arms, and other major equipment (\$2,425 million, off \$245 million). The decrease is, in part, owing to the revaluation previously described, to the deployment of missiles and special weapons, and to the withdrawal of troops and support from overseas areas.

b. Navy

Navy (including Marine Corps) reported the acquisition cost of major weapons and supporting equipment in tactical use as of 30 June 1963, at \$35.8 billion, an increase of \$2.7 billion. This total is composed of combatant ships, service craft, aircraft and missiles, and equipment in the hands of the Fleet Marine Force.

Navy ships in the active and inactive fleets accounted for the largest portion of the value of this equipment, amounting to \$24.5 billion, an increase of \$1.2 billion during the year. Of this amount, \$22.3 billion represent ships that have been completed and commissioned

and \$2.2 billion, work in place on those still in process of construction or conversion.

Service craft such as Utility Landing Craft, Minesweeping Boats, Open Lighters, Floating Derricks and Harbor Tugs were valued at \$876 million, a \$13 million decrease from the end of the previous fiscal year.

Navy aircraft as of 30 June 1963 accounted for \$9.0 billion, an increase of \$1.2 billion during the year, while complete missiles, were valued at \$227 million. Note that almost \$400 million in missiles were reported this year in the supply system inventories rather than "in-use". This year, Navy coverage is boosted by the inclusion of \$662 million of aircraft maintenance support equipment in use.

Fleet Marine Corps equipment amounted to \$499 million, an increase of about \$6 million from 30 June 1962.

c. Air Force

The cost of weapons and other military equipment in use was reported by the Air Force as \$33.7 billion, an increase of about \$1.6 billion over 30 June 1962. This total value comprises aircraft, valued at \$25.4 billion, an increase of about \$500 million over 30 June 1962; missiles, valued at \$1.2 billion, a decrease of about \$547 million, due to revaluation of missiles in use; and other military equipment, \$7.0 billion, an increase of about \$1.7 billion. This other equipment includes about \$4.9 billion of ground communication and electronic equipment and about \$800 million of vehicles. The increase of about \$1.3 billion in ground communications and electronic equipment represents, to a very large degree, new coverage, not heretofore reported.

d. OSD and Other Defense Agencies

Also included in Tables 1 and 2 of this year's report is some \$35 million of military equipment owned and in use by Defense Agencies, other than the Defense Supply Agency which reports none.

2. Plant Equipment (Tables 42 and 43)

This is personal property owned by the military departments of a capital nature including machinery, equipment, furniture, vehicles, machine tools, and accessory and auxiliary items for manufacturing or administrative use. It includes this type of capital equipment in use at military installations or at private contractors' manufacturing facilities, as well as machine tools and other production equipment held in the departmental industrial equipment reserves. It also includes, in the totals for the several military departments, equipment owned by the Department of Defense Advance Research Projects Agency, an element of the Office of the Director of Defense Research and Engineering. This agency enters into working agreements, or ARPA Orders, with the military departments under which the departments procure, maintain, and manage any equipment that ARPA may require.

Not included in Tables 42 and 43, but shown on Tables 1 and 2, are plant equipment and property owned by the Defense Supply Agency, most of whose equipment was formerly owned and reported by the military department Single Managers, and by the Office, Secretary of Defense and the several other Defense Agencies.

The total value (acquisition cost) of plant equipment reported by the military departments at the end of fiscal year 1963 was \$8.6

3449 Miscellaneous	9,485	3,502	2,798	3,185

billion, a net increase of \$266 million over the total of 30 June 1962. This represents an increase of \$175 million for Army, an increase of \$91 million for Navy, and no change for the Air Force. According to type, the value of metalworking machinery increased \$47 million, that of other production equipment, as defined, decreased \$71 million, and that of other plant equipment of all kinds increased \$290 million. Of the total of departmental plant equipment shown in Table 42, \$329 million is located outside the United States.

Table 43 shows the inventory of metalworking machinery owned by the military departments by type, i.e., by production equipment code.

### 3. Inventories Held in Industrial Funds (Table 44)

Included as part of the overall personal property of the Department of Defense are inventories, consisting of raw materials, supplies and work-in-process, held in all industrial funds. Use of industrial funds, authorized by Section 405 of Title IV of the National Security Act, permits the financing of industrial or commercial-type activities and the development of production costs to be used as a basis for charging the appropriations of customers for the products or services furnished to them by the activity financed by the Fund. For financial details of the Department of Defense Industrial Funds, see the report, "Working Capital Funds of the Department of Defense".

As of 30 June 1963, 65 activities in the Department of Defense were operated under industrial fund charters. The Army operated 22; the Navy, 39, one of which is a printing activity located in 29 separate plants; the Air Force, 3 (one of which is a printing activity

<u>Defense Supply Agency - Total . . . . .</u>	<u>897</u>	<u>790</u>	<u>107</u>

located in 9 difference plants; another is a laundry and dry cleaning activity operated at 43 installations); and DSA, 1.

The total inventories, consisting of raw materials, supplies and work-in-process, held in all industrial funds of the Department of Defense amounted to \$236 million on 30 June 1963.

4. Excess, Surplus, and Foreign Excess Personal Property (Table 45)

This is personal property on which disposal action has been initiated by a military department and which is either (1) in the process of being screened for further utilization or (2) been screened by all three military departments and is in the process of disposition. It is considered an element of DOD personal property until actually disposed of through sale, donation, or transfer to some other Agency. This excess materiel may have emanated either from supply system inventories or from equipment in use; in either case, accountability is dropped at the time of transfer to disposal channels and picked up in the property disposal account, shown in Table 45.

The amount of property in disposal channels as of 30 June 1963 amounted to \$3.4 billion which is \$575 million more than was in this category a year ago. The increase in domestic excess and surplus property (covering United States, Puerto Rico and the Virgin Islands) amounted to \$540 million; foreign excess increased \$35 million.

Of the DOD total of \$3,352 million on hand, the Army share amounted to \$1,087 million or 32 percent; Navy (including Marine Corps) \$1,035 million, 31 percent; and Air Force \$1,198 million, 36 percent. About \$32 million of excess and surplus or about 1 percent of the total,

Table 45 - Excess, Surplus, and Foreign Excess Property  
Inventories in Process of Screening and Disposal  
as of 30 June 1963

## DEPARTMENT OF DEFENSE

(Thousands of Dollars)

Military Department or Agency	Total Inventories	Domestic <u>1/</u>	Foreign
Department of Defense - Total . . . .	\$3,352,164	\$2,958,570	\$393,594
Army. . . . .	1,086,954	743,965	342,989
Navy (including Marine Corps) . . .	1,035,330	1,027,343	7,987
Air Force . . . . .	1,197,886	1,155,268	42,618
Defense Supply Agency . . . . .	31,994	31,994	---

1/ Includes the United States, Puerto Rico, and the Virgin Islands.

was reported by the Defense Supply Agency. Domestic inventories account for 88 percent of the total, while foreign make up 12 percent.

The principal factor that accounts for the \$575 million increase in the value of these DOD inventories is the increased generations of excess during the year, which were 11 percent greater than dispositions. By individual department, some variation in experience existed. Army domestic inventories decreased markedly (\$48 million), but these were almost offset by increased generation in foreign areas. The Army inventory is at the lowest level in some years.

Navy inventories increased by \$104 million in domestic areas, offset to some extent by a \$5 million decrease overseas. Air Force inventories increased (net) about \$453 million, as generations exceeded dispositions. DSA closed last year with a \$1.7 million inventory of clothing and textiles. During the year it assumed inventories of other activities amounting to \$33.1 million, but disposed of property in excess of generations in the amount of \$2.8 million, so that the closing inventory was \$32.0 million.

5. Government-Provided Material (Other than from Supply System)

This is material which has been purchased by the Government from one contractor and furnished to another, generally for incorporation in an end item being fabricated. Examples of such equipment are aircraft engines, electronic systems, and other parts which are furnished to a contractor by procurement offices for incorporation in an airplane, ship, or other weapon. These items do not go through the supply system and therefore are not included in the "Stocks in Hands of Contractors" shown in supply system tables.

When the end item has been delivered, the value of these components is included in the value of the end item. As of any given time, however, substantial dollar values of this Government-owned property are in the contractor's hands awaiting further fabrication. Accountability for such property is vested in the contractor in terms of items and control accounts. Procedures for financial reporting of these items at not too great a cost have been under development for some time, and since the date of this report, regulations have been prescribed which will permit coverage of this area as of 30 June 1964, as required by DOD Instruction 7500.1, "Real and Personal Property and Selected Financial Assets," which specifically calls for data on this type of government property to be reported by the military departments as soon as procedures for obtaining the data are worked out.

In the meantime, during fiscal year 1963, the Air Force which, in fiscal year 1961, initiated a procedure to provide statistical estimates of this type of property by having contractors price out quantities of such material on hand, continued the procedure and enlarged its scope and coverage.

As of 30 June 1963, a total of \$2.7 billion of such property was reported by the Air Force to be on hand. These data, together with smaller sums gathered by some Defense Agencies, have been incorporated in DOD totals of Real and Personal Property in Tables 1 and 2. The other departments, as well as Air Force, are working out procedures under the new regulations for reporting this property on a regularly-recurring basis.

Section C - National Industrial Reserve1. General

Public Law 883, 80th Congress, the "National Industrial Reserve Act of 1948," provides for establishing "adequate measures whereby an essential nucleus of Government-owned industrial plants and a national reserve of machine tools and industrial manufacturing equipment may be assured for immediate use to supply the needs of the Armed Forces in time of national emergency or in anticipation thereof."

The properties still owned by the Government are managed by the General Services Administration (as successor to the Federal Works Agency) under general policies established by the Secretary of Defense. Since the Department of Defense has a contingent claim and production priority rights in all the National Industrial Reserve plants, including those which GSA has disposed of or leased with a National Security Clause, data on these are included in this section of this report. However, none of the properties in this Reserve has been included in the totals for real property (Part I) or metalworking equipment (Part II, Section B) of this report because they are held by the General Services Administration.

2. Plant Reserve

The National Industrial Plant Reserve contained 12 facilities as of 30 June 1963. Only portions of some of the facilities are being set aside for use by the military services. The sponsoring military department and status of these plants at the end of fiscal year 1963 were:

<u>Sponsor</u>	<u>Total</u>	<u>Sold With Recap- ture Clause</u>	<u>Under Lease or Contract</u>
<u>Total</u>	<u>12</u>	<u>10</u>	<u>2</u>
Army	11	10	1
Navy	--	--	--
Air Force	1	--	1

In keeping with Department of Defense policy to release as many Reserve Plants as possible to private corporations, 10 of the 12 plants have been sold subject to appropriate restrictions and recapture clauses, and two are being operated under lease or contract agreement.

The status of the 12 plants by category of product is shown in Table 46. Of the two plants still owned by the Government, one produces magnesium and one produces jewel bearings.

### 3. Equipment Reserve

The National Industrial Equipment Reserve on 30 June 1963 contained 9,335 items of metalworking machinery and 122 nonmetalworking items of industrial production equipment. The original acquisition cost of the 9,335 items of metalworking machinery was \$85.5 million and of the 122 other industrial production items, \$333 thousand.

Under existing legislation these tools are available for redistribution to essential civilian industry, Armed Services, qualified non-profit educational institutions and training schools, and to other Federal agencies.

Table 46.--National Industrial Reserve Plants

## PART III - PROGRESS IN MANAGEMENT, RECORDING, AND REPORTING INVENTORIES

---

Section A - Office of the Secretary of Defense

Department of Defense-wide policies, programs, and projects developed or continued in fiscal year 1963, all aimed at improvement in the management, recording, and reporting of inventories, are summarized below:

Defense Supply Agency

The Defense Supply Agency (DSA) with headquarters at Cameron Station, Alexandria, Virginia, employed 938 military and 25,032 civilian personnel as of 30 June 1963. The major field activities and their headquarters are:

- Defense Traffic Management Service, Gravelly Point, Virginia
- Defense Subsistence Supply Center, Chicago, Illinois
- Defense Construction Supply Center, Columbus, Ohio
- Defense Medical Supply Center, Brooklyn, New York
- Defense Petroleum Supply Center, Washington, D. C.
- Defense General Supply Center, Richmond, Virginia
- Defense Clothing and Textile Supply Center, Philadelphia, Pa.
- Defense Industrial Supply Center, Philadelphia, Pa.
- Defense Electronic Supply Center, Dayton, Ohio
- Defense Automotive Supply Center, Detroit, Michigan
- Defense Logistics Services Center, Battle Creek, Michigan
- Mechanicsburg Defense Depot Activity, Mechanicsburg, Pa.
- Tracy Defense Depot, Tracy, California
- Defense Industrial Plant Equipment Center, Memphis, Tennessee

DSA currently manages 1,029,000 line items with an inventory value on hand of \$2,412,000,000. During fiscal year 1963, DSA extended direction and control to additional supply centers for electronic and automotive supplies, management of packaged petroleum products, and management of selected items of chemical materiel. In addition to these single manager responsibilities, the DSA is also responsible for administration and supervision of the DOD Coordinated Procurement Program, the Federal Catalog Program, the Defense Standardization Program, and the Defense Materiel Utilization and Disposal Program. Initial planning and scheduling was in process as of 30 June for DSA to assume responsibility for idle Defense Industrial Plant Equipment. Also, DSA initiated during fiscal year 1963 a study designed to determine the optimum method of management of aviation engines, and reparable and non-reparable items, as well as improve the interchange of assets and logistics data. This study encompasses 11 Federal Supply Classes containing 150,000 items with an inventory value of approximately \$6.1 billion.

#### Standardization of Logistics Data Systems

The Military Standard Requisitioning and Issue Procedures (MILSTRIP) were implemented 1 July 1962, providing uniform formats, codes, and procedures to be employed by a customer requiring materiel and the distribution system satisfying demands. This standard procedure now makes possible the uniform processing of supply transactions among military services and Defense agencies as well as the General Services Administration. The standard codes, card formats,

and procedures employed in MILSTRIP have given new impetus to the application of automatic data processing in the requisitioning processing area with a resulting reduction of clerical resources needed to process the thousands of requisitions initiated daily in the Defense Supply System.

While MILSTRIP provides a standard document for all requisitions, notices of supply status, cancellations, and supply follow-ups, which has improved the interchange of supply information between requisitioners and supply sources, an expansion of these standard procedures is now under development which will provide a uniform format and data elements for the inventory management data which flow between inventory control points and storage locations. Procedures have been developed which will standardize accounting and transaction reporting data. These new procedures, entitled Military Standard Transaction Reporting and Accounting Procedures (MILSTRAP), are now in the final stages of coordination.

Procedures have also been tested to improve the interchange of logistics data between procuring inventory managers and Defense contractors. These new procedures covering provisioning, design change reporting and other functions, called Military Industry Logistic Data Interchange Procedures are in the final stage of coordination.

In the movement of supplies through the Defense distribution system new procedures have been established to improve management control.

Also in process of final coordination and expected to be effective early in the new fiscal year were the Military Standard Transportation and Movement Procedures (MILSTAMP). These will establish a simplified system for transportation documentation and for controlling movement of cargo throughout all segments of the worldwide DOD transportation and movement system. This new procedure provides a single uniform transportation movement control document with basic elements of information needed to assure expeditious and timely movements of personal property and will also reduce document preparation costs.

In order to identify the relative importance of competing demands for transportation, warehousing, paperwork processing, and supplies, a uniform materiel priority system has been adopted by all services. This priority system provides a concise codification of the precedence of materiel demands and other movements which is essential to the operation of the DOD distribution system.

#### Initial Provisioning

Initial provisioning is the term applied to the process through which spares, repair parts, special tools, test, and support equipment are selected in range and quantity to logistically support new weapons and equipment for an initial service period. The procurement of these initial support items totals approximately \$1.0 billion annually.

The decisions as to which items to stock (range) and the quantities to procure depend largely on adequate identification of the items, their application, and technical judgements on predicted failure rates. The source of data upon which to make sound decisions is referred to as

provisioning technical documentation, to which are added supplemental data in the form of engineering drawings, specifications, and the like. Uniform provisioning technical documentation is provided for by DOD Instruction 4151.7, dated 29 January 1961. Because provisioning decisions are dependent on this technical documentation, the Office of the Secretary of Defense has emphasized the need for timely and adequate documentation from the design-production contractor. Industry, recognizing the importance of technical documentation to the ultimate operation and maintenance support of its products, has also been active in seeking better methods to furnish this documentation. Proposals offered by industry during fiscal year 1963 have been evaluated and are being incorporated in DOD technical documentation specifications.

New support items entering the DOD supply systems result from provisioning decisions on new weapons and equipment. The Federal Catalog System is designed to identify like support items and thus prevent duplication by supposedly "new" items. Because of time limitations however, the cataloging process is not completed until after provisioning decisions to buy are made and orders placed. It is thus possible to place orders to buy items in one military department when the same item is available in another department. Recognizing this, a DOD-wide provisioning screening procedure was developed, which provides for the central screening of manufacturers' part numbers and other identifying numbers prior to provisioning buys in order to relate these numbers to Federal Stock Numbers. When Federal Stock

Numbers are located and verified, it is then possible to determine whether DOD supply system assets are available to apply against new requirements. Experience gained since implementation in September 1962 is being used to improve and extend the principle of pre-screening during provisioning.

The Logistics Management Institute, under a management service contract with the Office of the Assistant Secretary of Defense (I&L), has completed or has in process several studies, in depth, on provisioning of specific weapon systems. Systems studied include the Titan II and Minuteman ballistic missile systems, the F-4B and F-4C aircraft and the Polaris missile system. Recommendations adopted from studies completed for the Titan II and Minuteman programs have been a principal source for accomplishing savings in the DOD Cost Reduction Program for initial spares provisioning.

#### Aviation Materiel Management Improvement Program and Related Military Department Actions

The size of the aviation materiel commodity area and the need for concerted improvement actions across all military departments have stimulated an Aviation Materiel Management Improvement Program (AMMIP). Through joint participation by OSD and the military departments, AMMIP calls for improvement actions at the operating base, in the depot repair-cycle segment and at the system (inventory control point) level. Aircraft engines, other aviation reparables, and non-reparable items are the commodity groupings treated. In addition, special consideration is being given to the integration of financial and quantitative

inventory management data, and to the inter-servicing of assets and data.

#### Action Plan for AMMIP

On 17 August 1962 an action plan was established for AMMIP. This plan formalized the main objectives of the program into six sections containing major improvement actions which are to be accomplished in a succession of steps. The goal for accomplishment of this program by the military departments was set for the end of fiscal year 1964. Each department reports progress in the program quarterly. As of 30 June 1963 the accomplishments were:

#### Army

The engine management system (EMS) was established and installed on a world-wide basis. This system requires daily transaction reporting of all engine activity (installed or uninstalled), by serial number, to the Army Aviation and Surface Command (AVSCOM). As a result of this system, AVSCOM has established central quantitative asset records for 4,154 engines which were previously recorded only at post, camp, and station level. In addition, a Repairable Removal and Replacement Inventory Reporting System (RRR) was established on 23 October 1962 for selected high dollar value repairables other than engines. This report provides the same basic data as the EMS, but on a monthly summary basis. A supply control format has been developed to provide consideration of the additional asset data gained as a result of these reporting systems. The Army further reports that, through its participation in Projects "PLUS" and "SHAKEDOWN", significant progress has been made in the area of excess property utilization.

Navy

Steps have been taken to reduce the number of in-process days and man-hours required for engine overhauls. One of the several actions designed to decrease requirements for other reparable type items has been the creation of material screening units aboard aircraft carriers to assure maximum feasible repair afloat. Significant improvements in the computation of Naval Air Station supply level requirements for reparable type items are in the final design state; the new system is scheduled to be in operation in late 1963. At the inventory control point level, the use of large fixed safety levels has been discontinued in favor of lower, variable safety levels based on more advanced computations which incorporate the concept of variable risk. The many current projects aimed at additional improvements hold promise for even greater progress in Navy aviation materiel management in the coming year.

Air Force

During fiscal year 1963, the Air Force completed a number of complementary actions to provide more accurate requirements computations for aircraft components and repair parts. Of particular importance are the establishment of new procedures for reporting assets and collecting usage data, the provision that contractors furnish asset and consumption reports semi-annually, and the reduction of reportable items in the quarterly stock balance and consumption report to those of high annual dollar expenditures. A semi-annual requirements computation for expendable-type spares has been replaced by a

continuous stock replenishment system whereby items will be computed and procured throughout the year as individual items reach reorder point level.

#### Utilization of Complete Aircraft Engines

Utilization of complete aircraft engines has received increased management attention by all of the military departments during fiscal year 1963. Identification listings to facilitate their free interchange has been improved and the inclusion of aircraft engines in the Project PLUS operation (described below) should further increase utilization during fiscal year 1964.

#### Integrated Support of the F/RF-4 Weapon System

The use of fundamentally identical aircraft, the F/RF-4 Weapon System by the Navy and Air Force brought with it the opportunity to employ integrated logistic support arrangements. Integrated configuration plans, maintenance support plans and supply support plans were developed during fiscal year 1963. Through integrated support, effectiveness and economy of operations are possible to a greater degree than that attainable through separate support by the two departments.

#### Inventory Item Reductions

The Inventory Item Reduction Program is established as an integral part of the DOD Cost Reduction Program. Because of the unnecessary administrative costs which are incurred through retention of catalog and inventory records for non-essential materiel, it is mandatory that registered Department of Defense users make timely reports of withdrawal

of interest, or prompt catalog deletion action, for items for which no valid requirement exists. Various special projects have been initiated by the military departments and the Defense Supply Agency to reduce variety of types, kinds, and sizes of items managed, to eliminate duplicate items, and to delete inactive items from the DOD supply system.

Due to the increased emphasis placed upon the item reduction area during fiscal year 1963, 621,500 items were recommended for elimination from the supply system. Except for cases where stocks are authorized for disposal, action on these recommendations will be completed when current stocks are exhausted. This compares to item reductions of 243,800 in fiscal year 1961 and 300,121 during fiscal year 1962.

Current projected item eliminations for fiscal year 1964 are estimated to be in excess of 535,000 items. It now appears that, for the first time since the DOD completed the conversion of its supply records and operations to the use of the Federal Catalog System in December 1958, a net decrease of items managed by the DOD has materialized, i.e., more items were eliminated than were added to the DOD catalog and supply systems.

#### Transfer of Management of Hand Tools and Paints

An agreement was reached between the DOD and GSA for the transfer of management of hand tools and paint from the Defense Supply Agency to the General Services Administration. Basically, DOD will retain responsibility for procurement and management of "Weapon

System" items, those subject to redesign or modification or directly related to an essential weapon system (items coded A-1 or A-2 under Item Management Coding). GSA will assume procurement and management responsibility for all other paint and hand tool items. DOD will continue to be responsible for all cataloging and for certain technical functions, such as, developing and publishing military specifications and standards for all items as well as planning for and funding mobilization stocks.

Use of Transferable - Non-Reimbursable Wholesale Stock Fund Materiel to Fill Military Service Prepositioned War Reserve Requirements

In order to utilize more fully the releasable assets of wholesale stock fund materiel and at the same time satisfy the deficiencies in the pre-positioned war reserve requirements of the military stock fund customers, a policy authorizing the transfer of such material on a non-reimbursable basis was promulgated during fiscal year 1963.

Reclamation

All the military services have active programs for the reclamation of parts and their free interchange to insure maximum utilization.

During fiscal year 1963 approximately \$1.12 billion of materiel was exchanged within, between, and among the military services, of which approximately \$164 million of this amount resulted directly from reclamation actions.

Project Re-Use

In January 1963 the ASD(I&L) established a calendar year 1963

project to improve utilization of equipment and supplies by transferring to disposal activities a dollar equivalent of materiel held in the military service/DSA supply system potential excess strata as of 31 December 1962.

Improved utilization should result from this action in that wide distribution of available excess is thereby attained among and between the military services and DSA.

The target for calendar year 1963 is to transfer \$4.2 billion of materiel from the military service/DSA supply systems to declared excess.

#### Project PLUS

In order to increase the utilization of releasable assets to satisfy valid requirements and to eliminate unnecessary procurement or overhaul, action is being taken to screen mechanically the Department of Defense releasable assets (long supply) versus requirements (Project PLUS).

This system provides for the application of modern data processing techniques to an integrated operating system for the exchange of supply management information between inventory managers of all military services, and makes use of the potential of rapid data transmission as a preferred means of communication.

These procedures were service tested during fiscal year 1962 and the first half of fiscal year 1963. The test proved so highly successful that in January 1963 the ASD(I&L) expanded the coverage of the procedures to include all Federal Supply Classes.

Project 26

The Secretary of Defense established a Project 26 in fiscal year 1962 which has as its objective the review of, and determination of desirable improvements in, the management and disposal of Department of Defense surplus personal property. The review, conducted by a joint service/Defense Supply Agency Task Force, chaired by the DSA, was divided into two phases: the domestic program and overseas, or foreign, excess program.

The domestic portion of the study has been completed and is being staffed by the military departments. The overseas portion is scheduled for completion early in fiscal year 1964.

Government Property in Possession of Contractors

During fiscal year 1963, procedures were developed to provide financial data on government industrial facilities and material in possession of defense contractors. A revision to paragraph 304.7 of ASPR-B, Manual for Control of Government Property in Possession of Contractors, has been approved and will be published early in fiscal year 1964 which provides for financial reporting of government-furnished property by contractors to the owning military department or Defense Agency.

Published Directives and Instructions

A digest of the principal regulations, directives, and instructions which provide for the recording or reporting of inventory data which have been issued by the Office of the Secretary of Defense since the enactment of Title IV of the National Security Act and which were in effect as of 30 June 1963 is presented in this part of the report. These current directives and instructions, in some instances, supersede or revise earlier directives and instructions on the subject of property accounting and reporting.

1. Military Assistance Program Supply Performance Report (Grant Aid Only) (DOD Instruction 2110.27), reissued 1 September 1961, with subsequent amendment.

This Instruction prescribes procedures for the preparation of summary quantitative data which will serve as the basis for official reports of the Department of Defense under the Military Assistance Program. The summary data show the value of current month deliveries, approved programs, undelivered balances, and the redistribution of materiel among recipient countries under the MAP Grant Aid Program.

2. Method of Financing, Funding, Accounting, and Reporting for Mutual Security Military Sales to Eligible Foreign Governments or International Organizations (DOD Instruction 2110.29), issued 7 April 1959.

The purpose of this Instruction is to prescribe uniform procedures to be followed in financing, funding, accounting and reporting with respect to all sales of military equipment, materials, and services made

under the authority of the Mutual Security Act of 1954, as amended.

3. Aircraft Inventory Record Series (DOD Instruction 3232.3). Issued 23 March 1956.

This Instruction establishes a uniform Aircraft Inventory Record Series within the Department of Defense in order to ensure that an accurate accountability and inventory record control of components installed in aircraft may be maintained. This requirement is applicable to all aircraft including those subject to inter-department transfer, maintenance cross-servicing, and utilization by National Guard Units, Reserve Training Units and the Mutual Assistance Program.

4. Basic Regulations for the Military Supply System (DOD Directive 4000.8), reissued 13 June 1963.

This Directive provides for the continuous and comprehensive implementation of Title 10, U.S.C., Section S 2202, in achieving the efficient, economical, and practical operation of an integrated supply system to meet the needs of the Military Departments without duplicate or overlapping operations and functions, and sets forth the policy defining the regulations prescribed by law.

5. Reports on Single Manager Operations (DOD Instruction 4100.31), reissued 2 September 1960, with subsequent amendments.

This Instruction prescribes quarterly statistical reports required by the Office of the Secretary of Defense relative to the operations of the Single Managers in their respective areas of assigned responsibility. These reports provide significant data upon which effective management policies and decisions can be formulated. The following single manager

assignments are being reported upon: Airlift Service, Ocean Transportation, Traffic Management within the United States, Subsistence, Clothing-Textiles, Medical Materiel, Petroleum, Military General Supplies and Military Industrial Supplies.

6. Commercial or Industrial Activities - Operation of (DOD Instruction 4100.33) issued 8 March 1963.

This Instruction implements basic DOD policy in starting, continuing, curtailing, or discontinuing commercial or industrial activities, and establishes procedures for maintaining inventory records for reporting purposes.

7. Reports on Military Procurement (DOD Instruction 4105.1), reissued 30 July 1962.

This Instruction provides for recurring reports on military procurement actions. All procurement actions of each military department and procurement agency against appropriated funds, contract authorizations and revolving funds which are replenished from appropriated funds are to be reported. These reports furnish information on the participation of small business firms in all military prime contract procurement and in experimental and development contracts; the use of formally advertised and negotiated contracts; the use of fixed price, cost-plus-fixed-fee, and other types of contracts; the distribution of prime contracts by state and labor surplus area; and on other aspects of military procurement.

8. Armed Services Procurement Regulation (DOD Directive 4105.30), issued 11 March 1959.

This Directive continues the Armed Services Procurement Regulation as a regulation of the Secretary of Defense. Appendix B thereof prescribes the record-keeping requirements of the contractor and of the military departments for Government property furnished to or acquired by contractors pursuant to the terms of their contracts.

The Individual Procurement Action Report, formerly prescribed by DOD Instruction 4015.44, has now been included herein. It prescribes the use of a uniform format for reporting all procurement actions of \$10,000 or more entered into by the military departments. This format is designed to provide essential procurement records and statistics through a single uniform reporting program as a basis for required recurring and special reports. It also provides the military departments with a wide variety of significant data for procurement policy and management control purposes.

The Monthly Procurement Summary by Purchasing Office, formerly prescribed by DOD Instruction 4105.51, is also included. It provides a form for the use by purchasing offices of the military departments to report procurement actions of less than \$10,000 on a uniform basis.

9. Miscellaneous Procurement Reports (DOD Instruction 4105.54), issued 20 July 1961, with subsequent amendments.

This Instruction provides for recurring reports from the military departments concerning certain types of procurement activity not otherwise reported on. The reports furnish information on extraordinary contract actions; grants for basic scientific research and transfer of title to government equipment; contract terminations; and letter contracts.

10. Requirements for Contractors to Price Deliveries of Military Supply Items (DOD Instruction 4110.1), issued 7 April 1959.

The purpose of this Instruction is to provide for the furnishing of unit prices by contractors on materiel inspection and receiving reports for shipments of materiel procured by the military departments. The unit price data furnished on materiel inspection and receiving reports will be used by the military departments in developing departmental standard prices and for financial and supply accounting.

11. Development and Maintenance of the Federal Catalog System Within the DOD (DOD Directive 4130.2), reissued 11 March 1959, with subsequent amendment.

This Directive states the mission and objectives of the Federal Cataloging Program, the scope and policies of the Federal Catalog System, and assigns the responsibilities within the Department of Defense.

12. Inventory Management Policies (DOD Directive 4140.1), issued 12 October 1956 and subsequent amendments, and a series of DOD Directives and Instructions: (a) Management of Mobilization Reserve Stocks (Instruction 4140.2), issued 28 July 1954, and subsequent amendments; (b) Management of Materiel in Long Supply (Instruction 4140.3), issued 11 January 1956 and subsequent amendment; (c) Management of Materiel Pipeline, including Levels of Supply (Instruction 4140.4), issued 3 September 1954; (d) Local Purchase of Materiel from GSA Stores Depots (Instruction 4140.5), reissued 9 February 1961; (e) Interservice Supply Support (Directive 4140.6), issued 5 July 1955; (f) Control, Supply and Positioning of Materiel (Instruction 4140.7), reissued 9 February 1961; (g) Inventory Management Report for Materiel in the Military Supply Systems (Instruction 4140.9),

issued 27 April 1956, with subsequent amendments; and (h) Policies for the Management of Selected Mobilization Reserve Items (DOD Instruction 4140.16), issued 4 August 1961.

Directive 4140.1 established the Department of Defense basic policy for the management of materiel inventories and uniform definitions. It calls for a physical inventory of materiel and reconciliation of records at least once a year, and requires that each item of materiel, both for military or industrial use within a military service, shall be under the cognizance of only one inventory control point. These supply and inventory control points are required to maintain records, make reports, channel the transportation of materiel in the most economical manner, review the inventory status in relation to current and future requirements, determine and declare Service-wide excess stocks, and schedule rebuilding of economically repairable stocks. Instruction 4140.2 establishes the policies regarding the retention, storage, care and preservation of mobilization reserve stocks and their stock record accounting, reporting and control. Instruction 4140.3 establishes policies, criteria and procedures requiring the optimum use of materiel in long supply within the Department of Defense. Instruction 4140.4 prescribes definitions to be used for identifying the levels of supply in the materiel pipeline. Instruction 4140.5 prescribes the policies and procedures governing Department of Defense local purchase of materiel from General Services Administration. Directive 4140.6 sets policies, criteria and procedures to facilitate optimum interservice use of available materiel within the Department

of Defense. Instruction 4140.7 provides procedures, criteria and guidance governing the control, supply and positioning of materiel within Defense. Instruction 4140.9 prescribes semi-annual and annual reporting as to the status, condition, purposes and activity of the materiel inventories of the military departments.

13. Utilization of DOD Materiel Assets (DOD Instruction 4140.12), issued 2 December 1957.

This Instruction supplements DOD Instruction 4140.3 by providing for the screening of procurement requirements by a central Department of Defense Agency.

14. Policies for the Transfer of DOD Supply System Inventories (DOD Directive 4140.13), issued 27 January 1959.

This Directive establishes uniform policies within the Department of Defense for the transfer of materiel in inventories between inventory managers of the military supply systems. These policies provide for the most effective repositioning of materiel for the promotion of military readiness and for the maximum economical utilization of supply system inventories in support of approved plans and programs.

15. Local Purchase of Materiel from Federal Supply Schedules or the National Buying Program of the GSA (DOD Instruction 4140.14), reissued 27 April 1962.

This Instruction establishes policies and procedures governing the local purchase of materiel from Federal Supply Schedules or the GSA National Buying Program.

16. Uniform Property Records (DOD Instruction 4140.15), issued 10 April 1961, and subsequent amendment.

This Instruction establishes a single property record within the military departments for use in the management accounting and reporting of Government-owned plant equipment in the hands of contractors.

17. Policies for Management of Selected Mobilization Reserve Items (DOD Instruction 4140.16), issued 4 August 1961.

Instruction 4140.16 establishes principles for economic ordering of non-principal items of supply for the mobilization reserve.

18. Military Standard Requisitioning and Issue Procedures (MILSTRIP) (DOD Instruction 4140.17), reissued 23 January 1962.

This Instruction establishes a military standard requisitioning and issue procedure (MILSTRIP) applicable to all military departments.

19. Materials Handling Equipment Utilization (DOD Instruction 4145.11), reissued 23 June 1959.

This Instruction (a) establishes uniform criteria for determining quantitative requirements and allowances for the principal items of materials handling equipment, (b) provides a means for determining the quantities of such equipment required by an installation and (c) prescribes reporting formats pertinent to the effective application of criteria and analyses of equipment utilization.

20. Policy and Procedures Relating to Non-excess Personal Property to be Sold or Exchanged for Replacement Purposes (DOD Instruction 4160.1), issued 14 July 1955.

This Instruction establishes Department of Defense policy relating to the exchange or sale of personal property for replacement purposes where the proceeds of the sale are applied to acquire similar items. It also prescribes policy and procedures affecting the utilization screening of such property before sale or exchange.

21. Policy Governing the Utilization Screening of Excess Personal Property Under Control of DOD (DOD Instruction 4160.9), reissued 11 January 1960.

This Instruction establishes Department-wide policy and procedures for reporting personal property under Department of Defense control which is excess to the needs of the organization holding such property. It routes notifications of excess personal property so that all elements of the Department of Defense may be informed of its existence and character. Provision is made for notifying all other elements of the Federal Government of excesses remaining after Department of Defense needs are met. Finally, the Instruction provides for disposal of such excesses which are not absorbed by the Federal Government.

22. Reporting Requirements for DOD World-Wide Excess, Foreign Excess and Surplus Materiel (DOD Instruction 4160.17), reissued 6 May 1963.

This Instruction reissues the basic requirements for a Department of Defense reporting system for excess, foreign excess and surplus materiel and the quarterly submission of specific information relating to the utilization and disposal of excess and surplus personal property.

23. DOD Facility Classes and Construction Categories (DOD Instruction 4165.3), issued 11 March 1955, and subsequent amendments.

This Instruction provides a standard numerical code for the identification and classification of facility classes and construction categories to permit uniform identification and classification of real property in planning, programming, budgeting, accounting, and reporting; exclusive of the Civil Works activities of the Army Corps of Engineers, or emergency construction in direct support of combat operations for any of the military departments.

24. Real Property: Acquisition, Management and Disposal (DOD Directive 4165.6), issued 15 September 1955; Program for Management of Real Property Maintenance Activities (DOD Instruction 4165.9), issued 23 June 1955, and subsequent amendment.

Directive 4165.6 states the Department of Defense policy relative to the acquisition, management and disposal of real property and delegates the authority to accomplish these actions within each of the military departments to the respective Secretary. Instruction 4165.9 outlines a program for uniformly effective management of real property maintenance activities.

25. Inventory of Military Real Property (DOD Instruction 4165.14), reissued 20 February 1958.

This Instruction provides a uniform procedure to be followed by the military departments for the establishment and maintenance of a world-wide inventory of real property (land and improvements) and for the preparation of an abridged inventory in summary form. Specific instructions are contained in this Instruction as to the categories, physical units of measure, the data, maps, and descriptive information which are to be kept on the records in the military departments and those that are to be summarized and reported to the Office of the Secretary of Defense. The military departments are required to keep their records current at all times and to submit summary reports annually.

26. Utilization and Retention of Real Property (DOD Directive 4165.20), reissued 29 August 1958.

Directive 4165.20 establishes Department of Defense policy governing the retention of real property by the military departments, establishes

criteria by which such property will be retained or reported excess and provides for a review of real property holdings within the military departments.

27. Acquisition of Wherry Act Housing (DOD Instruction 4165.31), issued 26 November 1956, and subsequent amendment.

This Instruction provides for the establishment of uniform procedures for the acquisition of Wherry housing projects. The military departments are required to submit bimonthly progress reports pertinent to these acquisition activities.

28. Form for Transfer and Acceptance of Military Real Property (DD Form 1354) (DOD Instruction 4165.40), issued 14 November 1961.

This Instruction prescribes a single form (DD Form 1354) to be used by all military departments for the recording of primary documentation upon transfer and acceptance of real property.

29. Non-utilization of Military Real Property (DOD Instruction 4165.41), issued 18 December 1961.

This Instruction establishes criteria and requirements for reporting on significant areas of unused land and space at certain domestic and overseas military installations. It is designed in part to assure maximum utilization of existing installations and in part to assist in screening real property construction requests.

30. Preparation of Materiel Planning Study, DD Form 764, (DOD Directive 4200.1) reissued 11 February 1959.

This Directive provides for a uniform presentation of demand and supply data from which the Office of the Secretary of Defense and the

military departments can discharge their responsibilities in the field of requirements and supply management. World-wide assets on hand and their general location are shown. The Directive is record-keeping in nature and studies of major items currently being procured are requested by separate memoranda as required - usually semi-annually. A list of items was developed for which a materiel planning study was requested from the military departments. This original list of items has been revised periodically for the purpose of adding or deleting items as they increase or decrease in importance.

31. Production/Delivery Status and Progress Reporting Between Military Departments (DOD Instruction 4200.4), issued 11 October 1955, and subsequent amendment, and Materiel Program Control - Principal Items (DOD Instruction 4200.6), issued 14 December 1955, and subsequent amendment.

Instruction 4200.4 establishes a requirement for, and a method to accomplish, the exchange of information between two or more of the military departments relative to Production/Delivery Status and Progress Reporting in connection with basic items procured or produced by one military department for another as the result of a single procurement assignment agreement. Instruction 4200.6 establishes the criteria for determining end items of major importance and provides for the accumulation of data, the regular publication of studies and the interchange of information between the military departments relative to those major items.

32. Recording and Utilization of Idle Production Equipment (DOD Instruction 4215.9), reissued 28 July 1961.

This Instruction prescribes the policies and procedures for reporting and redistributing idle machine tools and certain other related production equipment owned or controlled by the Department of Defense.

33. Inventory of DOD Owned Machine Tools and Other Production Equipment (DOD Instruction 4215.12), reissued 25 April 1957, and subsequent amendments.

This Instruction provides for the preparation and maintenance of adequate inventory records of Department of Defense owned machine tools and other production equipment in the Departmental Industrial Equipment Reserves. Reports on inventories are obtained by memorandum request as required, usually on an annual basis.

34. Reporting of Certain Fiscal Data with Regard to Machine Tools (DOD Instruction 4215.16), issued 29 July 1958.

This Instruction establishes an annual report designed to reflect the number and dollar value of machine tools having an acquisition cost in excess of \$500 approved for procurement during the past fiscal year. It also includes the number and dollar value expected to be procured during the current fiscal year.

35. Military Public Works Basic Record Keeping Requirements (DOD Instruction 4270.3), reissued 13 October 1955.

This Instruction provides for the maintaining of basic records, relative to military public works construction activities, at the headquarters of each of the military departments, from which summary data may be extracted as required.

36. DOD Motor Vehicle Uniform Reporting System (DOD Instruction 4500.7), reissued 23 August 1960, with subsequent amendment.

This Instruction establishes standard terminology, definitions and reporting of motor vehicle inventories. The system provides data on utilization, operating and maintenance costs.

37. Responsibility for Application of Automatic Data Processing Systems to Business Procedures (DOD Directive 5105.11), issued 2 January 1957.

This Directive defines the responsibility of the military departments and the Office of the Secretary of Defense in the application of automatic data processing systems (ADPS) to business procedures, such as inventory accounting, etc.

38. Defense Supply Agency (DSA) (DOD Directive 5105.22), issued 6 November 1961.

This Directive establishes a Defense Supply Agency under the direction and control of the Secretary of Defense. The Agency is responsible for the procurement and distribution of supplies and services common to all of the military departments.

39. Policies for Implementation of Single Manager Assignments (DOD Directive 5160.12), reissued 10 August 1960 and a series of DOD Directives: (a) Single Manager Assignment for Airlift Services (DOD Directive 5160.2), reissued 7 December 1956, and subsequent amendments; (b) Single Manager Service Assignment for Ocean Transportation (DOD Directive 5160.10), reissued 28 May 1956, and subsequent amendments; (c) Single Manager Assignment for Petroleum (DOD Directive 5160.18), issued 24 July 1956, and subsequent amendments.

Directive 5160.12 establishes the basic pattern of organization and procedures for Single Manager assignments for common use items or common service activities, identifying the primary objective of the Single Manager assignments as being the elimination of duplication and overlapping of effort between and among the military departments and the improvement of effectiveness and economy in supply and service operations throughout the Department of Defense. Directive 5160.2 creates a Single Manager Assignment for Airlift Service, designating the Secretary of the Air Force as the Single Manager. Directive 5160.10 creates a Single Manager Assignment for Ocean Transportation designating the Secretary of the Navy as the Single Manager. Directive 5160.18 creates a Single Manager Assignment for Petroleum, designating the Secretary of the Navy as the Single Manager.

40. Program Change Control System (DOD Directive 7045.1), issued 12 April 1962, with subsequent amendments. Procedures for Program Change Control and Related Progress Reporting (DOD Instruction 7045.2), 17 April 1962, with subsequent amendments.

This Directive establishes the initial framework for an integrated system for review and approval of proposed new programs and changes in existing programs. It also provides for maintaining and updating of a "Five-year Force Structure and Financial Program" and for progress reporting on selected major program items. Instruction 7045.2, issued 17 April 1962, provides specific procedural guidance for administration of the Program Change Control System and related progress reporting.

41. Regulations Governing the Use of Project Orders (DOD Directive 7220.1), reissued 27 September 1958, and subsequent amendment.

This Directive prescribes the regulations governing the use of project orders and the basis upon which the performing establishment will be reimbursed. A project order is a specific, definite and certain order issued for the manufacture of materials, supplies and equipment, or for other work or services, which, when placed with and accepted by a Government-owned and operated establishment, serves to obligate appropriations in the same manner as orders or contracts placed with commercial enterprises.

42. Accounting and Reporting of Obligations and Quantitative Data by Segments of the Five-Year Force Structure and Financial Program (DOD Instruction 7220.12), issued 11 June 1962.

This Instruction prescribes the system and procedures for accounting and reporting of obligations incurred and quantitative data for significant parts of the Five-Year Force Structure and Financial Program.

43. Billing and Collection for Sales of Department of Defense Materiel (DOD Instruction 7220.13), issued 5 November 1962.

This Instruction implements DOD Instruction 7420.1 and 7510.1 with respect to requirements for billing and effecting reimbursement for sales of all materials, supplies, and equipment except aircraft, ships, and plant equipment not in the supply system.

44. Accounting and Reporting on Expenses and Disposition of Proceeds from Sale of Scrap, Salvage, Surplus or Foreign Excess Personal Property

(DOD Instruction 7310.1), reissued 10 October 1962.

This Instruction sets forth the policies with respect to accounting and reporting on disposition of proceeds from sale of scrap, salvage, or surplus materials, including foreign excess personal property of the Department of Defense, except (a) proceeds from sale of such material held by working capital funds of the military departments (these are handled in accordance with Regulations Governing Stock Fund and Industrial Fund Operations) and (b) proceeds from sale of such material held for the Military Assistance Program.

45. Accounting for Excess, Surplus, and Foreign Excess Personal Property, Including Scrap and Salvage (DOD Instruction 7310.2), issued 9 August 1960.

This Instruction establishes uniform, simplified procedures for accounting for excess, surplus, and foreign excess personal property (including scrap and salvage) transferred from supply system inventories or turned in from use and placed in the process of disposal. The procedures provide for the establishment of separate property-disposal accounts; quantitative accounting for scrap; a method of allocation of net sales proceeds to working-capital funds; simplified accounting for individual sales; and pre-determined rates for reimbursable expenses.

46. Regulations Governing Industrial Fund Operations (DOD Directive 7410.4), reissued 17 July 1958, and subsequent amendments.

The Directive provides for the establishment of three Industrial Funds - one in each military department. It also establishes the policy for the initial transfer of funds, inventories, and properties to the Industrial Funds, the handling of project and other work orders and

reimbursements for such work, provision for accounting and cost accounting systems, authorization to incur obligations and expend funds, budgetary control, reporting on operations, and auditing.

47. Financial Reports for Department of Defense Industrial Funds (DOD Instruction 7410.5), issued 28 July 1959.

This Instruction sets forth the requirements for financial reports of Industrial funds by the Department of Defense to cover its responsibilities under the National Security Act Amendments, and to meet other reporting requirements under a single uniform system of reporting for activities operating under industrial funds.

48. Regulations Governing Stock Fund Operations (DOD Directive 7420.1), reissued 19 December 1956, and subsequent amendments: Principles to be Observed Determining Materiel to be Included in Stock Funds (Instruction 7420.5), issued 26 November 1956.

Directive 7420.1 provides for establishment of a Stock Fund in each of the four services setting up procedures for the issuance of charters, initial transfer of funds, inventories, and other assets, pricing policy, management policy, sales of stocks, accounting, authority to obligate and expend funds, budgetary control, reporting and auditing. Instruction 7420.5 clarifies the criteria for inclusion and exclusion of materiel for stock fund financing.

49. Financial Reports for Department of Defense Stock Funds (DOD Instruction 7420.6), reissued 19 September 1961.

This Instruction provides the financial reports and budget forms to meet requirements of the Office of the Secretary of Defense in overall

financial review, for use in the preparation of reports to the Congress and other Government agencies, and in financial control actions under the budget process.

50. Reimbursement by Single Manager Stock Fund Divisions for Retail Inventory Losses (DOD Instruction 7420.7), issued 7 January 1958.

This Instruction prescribes uniform procedures for reimbursement by Single Manager stock fund divisions to the retail stock fund divisions of the military services for net inventory losses of the corresponding retail category or division of assigned material estimated to be recovered in surcharges established by the Single Manager.

51. Billing and Collection for Sales of Stock Fund Materiel (DOD Instruction 7420.9), issued 5 November 1962, with amendment.

This Instruction supplements DOD Instruction 7220.13 by establishing procedures for billing and effecting collection for sales of stock fund materiel, with special instructions for accounting, reporting, and controlling transactions.

52. Quarterly Stock Fund Reports on Financial Status and Program Projections (DOD Instruction 7420.10), issued 6 November 1962.

This Instruction prescribes planning objectives and progress reports against which accomplishments may be measured, for key budget program elements.

53. Report on Real and Personal Property and Selected Financial Assets (DOD Instruction 7500.1), reissued 26 September 1961.

This Instruction prescribes uniform reporting formats and criteria to the military departments for the recurring annual submission

of narrative, accounting and statistical material required by the Office of the Assistant Secretary of Defense (Comptroller) for the preparation of a consolidated Department of Defense report to the Congress and the President on property records maintained under Section 410 of the National Security Act. It also prescribes the instruction and reporting format for the financial assets of each military department exclusive of real and personal property, required annually by the Chairman of the Committee on Government Operations, House of Representatives.

54. Uniform Pricing Policy for Materials, Supplies and Equipment Financed by Military Appropriated Funds (DOD Directive 7510.1), issued 31 December 1956, reprinted 16 November 1962.

This Directive provides the basic policies and criteria pertaining to pricing materials, supplies, and equipment in the supply distribution system other than those inventories financed under working capital funds.

55. Use of Source Documents and Source Records in Quantitative and Financial Inventory Accounting (DOD Instruction 7510.2), issued 2 July 1957.

This Instruction defines the type of basic source documents and source records to be used in the military departments to ensure that the inventory accounting and reporting systems provide for the accumulation of both quantitative and financial data from original transaction documents and stock records.

56. Pricing of Government-owned Plant Equipment in the DOD (DOD Instruction 7510.3), issued 24 May 1960.

This Instruction establishes uniform pricing policies for Government-owned plant equipment, for inventory and other purposes.

57. Uniform Policy for Charging Accessorial Costs Incident to Issues, Sales, and Transfers of Materials, Supplies, and Equipment (DOD Instruction 7510.4), issued 16 November 1962.

This Instruction establishes policies and procedures for charging expenses arising from issues, sales, and transfers of materials, supplies, and equipment, except bulk POL, plant equipment not in the supply system, aircraft, and ships.

58. Progress Report on Military Family Housing Projects (DOD Instruction 7720.5), issued 1 October 1962.

This Instruction provides for submission of progress reports as various stages of development are reached in the planning and construction of military family housing projects.

59. Inventory and Utilization Reporting on Military Family Housing (DOD Instruction 7730.20), issued 19 December 1962

This Instruction prescribes quarterly reports on inventory of military family housing units and occupancy and assignment of personnel to these units. The Instruction is applicable to all DOD components.

## Section B - Department of the Army

### Development of Single Army Supply System

The reorganization of the Department of the Army has had and will continue to have far-reaching effects on the supply systems of the Army.

For many years the supply distribution system of the Army was under the responsibility and operational control of the chiefs of the seven technical services. Each of the chiefs of technical services was given the management control of his separate logistical stocks. The depot supply system, in effect as of 30 June 1962, consisted of (1) branch depots, commanded and operated by the individual technical services, and (2) general depots, commanded by the Quartermaster General and operated for supplies of two or more technical services. The general depots were used extensively for the handling of "Single Manager" items such as subsistence, clothing and textiles, medical, automotive, construction, and general supplies. Most of these "Single Manager" items have been assumed by the Defense Supply Agency.

A salient element of the plan for reorganization of the Department of the Army concerned the establishment of the United States Army Materiel Command (USAMC) which was activated on 8 May 1962 and began to absorb materiel functional personnel of the various technical services and other Army agencies. It became operative on 1 August 1962 and plans were made to become fully operational by the end of 1962.

The organization of USAMC provides for the exercise of authoritative control by function, and in special situations by commodity, over all Army wholesale materiel operations pertaining to development, testing, production, and supply. These controls include operation of laboratories, arsenals, proving grounds, test facilities, depots, supply control activities, procurement offices, and transportation terminals. This permitted replacement of several logistics systems, under the multiple direction of the chiefs of technical services, with an integrated logistical system under the command jurisdiction of a single commander.

The system developed by USAMC fulfills the objective of providing command supervision over the critical transition from development to production to supply with minimum risk to the continuous combat readiness of the Army. Thus, the overall objective of the USAMC is realized in the timely delivery of suitable equipment and supplies in required quantities to both CONUS installations and oversea commands.

Effective 1 August 1962, the Commanding General USAMC assumed responsibility for the supervision and operation of the Financial Inventory Accounting and Reporting Systems, Army-wide. These responsibilities include many functions previously held by the Deputy Chief of Staff for Logistics.

Specific operational functions include:

- (1) Developing and preparing proposed Army Regulations and revisions thereto.
- (2) Monitoring, coordinating, supervising, consolidating and establishing appropriate controls over Financial Inventory Accounting.

(3) Realignment of the stock fund home office and sub home office concepts to be compatible with USAMC concept of materiel categories within major subordinate commands.

During fiscal year 1963, plans were developed for the extension of Army Stock Fund to cover commissaries and clothing stores in CONUS and oversea commands. USAMC is developing plans to establish a command channel division of the Army Stock Fund for installation support inventories at Class II installations and hospitals with effective date during fiscal year 1964. The establishment of this retail division of the USAMC Stock Fund for support inventories will eliminate the need of appropriation financing the pipeline of supply. Consumer funds will be obligated and expended upon the issuance of these inventories for "in use" purposes.

#### Stock Fund Procedures

Expedited reimbursement for shipments of, and more timely records of, Stock Fund materiel were initiated in February 1963 with installation of new Army procedures, coordinated with those of DSA, under DOD Instruction 7220.13 and 7420.9. The system is geared to make full utilization of mechanized facilities where available while retaining capability for accepting manual inputs. Other advantages are more timely reconciliations between revolving funds and appropriations, and more prompt adjustments for over-and-under-shipments and losses and damages in transit.

#### Industrial Fund Activities

An Army Industrial Fund Charter was approved 3 August 1962

authorizing the Commanding General USAMC to operate, under a single capital investment, twenty-one (21) industrial and commercial-type installations and activities. This charter replaced individual charters issued the installations and activities through respective technical services that existed prior to the reorganization of the Army.

Prior to the establishment of USAMC, there were five separate command channels for reporting to the Army staff on industrial fund operations (Transportation, Chemical, Signal, Ordnance Corps and the Quartermaster General). It was evident that need existed for a uniform management and control system, because the various technical services had implemented the Army Industrial Fund in dissimilar manners.

The most significant change in Army Industrial Fund policy during fiscal year 1963 was implementation of the DOD requirement that DOD customer agencies pay industrial funded activities in advance for all orders of \$25,000 and more.

#### ARPA Orders

As of 1 August 1962, USAMC assumed responsibility for the technical performance and administration of approximately 125 Advanced Research Projects Agency (ARPA) orders. This involved financial management of inventories amounting to approximately \$74 million which had previously been managed by Army components which were absorbed in the USAMC complex.

Section C - Department of the NavySupply System Automation

As part of the overall plan to automate and standardize the supply system, the Navy has accelerated the development and implementation of Uniform Automated Data Processing Systems for Navy's inventory control points and stock points. The objective is immediate response to fleet needs by Navy stock points with simultaneous transmitting of transaction data to cognizant inventory control points for system stock evaluation. Full implementation of the basic system is scheduled for mid-1964.

Supply System Integration

Plans were developed for greater integration of Navy stock points with the Defense Supply Agency supply distribution system. These efforts will result in a reduction of overall Department of Defense inventories.

With the establishment of the Fleet Material Support Office on 1 July 1962, retail functions were centralized in one command, thus providing better utilization of personnel and dollar resources, and providing a focal point for dealing with the Defense Supply Centers concerning support of the fleet and the Navy industrial establishment.

More effective support is being achieved by relieving technical bureaus of supply management of material not requiring technical bureau control. In the past 12 months, 1,146 items valued at \$63.9 million have been transferred from technical bureaus to inventory control points.

Under the program for the elimination of duplicate supply management, material realignment among inventory control points during the first nine months of fiscal year 1963 resulted in the elimination of 7,827 line items. Navy transfers to Defense Supply Centers during this same period totaled 70,231 items, with an inventory value of \$64.1 million.

#### Supply Procedures and Funding

Navy review and evaluation of the first full year of supply operations under Military Standard Requisition and Issue Procedures (MILSTRIP) and the Uniform Material Issue Priority System (UMIPS) indicates that both procedures are operating successfully.

New criteria were developed during fiscal year 1963 for exclusion of certain types of items, such as insurance, reparable, and developmental items, and those relating to safety of personnel, from the Navy Stock Fund. Budget data are currently being developed to support transfer of funding and responsibility to appropriation funding under technical bureaus. The objectives of this effort are to improve Stock Fund management through the exclusion of items unsuitable for Stock Fund financing, and to improve appropriation budgeting by elevating responsibility for budgeting for the items to the technical bureaus.

#### Supply Operations Afloat

The mechanized supply afloat procedures program has progressed to the extent where it now encompasses 20 major ships of the mobile support force. In addition, key punch machines have been installed

on all Atlantic and Pacific Fleet destroyer tenders as well as on all Atlantic Fleet cruisers.

A major improvement in the Fleet Ballistic Missile Submarine tenders' data transmission and receiving capabilities has been made possible through the installation of an Automatic Digital Network (AUTODIN). Although basically designed and engineered for shore installations, the AUTODIN Communications System is capable of providing the speed and error-free transmission necessary to support a modern weapons system such as POLARIS. This system provides direct exchange of information with major inventory control and stock points for requisition submission, clarification of material requirements, and furnishing of timely status information.

To simplify the task of ordering supplies aboard ship, the Fleet Oriented Consolidated Stock List (FOCSL) was developed for distribution to fleet units during fiscal year 1963. Similarly, a consolidated Fleet Issue Load List and a consolidated shopping guide were developed for stores issue (AKS) ships.

#### High Value Item Management

The High Value Item Management Program, following recommendations developed last year, has been established within the Navy. This program is designed to achieve inventory and procurement reductions through use of the best talent and the best techniques in the management of High Value items. It is estimated that the High Value program initially will encompass less than one percent of the items in Department of the Navy inventories, but more than 40 percent of the annual dollar investment.

Looking further toward attainment of the objectives of the High Value program, the Navy and Marine Corps have initiated a deferred procurement policy which involves a time-phased series of provisioning reviews and redeterminations of the range and quantity of selected high-value items to be procured for initial support. The additional program information and usage experience that this permits will (1) increase the accuracy of the final selection of the correct range and depth of secondary items, (2) hold initial investment in selected items to a minimum pending further provisioning reviews, (3) reduce the procurement of items which ultimately become obsolete or require expensive modification because of design changes, and (4) produce substantial savings in overall material support of weapons, systems, and equipment.

#### Material Movement

Developments during fiscal year 1963 have resulted in increased requirements for management of transportation in support of the POLARIS and other priority weapons systems of the Navy. The Navy's contract cargo airlift service, QUICKTRANS, has been extended into the Bremerton, Washington, area to insure availability of responsive airlift service for FFM material generating from the chosen supply facility for the Pacific area.

Upon receipt of Civil Aeronautics Board approval in October 1962, a new concept in airlift service was implemented whereby the QUICKTRANS contractor transports common carriage and contract material within the same aircraft.

Under the terms of this test procedure, half of the airlift capability is reserved for contract airfreight to be moved at Navy direction with the balance to be utilized for the movement of common carriage freight. During the Cuban crisis, the immediate availability of the common carriage capacity for military cargo was used effectively in support of Navy logistic requirements.

Increasing needs for mobile communications equipment have posed numerous transportability problems in order to insure adaptability of such material to airlift as well as sealift. Through application of transportability techniques it has been possible to redesign some of this equipment to permit its movement via existing aircraft. Similar transportability research and analysis with regard to submarine propellers holds promise of increasing transportation flexibility by making minor design modifications and developing specially-designed transport racks.

Research and development was commenced in January 1963 leading to a Department of Defense Integrated Materials Movement System. Greater responsiveness to logistics demands is envisioned through optimum use of national transport capability, increased speed of supply through greater use of unitized loads, reduced total costs in manpower and dollars through less handling, and increased capability to support combat forces under varying conditions.

#### Warehouse Automation

The Navy's program for warehouse automation now includes automated materials handling systems at NSC Norfolk, NSC Bayonne, NSD

Philadelphia, NSC Oakland, and Charleston NAVSHIPYD. Plans are under development for similar systems at the Long Beach NAVSHIPYD, Puget Sound NAVSHIPYD and NSD Pearl Harbor.

#### Field Purchasing

In March 1963, the Aviation Supply Office in Philadelphia became the first Federal agency to automate the processing of purchase orders for stock replenishment requirements. At the beginning of the automated processing cycle, the ASO purchase order system ties in with the already-mechanized procedure in which replenishment requirements are automatically computed. Under the new system, documentation will be minimized and many manual reviews will be eliminated. The ultimate result will be more intensive application of purchasing talent to the large dollar value purchases and at the same time assure that small purchase orders (under \$2,500) will flow through an automated process, simply and quickly. Similar applications will be extended to other major field purchasing offices having automated data processing equipment.

### Section D - Department of the Air Force

#### Automatic Data Processing in the Supply System

Throughout fiscal year 1963, automation continued to play a leading role in the improvement of the Air Force Logistics System.

At the end of fiscal year 1963, 85 base supply activities were mechanized, with 32 bases awaiting equipment installation. As a further step in this automation effort, a total of 152 Air Force bases have been approved for installation of a standard ADP system. Many of the recognized deficiencies within the Air Force today will be greatly improved as a result of this standardization effort.

This system will provide for:

1. Instantaneous response to all transactions.
2. Standardization of procedural guidance within all commands.
3. Compatibility between inventory control system and data communication system.
4. Improved accuracy and timeliness of inventory management data.
5. Greater ability to enforce supply discipline.
6. Saving of training costs as a result of implementing a standard training program.
7. Improved manpower utilization by the establishment of a standard manning criterion.
8. Standard reporting of operational effectiveness data to provide for improved methods of evaluation.

The lead base computer under this program is scheduled for installation in the summer of 1964, with follow-on installations in fiscal years 1965 and 1966.

Improvements have also been made at wholesale level of logistics within the Air Force by the installation of three additional computers in the Air Force Logistics Command. As a result, all of the Air Materiel Areas are equipped with a standard computer system, and the Inventory Management Stock Control and Distribution System has been implemented command-wide. Notwithstanding the inherent benefits of instantaneous computer communication and a single set of operating instructions, this effort has paved the way for the acquisition of a mass storage device to supplement the computer. Thus, pending further refinements to the system, AFLC will be provided with the capability to respond to the increasing demand for immediate status information.

Improvement in the Interservice Supply Support Program

During fiscal year 1963, the USAF Interservice Supply Support Program (ISSP) achieved the highest record in its history. The comparative Air Force non-reimbursable transfers to other military services and Air Force acceptances from other military services for fiscal years 1961, 1962, and 1963 are tabulated below:

<u>Air Force Transfers and Acceptances</u> (Millions of Dollars)		
	<u>Acceptances</u>	<u>Transfers</u>
1961	\$46.4	\$52.1
1962	44.3	73.2
1963	84.0	147.0

The objective of this DOD program is to maximize the utilization of the services' excess inventory. This program has a direct bearing on the Cost Reduction Program.

#### Utilization and Disposal of Materiel

Utilization of Air Force excess personal property through withdrawals, reissue, reclamation, transfer to other Federal Agencies, donations, and a small number of sales to friendly foreign governments, amounted to 61 percent of all usable excess property removed from the "Redistribution and Marketing" inventory during fiscal year 1963.

Air Force generations of excess and surplus personal property amounted to \$2.4 billion (acquisition cost) during fiscal year 1963. The greater part of these generations were in the last two quarters and as the result of an accelerated program to release excess property under Project REUSE. The major portion of generations during the last two quarters of fiscal year 1963 could not be disposed of during that year, and still accomplish adequate redistribution of property needed by other military services, Federal agencies, and authorized donees. Therefore, disposals amounted to \$2.0 billion (acquisition cost), and generations exceeded disposals by \$450 million. This increased the on-hand balance from \$745 million at the end of fiscal year 1962 to \$1,198 million at the end of fiscal year 1963. Excess and surplus "complete aircraft" on hand at 30 June 1963 comprised approximately 40 percent (\$473 million) of the ending on-hand inventory.

Project MINT

Project MINT (Materiel Identification and New Item Control Techniques), established in 1962 to validate identities, consolidate like items, develop further interchangeability relationships, establish a data base for item review, and develop and publish criteria/tools for item selection, is in its final stage and has proven to be well worth the effort expended. Over 300,000 Federal Stock Numbers (FSN) were deleted from the Air Force system and over 300,000 item identifications were proposed for revision. Over 12,000 interchangeability and substituteability groups were proposed, and over 200,000 FSN's were proposed as standard with over 50,000 FSN's proposed as limited standard. Data bases were developed for approximately 40,000 items.

Accelerated Item Reduction (AIR) Program

All Air Force actions in the AIR Program were completed by 15 December 1962, two weeks in advance of the scheduled date. The Air Force was AIR Assignee for 22 Federal Supply Classes in the Inventory Review Phase of this program. In these classes, 287,564 descriptive type item identifications were analyzed. Of these, 23,757 were found to be no longer required, and will be inactivated when present stocks are exhausted.

## Section E - Defense Supply Agency

### Installations Operations

As of 30 June 1963, the DSA exercised operational control over installations in Richmond, Virginia (DGSC), Philadelphia, Pennsylvania (DC&TSC), Columbus, Ohio (DCSC), Dayton, Ohio (DESC) and Tracy, California. In addition, DSA has assumed operational control over the warehousing function located at the Naval Supply Depot in Mechanicsburg. DSA has issued instructions to consolidate some of the Defense Surplus Sales offices. Plans call for reduction in number of DSSO's from 34 to 18.

### Project SHAKEDOWN

Project SHAKEDOWN was activated at San Antonio Air Materiel Area as a service test on 28 August 1961. The objective was to conduct a Joint Military Service technical review and analysis of each item of supply cataloged in Federal Supply Class (FSC) 2915 (engine full system components). Of primary concern was the elimination of unnecessary items in the DOD supply system, commonality and interchangeability of items between the military services and improvements of item identification for federal catalog.

To date, the services have reviewed 46,000 Federal Supply Numbers in FSC 2915. During this review 4,382 FSNs have been cancelled, three Military Supply Standards have been issued, 24,462 FSNs have been corrected and 5,506 FSNs were selected for further review to determine interchangeable relationship.

The project has now been expanded to include eight additional Federal Supply Classes. Projecting the experience gained under FSC 2915, it is believed substantial corrective actions can be anticipated.

#### Property Accounting

During fiscal year 1963, the Defense Supply Agency promulgated Defense Supply Agency Regulation 7500.2 "Property Accounting for Capital Equipment and Minor Equipment". Prior to publication of this regulation, each DSA center or activity was performing or having its property accounting performed in accordance with procedures of the military service to which previously assigned. The Defense Supply Agency also issued instructions regarding the accountability for DSA-owned industrial plant equipment. It is anticipated, however, that reporting under this latter instruction will be cancelled when Defense Industrial Plant Equipment Center (DIPEC) becomes fully operative.

#### Standardization

During fiscal year 1963, 37,159 item reduction decisions were accomplished by DSA Centers. This accomplishment was 38 percent over the item reduction decisions originally programmed for fiscal year 1963. Procedures exist to automatically implement these item reduction decisions as stocks are exhausted. The Defense Supply Agency has organized a full time work group to devise new techniques for minimizing entry of unnecessary items into the supply system. Standardization management responsibility for over 50 percent of all DOD items has been transferred from the military departments to DSA Supply Centers.

Cataloging

In order to cope with the increased volume of work performed and the additional responsibilities assigned to the Defense Logistics Services Center, which was moved to Battle Creek, Michigan during fiscal year 1963, an improved large scale computer was selected and installed. This new system became operational in January 1963. This is just one of the many mechanization conversions which will increase performance, reduce processing time, improve accuracy, and generally benefit the program.

As a result of reorganization of the single managers into Defense Supply Centers under the DSA, varied formats for supply catalogs were inherited. The DSA, in conjunction with the military services, has developed a standard format for publishing DOD section of the Federal Supply Catalog. Initial publication of the supply catalogs under these new formats will begin in the early part of fiscal year 1964. This will facilitate more effective utilization of supply catalogs in the future.

GENERAL SERVICES ADMINISTRATION,  
Washington, D.C., December 23, 1963.

Hon. WILLIAM L. DAWSON,  
*Chairman, Committee on Government Operations,  
House of Representatives, Washington, D.C.*

DEAR MR. CHAIRMAN: Enclosed are four summary tables on real property owned by the United States throughout the world as of June 30, 1963; and a statement on coverage, as requested in your letter of March 15, 1963.

Data on public domain properties under the control of the General Services Administration were forwarded to you on October 25, 1963.

The Federal Government owned real property throughout the world with an acquisition cost of \$61.5 billion, as of June 30, 1963, an increase of \$2.5 billion over last year's report. The Department of Defense accounts for \$42.9 billion, or 69.8 percent; while all other agencies account for \$18.6 billion, or 30.2 percent of the total.

Sincerely yours,

LAWSON B. KNOTT, Jr.,  
*Acting Administrator.*

COVERAGE OF INVENTORY OF REAL PROPERTY OWNED BY THE UNITED STATES  
THROUGHOUT THE WORLD AS OF JUNE 30, 1963

The inventory of real property owned by the United States throughout the world as of June 30, 1963, includes all land, buildings, and other structures and facilities owned by the United States (including wholly owned Government corporations). It is based on detailed inventory reports submitted by the participating agencies as prescribed by General Services Administration Regulations, title 2, chapter XI.

Land reported in the inventory includes unreserved public domain; public domain lands reserved for national forests, national parks, military installations, and other purposes; and land acquired by purchase, donation, and other methods. It also includes land in which the Government has long-term interest which is considered by the reporting agency as being equivalent to ownership.

Buildings or other structures and facilities owned by the Government, whether or not located on Government-owned land, are included in the inventory. Buildings and other structures and facilities in process of construction are included only if they were available for use as of June 30, 1963.

Buildings acquired under the terms of Public Buildings Purchase Contract Program or other lease purchase agreements (Public Law 519, 83d Cong.), as amended, are included if construction was completed as of June 30, 1963.

Real property excess to the needs of the reporting agency or surplus to the needs of the United States is included in the inventory.

The Federal Government accounts for real property at cost in accordance with principles prescribed by the General Accounting Office. The inventory consequently shows acquisition cost data for all federally owned real property. Estimated costs (as of date of acquisition) are used when actual costs are not reasonably ascertainable.

Costs include all capital improvements and such items as plumbing, elevators, heating and lighting fixtures, and air-conditioning systems, which are normally required for the functional use of a building. In addition, costs include such items as safes and vaults, which are built into the structure or are permanently affixed thereto. No costs have been included in this inventory for (1) unreserved public domain; (2) public domain reserved for national parks, national forests, military installations, and other purposes; and (3) historical sites, when such

sites have been acquired by methods other than by purchase. However, the acreage for such lands is included in the inventory.

Inventory data are presented in three major geographical groupings: (1) United States; (2) outlying areas of the United States (e.g., Commonwealth of Puerto Rico, Virgin Islands); and (3) foreign countries. The Department of Defense reported only summary data covering number of installations, acreage, number and floor area of buildings, and costs for its military functions in Alaska and Hawaii. The Department of Defense also reported only overall summary data on total acres and total costs for its military functions located in outlying areas of the United States and in foreign countries.

Excluded from the inventory are lands administered by the United States under trusteeship by authority of the United Nations and lands owned by the sovereign governments of the various outlying areas of the United States. The inventory excludes properties acquired through foreclosure, confiscation, or seizure to be disposed of in settlement of a claim or debt to the Federal Government. It also excludes property owned by the District of Columbia government.

Machinery, processing equipment, demountable and movable structures, as well as furniture and special use items which are not considered part of the realty reported, are also excluded from the inventory.

Easements, rights-of-way, as well as improvements to land, buildings, or structures and facilities occupied by the Government as lessee, are excluded. However, federally owned buildings and/or structures and facilities located on leased land are included.

ARCHITECT OF THE CAPITOL,  
Washington, D.C., December 17, 1963.

Hon. WILLIAM H. DAWSON,  
Chairman, Committee on Government Operations,  
House of Representatives, Washington, D.C.

MY DEAR MR. CHAIRMAN: In response to your request of March 15, 1963, I hereby submit a valuation of the personal and real property under my control or care, owned by the U.S. Government on June 30, 1963, as established by an inventory taken as of this date.

	<i>Real property</i>	
1. Land.....		\$97, 139, 447
2. Buildings and improvements.....		361, 817, 666
Total real property.....		458, 957, 113

Property under this heading is stated at estimated present-day evaluation and includes land acquisitions and property improvements which occurred during fiscal year 1963. The following properties are included: U.S. Capitol Building, Old and New Senate Office Buildings, Old and New House Office buildings and grounds, site of an additional Senate Office Building, site for an additional House Office Building and appurtenant facilities for the House of Representatives, Legislative Garage, Capitol Power Plant, Main and Annex Library of Congress Building and Grounds, U.S. Botanic Garden and nursery, U.S. Supreme Court Building and Grounds, and U.S. Court of Claims Building.

We are also inclosing, for your information, a copy of the report on real property, held as of June 30, 1963, prepared for and submitted to the U.S. Senate Appropriations Committee. Property listed in this report is valued at acquisition cost.

Yours very truly,

J. GEORGE STEWART,  
*Architect of the Capitol.*

#### ARCHITECT OF THE CAPITOL

##### REPORT OF FEDERAL REAL PROPERTY AS OF JUNE 30, 1963

##### *U.S. Capitol Buildings and Grounds*

Properties under legislative branch of the Government, occupied by the Congress.

##### Land:

Acquired by purchase.

Acquired: 1791 to 1961.

Area: 169 acres.

Cost: \$28,642,445.

(Includes site acquired in 1949-60 for additional office building for U.S. Senate and in 1956-61 for additional office building and appurtenant facilities for U.S. House of Representatives).

##### Buildings:

U.S. Capitol, Senate and House Office Buildings, and Legislative Garage.

Constructed: 1793 to 1963.

Floor area: 2,735,000 square feet.

Cost: \$173,759,000 (to June 30, 1963).

1. Occupancy and use of these buildings and grounds controlled by the Congress.

2. Assignment and reassignment of space in Capitol under Speaker of House of Representatives and Senate Committee on Rules and Administration; in Senate Office Buildings under Senate Committee on Rules and Administration; in Old and New House Office Buildings under House Office Building Commission; in Legislative Garage under Vice President and Speaker of the House.

3. Architect of the Capitol has the physical care of these properties.

### Capitol Power Plant

Property under the legislative branch of the Government. Supplies heat and air-conditioning refrigeration for the Capitol, Senate and House Office Buildings; heat for the Library of Congress Buildings, U.S. Botanic Garden, U.S. Supreme Court Building, Legislative Garage, Government Printing Office, Washington City Post Office, and Folger Shakespeare Library.

#### Land:

Acquired by transfer.

Acquired: 1904.

Area: 6 acres.

Cost: Transferred without cost by act of Congress.

#### Buildings:

Main powerplant building: 244 by 117 feet, with maximum height of 85 feet.

Annex powerplant building: 90 by 50 feet, two stories high.

Refrigeration plant building: 123 by 80 feet, height approximately 38 feet.

Walk-through tunnels, containing steam and chilled-water distribution lines.

Constructed: 1904 to 1954.

Cost: \$19,377,000 (to June 30, 1963).

1. Architect of the Capitol has the physical care and operation of plant.

2. Plant under control of the House Office Building Commission.

### *Library of Congress Buildings*

Properties under legislative branch of the Government, occupied by the Library of Congress.

#### Land:

Acquired by purchase.

Acquired: 1886 to 1932.

Area: 15 acres.

Cost: \$1,496,779.

#### Buildings:

Main and Annex Buildings, Library of Congress.

Constructed: 1889 to 1938.

Floor area: 1,600,000 square feet.

Cost: \$22,458,000 (to June 30, 1963).

1. Occupancy and use of buildings and grounds controlled by the Congress.

2. Architect of the Capitol has structural and mechanical care of these properties.

3. All other care, including assignment and reassignment of space, under the Librarian of Congress.

#### U.S. Botanic Garden

Properties under legislative branch of the Government, occupied by the U.S. Botanic Garden, including Poplar Point Nursery.

##### Land:

Acquired by purchase, transfer, and public domain.

Acquired: 1851 to 1946.

Area: 33 acres.

Cost: \$981,140.

##### Buildings:

Conservatories, greenhouses, office, storage and potting sheds.

Constructed: 1873 to 1933.

Floor area: 89,000 square feet.

Cost: \$1,758,000 (to June 30, 1963).

1. Architect of the Capitol serves as Acting Director of U.S. Botanic Garden.

2. Botanic Garden under control of Joint Committee on the Library.

#### *U.S. Supreme Court Building*

Property under the Chief Justice of the United States, occupied by the U.S. Supreme Court and the Administrative Office of the United States Courts.

##### Land:

Acquired by purchase.

Acquired: 1929-30.

Area: 8 acres.

Cost: \$1,768,741.

##### Building:

U.S. Supreme Court Building.

Constructed: 1931-35.

Floor area: 392,737 square feet.

Cost: \$10,617,800 (to June 30, 1963).

1. Occupancy and use of building and grounds controlled by the Congress.

2. Architect of the Capitol has structural and mechanical care of building.

3. All other care under marshal of the Court, except assignment and reassignment of space which is under the Court.

#### *U.S. Court of Claims Buildings*

Property occupied by and under the control of the U.S. Court of Claims.

##### Land:

Acquired by purchase.

Acquired: 1901-02.

Area: one-half acre.

Cost: \$100,000.

##### Buildings:

U.S. Court of Claims Buildings.

Acquired in 1902.

Floor area: 37,000 square feet.

Cost: \$245,000 (to June 30, 1963).

1. Occupancy and use of buildings and grounds controlled by the Congress.
2. Architect of the Capitol has structural and mechanical care of the buildings.
3. All other care, including assignment and reassignment of space under the court.

NOTE.—Revised to reflect disposal of "zero value" building at Sells, Ariz., and a correction from 29.5 to 20 acres of land at Winslow, Ariz.

U. S. DEPARTMENT OF THE INTERIOR,  
OFFICE OF THE SECRETARY,  
*Washington, D.C., October 28, 1963.*

Hon. WILLIAM L. DAWSON,  
*Chairman, Committee on Government Operations,  
House of Representatives, Washington, D.C.*

DEAR MR. DAWSON: In accordance with your request of March 20, 1963, and our acknowledgment of March 25, 1963, enclosed are the following tabulations covering public domain properties as of June 30, 1963:

Table I: Estimated market value of public domain lands administered by the U.S. Department of the Interior, together with the amounts of land involved, average value per acre by State, and actual cost of the improvements on such land.

Table II: Cost of buildings on public domain land by predominant use.

Table III: Cost of structures on public domain land by predominant use.

Table IV: Changes in public domain withdrawals and restorations by Federal agencies during fiscal year 1963.

Table V: Mineral resources value of the public domain.

Also enclosed are reports by States, on GSA Form 1166, covering lands carried at "zero value" in the GSA real property inventory, as of June 30, 1963. All lands reported in this category are historical sites under the jurisdiction of the National Park Service.

Sincerely yours,

N. O. WOOD, JR.,  
*Director of Management Operations.*

U.S. DEPARTMENT OF JUSTICE,  
Washington, D.C., October 2, 1963.

Hon. WILLIAM L. DAWSON,  
Chairman, Committee on Government Operations,  
House of Representatives, House Office Building,  
Washington, D.C.

DEAR MR. CHAIRMAN: Your letter of March 20, 1963, requested that there be furnished to you, no later than November 1, 1963, certain data on the present-day evaluation of real property heretofore reported at \$1 or less for accounting purposes.

The following sets forth the requested tabulation:

Location	Number of acres	Use	Estimated evaluation
El Centro, Calif.....	2.5	Border Patrol pistol range.....	\$1,287
El Centro, Calif.....	3.0	Border Patrol sector, headquarters and detention facility.	75,000
Eagle Pass, Tex.....	.7	Border Patrol station.....	5,000
Carrizo Springs, Tex.....	.3	Border Patrol station.....	4,250
Laredo, Tex.....	21.1	Border Patrol sector headquarters.....	10,000
Zapata, Tex.....	1.9	Border Patrol station and housing.....	15,000
Total.....	29.5	-----	110,537

Sincerely,

S. A. ANDRETTA,  
Administrative Assistant Attorney General.

TREASURY DEPARTMENT,  
Washington, October 29, 1963.

Hon. WILLIAM L. DAWSON,  
*Chairman, Committee on Government Operations,  
House of Representatives, Washington, D.C.*

DEAR MR. CHAIRMAN: Referring to your letter of March 20, 1963, addressed to the Secretary, and the reply of March 21, there are enclosed reports showing the estimated present-day value of acreage (exclusive of public domain) listed in the Treasury Department's report of owned real property as having no acquisition, or negligible, costs, for the following:

U.S. Treasury Building and annex: Washington, D.C.

Bureau of the Mint: U.S. Bullion Depository, West Point, N.Y.

Bureau of Customs: Installations at various locations.

U.S. Coast Guard: Installations at various locations.

The acquisition costs of buildings, structures, and facilities located on the sites referred to in these reports are shown on the report of owned real property submitted to the General Services Administration as of June 30, 1963.

Sincerely,

A. E. WEATHERBEE,  
*Administrative Assistant Secretary.*

*U.S. Treasury Building and annex,<sup>1</sup> Washington, D.C.*

State code	GSA control number	Name of property	Property code	Usage code	How acquired	Acreage		Estimated present-day land value <sup>2</sup>
						Urban	Rural	
08	07810	U.S. Treasury Building and annex.....	1	10	2	6.3	-----	\$22,584,000

<sup>1</sup> As of June 30, 1963, reported to GSA as 1 installation (previously reported as 2).

<sup>2</sup> From Office of Assessor, District of Columbia government.

NOTE.—Acquisition cost of buildings as of June 30, 1963, is shown on the report of owned real property submitted to GSA.

<sup>1</sup> GSA approved usage code 30 instead of usage code 10 since the space used for housing exceeds that used for office.

NOTE.—Acquisition costs of buildings, structures, and facilities as of June 30, 1963, are shown on the report of owned real property submitted to GSA.

TREASURY DEPARTMENT

**UNITED STATES COAST GUARD**

PRESENT DAY VALUE OF LAND ACQUIRED AT NO COST  
EXCLUSIVE OF PUBLIC DOMAIN PROPERTIES

AS OF 30 JUNE 1963

REPORT NUMBER

7056-21-61

PREPARED BY

1 Buildings, structures, and facilities computed at acquisition (known or estimated) cost, and these figures are included in the Federal realty section of this report.

DEPARTMENT OF AGRICULTURE,  
Washington, D.C., October 4, 1963.

HON. WILLIAM L. DAWSON,  
Chairman, Committee on Government Operations,  
House of Representatives, Washington, D.C.

DEAR MR. DAWSON: In response to your letter of March 20, 1963, we enclose a tabulation showing by States the acreage and estimated evaluation of the public domain realty administered by this Department on June 30, 1963.

The various land transactions and statistical adjustments made by the Department during the fiscal year 1963 resulted in an increase of 16,865 acres and \$507,000 of value over the 1962 report.

We have adjusted previously reported valuations to reflect the land-ownership changes and other adjustments made during the fiscal year. Those shown in the table are our best estimates of the fair market value of the public domain land and timber under the Department's custody. These lands, of course, contain or contribute to other public values that are not readily appraisable and that are not included in this report, such as minerals, water, recreation, etc.

We hope these data will be helpful to the committee. If we can be of further assistance, please let us know.

Sincerely yours,

JOSEPH M. ROBERTSON,  
Administrative Assistant Secretary.

NOTE.—No change from the June 30, 1962, report.

U.S. DEPARTMENT OF THE INTERIOR,  
OFFICE OF THE SECRETARY,  
Washington, D.C., October 28, 1963.

HON. WILLIAM L. DAWSON,  
Chairman, Committee on Government Operations,  
House of Representatives, Washington, D.C.

DEAR MR. DAWSON: In accordance with your request of March 20, 1963, and our acknowledgment of March 25, 1963, enclosed are the following tabulations covering public domain properties as of June 30, 1963:

Table I: Estimated market value of public domain lands administered by the U.S. Department of the Interior, together with the amounts of land involved, average value per acre by State, and actual cost of the improvements on such land.

Table II: Cost of buildings on public domain land by predominant use.

Table III: Cost of structures on public domain land by predominant use.

Table IV: Changes in public domain withdrawals and restorations by Federal agencies during fiscal year 1963.

Table V: Mineral resources value of the public domain.

Also enclosed are reports by States, on GSA Form 1166, covering lands carried at zero value in the GSA real property inventory, as of June 30, 1963. All lands reported in this category are historical sites under the jurisdiction of the National Park Service.

Sincerely yours,

N. O. Wood, Jr.,  
Director of Management Operations.

TABLE V.—*Mineral resource<sup>1</sup> value of the public domain,<sup>2</sup> estimate of October 1963*

[In thousands of dollars]

State	Value <sup>3</sup>	Principal sources
Alabama.....	\$150	Oil and gas coal.
Alaska.....	196,000	Do.
Arizona.....	8,500	Oil and gas.
Arkansas.....	2,150	Do.
California.....	140,000	Oil and gas; potash; sodium.
Colorado.....	17,000	Oil and gas; coal; potash; sodium.
Idaho.....	8,170	Oil and gas; phosphate.
Kansas.....	5,370	Oil and gas.
Louisiana.....	6,450	Do.
Michigan.....	110	Do.
Minnesota <sup>4</sup> .....	2,900	Copper and nickel.
Mississippi.....	320	Oil and gas.
Montana.....	102,000	Oil and gas; coal; sodium; phosphate.
Nebraska.....	430	Oil and gas.
Nevada.....	7,520	Do.
New Mexico.....	488,000	Oil and gas; coal; potash; sodium.
North Dakota.....	7,550	Oil and gas; coal; sodium.
Oklahoma.....	5,370	Oil and gas; coal.
Oregon.....	130	Do.
South Dakota.....	4,340	Do.
Utah.....	188,000	Oil and gas; coal; potash; phosphate.
Washington.....	60	Oil and gas; coal.
Wyoming.....	766,000	Oil and gas; coal; sodium; phosphate.
Subtotal.....	2,116,520	
Outer Continental Shelf <sup>5</sup> .....	3,200,000	
<b>Total, United States.....</b>	<b>5,316,520</b>	

<sup>1</sup> For the purpose of establishing a "real estate" value of the public domain, mineral resource values are the capitalized value of income accruing to the Federal Treasury. This income is almost entirely derived from minerals subject to mineral leasing acts. Only negligible income is derived from minerals subject to location under the mining laws because they pass from Federal ownership upon discovery; before discovery, they have only speculative assignable value best reflected in the surface values. Building stone, sand and gravel, and similar materials subject to disposal under the materials act are also reflected in surface values.

<sup>2</sup> Includes lands transferred from the public domain excludes acquired lands.

<sup>3</sup> Predicated on present receipts from mineral leases, licenses, and permits taking into account probable future production and demand factors; capitalized (except where noted) as an annuity for 50 years at 4 percent compound interest and discounted to present value. Estimate of October 1963.

<sup>4</sup> Minnesota copper and nickel royalty estimates are capitalized as the present value, at 4 percent compound interest, of a 25-year annuity deferred 25 years.

<sup>5</sup> The Outer Continental Shelf estimate is preliminary, subject to change with production experience with litigation, and with technologic developments.

U.S. DEPARTMENT OF JUSTICE,  
BUREAU OF PRISONS,  
Washington, September 4, 1963.

HON. WILLIAM L. DAWSON,  
*House of Representatives,*  
*Washington, D.C.*

MY DEAR CONGRESSMAN DAWSON: In your letter of March 20, 1963, you requested certain information regarding public domain lands under the control of the Bureau of Prisons on all land, buildings, and facilities used in connection with Federal prison service operations. The following data are submitted in accordance with our inventory of June 30, 1963.

*U.S. Penitentiary, Alcatraz, Calif.*—The 22.5 acres of public domain land are valued at \$178,000. The buildings are presently valued at \$1,606,000 with other structures and facilities at \$406,000, making a total book value of \$2,190,000.

*Federal Reformatory, El Reno, Okla.*—The 3,669.5 acres of public domain land are valued at \$223,000. The buildings are presently valued at \$2,127,000 with other structures and facilities at \$277,000, making a total book value of \$2,627,000. The acreage shown represents an increase of 1,669.5 acres which were transferred from the Old Fort Reno Military Reservation on May 22, 1963.

*U.S. Penitentiary, Leavenworth, Kans.*—The 1,296.4 acres of public domain land are valued at \$188,000. The buildings are presently valued at \$4,678,000 with other structures and facilities at \$1,652,000, making a total book value of \$6,518,000. The acreage shown represents a decrease of 185.4 acres of land in the State of Missouri, as a result of a study and review by the Lands Division, Department of Justice, in their letter of March 7, 1963.

*Federal Prison Camp, Safford, Ariz.*—The 160 acres of public domain land are valued at \$2,000. The buildings are presently valued at \$315,000 with other structures and facilities at \$108,000, making a total book value of \$425,000.

The above values for public domain land were excluded from the 1963 General Services Administration report.

We trust the above information will assist your committee. Please advise if additional information is required.

Sincerely,

JAMES V. BENNETT, *Director.*

*Recapitulation, public domain properties, as of June 30, 1963*

Installation	Number of acres	Value of acreage	Value of buildings and facilities	Total value
U.S. Penitentiary, Alcatraz, Calif.-----	22.5	\$178,000	\$2,012,000	\$2,190,000
Federal Reformatory, El Reno, Okla.-----	3,669.5	223,000	2,404,000	2,627,000
U.S. Penitentiary, Leavenworth, Kans.-----	1,296.4	188,000	6,330,000	6,518,000
Federal Prison Camp, Safford, Ariz.-----	160.0	2,000	423,000	425,000
Total-----	5,148.4	591,000	11,169,000	11,760,000

POST OFFICE DEPARTMENT,  
ASSISTANT POSTMASTER GENERAL,  
BUREAU OF FACILITIES,  
*Washington, D.C., July 29, 1963.*

HON. WILLIAM L. DAWSON,  
*Chairman, Committee on Government Operations,  
House of Representatives, Washington, D.C.*

DEAR MR. CHAIRMAN: The Postmaster General has asked me to reply to your letter of March 20, 1963, requesting information on public domain properties under the control of the Post Office Department as of June 30, 1963.

I am pleased to submit the following information relative to the post office building at Yellowstone Park, Wyo., which is the only public domain property under the control of the Department:

Location: Yellowstone Park, Wyo.

Acres: 0.75.

Description: Land and building.

Land: \$2,000.

Building: \$132,000.

Total: \$134,000.

The above is the estimated present-day evaluation of the land and building.

The usage of space in this building is to house the post office, and the second floor is devoted to living quarters for the postmaster and dormitories for male and female postal employees.

Sincerely yours,

AMOS J. COFFMAN,  
*Acting Assistant Postmaster General.*

TREASURY DEPARTMENT,  
U.S. COAST GUARD,  
Washington, D.C., October 28, 1963.

Hon. WILLIAM L. DAWSON,  
*Chairman, Committee on Government Operations,  
House of Representatives, Washington, D.C.*

DEAR MR. CHAIRMAN: The data concerning present-day values of public domain properties under Coast Guard jurisdiction, as requested in your letter of March 20, 1963, are submitted herewith.

I hope that these data will be of use to your committee in the preparation of another Federal property inventory report.

Sincerely yours,

D. MCG. MORRISON,  
*Vice Admiral, U.S. Coast Guard,  
Acting Commandant.*

\* Usage codes describe the current predominant usage under each classification. Secondary usages not provided for in the inventory.

ADDITIONAL INFORMATION FOUND IN THE DETAILED LISTING	
E (excess)	- An "g" in the excess column means either a portion or all of any line entry is excess to the needs of the reporting agency.
E (estimated)	- An "g" shown after the cost figure indicates the absence of any recorded cost data. The estimate is based on costs at date of original acquisition by the Government, adjusted for subsequent capital changes.
Percent Occupied	- This column represents the percentage of the total building space in use by the Federal Government
OL (outleased)	- "OL" is shown in the percent occupied column, and is recorded when buildings or structures are outleased 100% by the Federal Government. If a portion is outleased, OL is not recorded.
N (negligible)	- An "N" shown in the Land column indicates land of less than one-tenth (0.1) acre. An "N" in the Cost column indicates cost of \$1 through \$499.

U.S. ATOMIC ENERGY COMMISSION,  
*Washington, D.C., October 25, 1963.*

Hon. WILLIAM L. DAWSON,  
*Chairman, Committee on Government Operations,  
House of Representatives.*

DEAR MR. DAWSON: Reference is made to your letter of March 20, 1963, requesting information as to the value of the public domain land used by the Atomic Energy Commission and the value of AEC-owned improvements thereon as of June 30, 1963.

Enclosed is a staff report with attachments furnishing the requested information.

Sincerely yours,

DWIGHT A. INK,  
*Assistant General Manager.*

U.S. ATOMIC ENERGY COMMISSION,  
*Washington, D.C.*

Subject: Present value of public domain land used by AEC and the present value of AEC improvements on such land.

Reference: Letter to the Chairman, AEC, from the chairman, House of Representatives Committee on Government Operations dated March 20, 1963, relating to the above subject.

Attached is a tabulation, by States, showing (1) the area, the value as of June 30, 1963, and the use of the public domain land controlled by the Atomic Energy Commission in connection with its operations, (2) the number, classification, and the value as of June 30, 1963, of buildings, and (3) the classification and value as of June 30, 1963 of other structures and facilities constructed on such land by the AEC. The statistical tabulation has been prepared on the basis of information furnished by field offices using public domain land in accordance with the following instructions:

1. Public domain. For the purpose of the report the term "public domain" was defined as that land within the continental United States, title to which was acquired by the United States of America by treaty, conquest, or cession from the Original Thirteen Colonies and such title is still vested in the United States.

2. Present value of public domain land. The values shown cover the surface land only. Our field offices were advised it was not desired that a formal appraisal be made of such surface land. The value of land reported for this year was based on valuations furnished informally by the Department of the Interior as to the estimated value of public domain lands in 1963. These current valuations, in general, represent the average of all classifications of land in a particular State.

3. Present value of buildings. The estimated present-day value for buildings and other structures and facilities was determined by taking the total net book cost as of June 30, 1963, for each classification reported and applying a ratio from the Engineering News Record for June 1963 to a corresponding Engineering News Record cost index

applicable at the time of construction. In general, this is a cost of reproduction less depreciation method of valuation.

General. When buildings and other structures and facilities were located on public domain land and non-public-domain land, effort has been made to prorate that portion on the public domain land. The value for buildings excludes the cost of equipment which is not capitalized as a part of the cost of the buildings.

*Alaska*

PUBLIC DOMAIN LAND

County	Acreage	Value	Usage
Point Hope, Tigera area, northwest..	<sup>1</sup> 96,000	<sup>2</sup> \$456,960	Ecological studies.

<sup>1</sup> This land has not been withdrawn by AEC from the public domain but is occupied under a use permit from the Assistant Secretary of Interior, dated June 8, 1961. Reduced from 1,272,000 acres by letter from Secretary of Interior dated Feb. 28, 1963.

<sup>2</sup> Value based at \$4.76 per acre.

*California*

PUBLIC DOMAIN LAND

County	Acreage	Value	Usage
Imperial.....	<sup>1</sup> 2,694.1	<sup>2</sup> \$197,855	Weapons testing.

<sup>1</sup> 24,461.5 acres withdrawn by Bureau of Reclamation administered by AEC. Entire facility declared excess to GSA May 29, 1961, and presently being utilized by the Department of the Navy under a use permit.

<sup>2</sup> Value based at \$73.44 per acre.

<sup>1</sup> Omitted from last year's report through error. These holdings are still in the Federal Aviation Agency's custody although they have been decommissioned and a request is now pending with the Bureau of Land Management for a withdrawal revocation.

GENERAL SERVICES ADMINISTRATION,  
Washington, D.C., October 25, 1963.

HON. WILLIAM L. DAWSON,  
Chairman, Committee on Government Operations,  
House of Representatives, Washington, D.C.

DEAR MR. CHAIRMAN: Enclosed is the tabulation of estimates of present-day values of public domain properties under the control of the General Services Administration, as of June 30, 1963, requested in your letter of March 15, 1963.

A review of General Services Administration's accounting records shows no land (other than public domain) recorded at zero or \$1 for accounting purposes.

The Government-wide real property data, requested in your letter, will be prepared in the same manner as last year and furnished to your committee no later than December 20, 1963.

Sincerely yours,

BERNARD L. BOUTIN,  
Administrator.

INTERNATIONAL BOUNDARY  
AND WATER COMMISSION,  
UNITED STATES AND MEXICO,  
*El Paso, Tex., October 21, 1963.*

HON. WILLIAM L. DAWSON,  
*Chairman, House of Representatives, Committee on Government Operations,  
1501 House Office Building, Washington, D.C.*

DEAR MR. DAWSON: We have enclosed in duplicate a detailed listing of the public domain properties under the jurisdiction of this section as of June 30, 1963, as requested in your letter of March 20, 1963.

This listing indicates the location, number of acres, usage of the properties, estimated value of facilities, (no buildings are involved), and estimated value of the land. There have been no transactions since last reporting to you.

It is a pleasure to assist your committee in the preparation of their Federal property inventory report.

Very truly yours,

J. F. FRIEDKIN, *Commissioner.*

## 476 FEDERAL REAL AND PERSONAL PROPERTY INVENTORY

Subtotal	19.33			2,277.25
NOTE.—Above 19.33 acres are at Morelos Dam on the Colorado River and were withdrawn for use of the Department of State in connection with Mexican Water Treaty of Feb. 3, 1944.				
Total, Rio Grande canalization and Morelos Dam.	2,389.87		26,023.00	13,458.25

## NOTES

All the above land is in the Rio Grande canalization project or is used as source of materials used on the project.

(E.O.F. Numbers) shown in location description are I.B. & W.C. file numbers.

The facilities shown were constructed by the project and are described as follows:

<sup>1</sup> 2,389.87 acres of public domain property are under jurisdiction of this section.

<sup>2</sup> River channel.

<sup>3</sup> River channel and river bank protected by rock.

<sup>4</sup> River channel, river bank protected by rock, and levee.

<sup>5</sup> Canyon diversion—channel and dike.

VETERANS' ADMINISTRATION,  
OFFICE OF THE ADMINISTRATOR OF VETERANS' AFFAIRS,  
*Washington, D.C., October 14, 1963.*

Hon. WILLIAM L. DAWSON,  
*Chairman, Committee on Government Operations, House of Representatives, Longworth Office Building, Washington, D.C.*

DEAR MR. CHAIRMAN: As requested in your letter of March 20, 1963, there is enclosed a list showing the desired information concerning public domain properties under the jurisdiction of the Veterans' Administration.

Sincerely,

W. J. DRIVER, *Deputy Administrator.*

*Public domain properties under jurisdiction of the Veterans' Administration,  
June 30, 1963*

TREASURY DEPARTMENT  
REGULATIONS  
RE FINANCIAL STATEMENTS

---

TREASURY DEPARTMENT  
FISCAL SERVICE  
Washington  
REGULATION RELATING  
TO THE SUBMISSION OF CERTAIN  
FINANCIAL STATEMENTS BY GOVERNMENT AGENCIES

1956  
Department Circular No. 966  
Supplement No. 1

Fiscal Service  
Bureau of Accounts

TREASURY DEPARTMENT,  
OFFICE OF THE SECRETARY,  
Washington, D. C., June 1, 1956.

*To Heads of Departments and Agencies and Others Concerned:*

The Treasury Department has been requested to furnish the Committee on Government Operations, House of Representatives, with information on properties and assets of the United States Government in connection with the committee's responsibilities for conducting a continuing study of the assets of the Government.

Accordingly, Department Circular No. 966, dated January 30, 1956, is amended as follows:

SCOPE

1. Paragraph 3 is amended by adding the following subparagraph d:

"d. Each executive agency and activity not included in the preceding subparagraphs."

PERIODIC REPORTS REQUIRED

2. The first sentence in paragraph 6 is amended to read as follows:

"Agencies responsible for the administration of corporate or noncorporate activities of the type specified in subparagraphs a, b, and c of paragraph 3 shall furnish all of the following periodic financial statements for each such activity whereas agencies referred to in subparagraph d or paragraph 3 are requested to furnish only the Statement of Financial Condition referred to in subparagraph a of this paragraph."

EFFECTIVE DATE

3. This supplement is effective immediately.

W. RANDOLPH BURGESS,  
*Acting Secretary of the Treasury.*

## TREASURY DEPARTMENT

INSTRUCTIONS UNDER SUPPLEMENT NO. 1, TREASURY DEPARTMENT  
CIRCULAR NO. 966

Relating to the submission of certain financial statements by Government agencies

## AUTHORITY FOR INSTRUCTIONS

1. These instructions are issued pursuant to Supplement No. 1, dated June 1, 1956, to Treasury Department Circular No. 966 of January 30, 1956, which requires all executive agencies not heretofore reporting under this regulation to furnish the Treasury Statements of Financial Condition.

## AGENCY LIAISON

2. All questions pertaining to the regulations or these instructions should be submitted to the Bureau of Accounts, Treasury Department.

## COVERAGE OF REPORTS

3. The reports required shall cover all programs and activities under the control of the agency reporting including those operations conducted in the Territories or overseas. Trust programs or activities will be reported separately and identified as such. Agencies maintaining accounts at the bureau level will submit individual bureau reports without consolidation. Assets and liabilities accounted for at the departmental level and not included in the individual bureau reports should be reported separately so that all assets of the department will be included.

## REPORTS REQUIRED

4. Executive agencies now reporting under Department Circular No. 966 will continue to do so in accordance with the provisions of the circular, and instructions issued pursuant thereto, except that an additional copy of the Statement of Financial Condition as of the end of each fiscal year and each schedule supporting such statement shall be submitted to the Treasury Department. All other appropriation and fund account activities not now being reported upon quarterly under Department Circular No. 966 shall be reported upon on a consolidated "Statement of Financial Condition," Standard Form 220, insofar as practicable, in accordance with the requirements of Section II of the instructions issued under Treasury Department Circular No. 966 with the following exceptions:

a. Supplemental schedules 1 through 5 supporting the Statement of Financial Condition will not be required. However, the supplementary statement indicating the basis of figures and special accounting practices required by paragraph 6 of the instructions shall be submitted for all activities and funds reported. Such supplementary statement may be furnished by November 1, if any agency finds that additional time is needed for its preparation.

b. In lieu of reporting "Net Investment" as required by paragraphs 30 through 34 of the instructions, line 68 may be used for reporting the amount of "Unexpended Appropriations" and line 69 may be used for reporting "Invested and Donated Capital" or its equivalent. Such titles shall be typed in.

c. It is recognized that some agencies, having primarily administrative-type activities may not yet have developed their formal accounting procedures to provide balance sheet types of financial statements. For such agencies only the "Asset" side of the Statement is required at this time. However, those agencies not reporting a complete "Statement of Financial Condition" should advise the Treasury as to the probable date that such Statements can be expected.

d. An original and one copy of each report shall be submitted to the Bureau of Accounts, Treasury Department, as of June 30 of each fiscal year as soon thereafter as possible but no later than the following September 30. Two additional copies should be prepared and submitted directly to the Bureau of the Budget.

#### LAND, STRUCTURES, AND EQUIPMENT

5. That part of paragraph 21 of the instructions relating to the reporting of buildings, structures, and facilities in process of construction is amended to add to the last sentence "and will be reported and so identified on line 36 of Form 220 rather than on lines 30 and 31."

#### SUPPLY OF FORMS

6. Standard Form 220 (Treasury Department Circular No. 966) will be used by reporting agencies and may be obtained through the supply facilities of the General Services Administration.

#### BASIS OF REPORTS

7. The monetary values reported shall be in accordance with the requirements of Department Circular No. 966 in all cases where accounts are maintained. Where accounts are not maintained such values may be determined from other records or on the basis of estimates according to the best information obtainable. When estimates are used in any line item "Est." shall be typed after the line title.

#### AGREEMENT WITH OTHER REPORTS

8. In all cases where similar information is being reported as of the same date to committees of Congress, other Government offices or agencies such as the Bureau of the Budget, the General Services Administration, or published in reports of the agency, care must be exercised by the reporting agency to insure agreement of the data submitted. As a specific example, the values reported for (1) land, (2) buildings, and (3) structures and facilities shall be determined in accordance with General Services Administration Circular No. 80, as supplemented, and must agree with the total of the reports rendered to that agency on an installation basis. For treatment of the costs of buildings, structures and facilities under construction not reported to the General Services Administration but included in this

report see paragraph 5 of these instructions. Those agencies reporting on public domain to the House Committee on Government Operations, should furnish a copy of each such report to the Treasury.

## EFFECTIVE DATE

9. These instructions shall be effective with the reports to be submitted as of June 30, 1956.

W. T. HEFFELFINGER,  
*Fiscal Assistant Secretary.*

TREASURY DEPARTMENT  
Washington

REGULATION RELATING TO THE SUBMISSION OF BUSINESS-TYPE  
FINANCIAL STATEMENTS BY GOVERNMENT CORPORATIONS AND  
CERTAIN UNINCORPORATED AGENCIES

1956  
Department Circular No. 966

Fiscal Service  
Bureau of Accounts

TREASURY DEPARTMENT,  
OFFICE OF THE SECRETARY,  
Washington, D. C., January 30, 1956.

*To Heads of Departments and Agencies and Others Concerned:*

## PURPOSE OF REGULATION

1. The financial statements and related information to be submitted under these regulations are required to furnish financial information for use by the Treasury Department in discharging its responsibility under the Budget and Accounting Procedures Act of 1950 for compilation of overall financial reports of the Government, and for use by the Bureau of the Budget in following through with the budgetary programs of the reporting agencies.

## AUTHORITY FOR REGULATION

2. This regulation is issued pursuant to Section 114 of the Budget and Accounting Procedures Act of 1950 (31 U. S. C. 66b) which authorizes the Secretary of the Treasury to require from agencies reports and information for the effective performance of his responsibility for preparing such reports for the information of the President, the Congress, and the public as will present the results of the financial operations of the Government. As authorized by said section, the regulation provides for the furnishing of such financial data as are required by the Director of the Bureau of the Budget.

## SCOPE OF REGULATION

3. This regulation requires the submission of financial statements by corporate and noncorporate Government agencies of the following character:

a. All wholly owned and mixed ownership Government corporations specifically included in the Government Corporation Control Act and amendments thereto, or subsequently brought under the provisions of that Act.

b. All other activities of the Government operating as revolving funds (accounts symbolized 4000-4999 and 8400-8499 by the Treasury Department), for which business-type public enterprise or intragovernmental fund budgets are required by the Bureau of the Budget.

c. Other activities or agencies (1) which are of a business-type nature; or (2) whose operations, services, or functions are largely self-liquidating or primarily of a revenue producing nature; or (3) whose operations result in the accumulation of substantial inventories, investments or other recoverable assets. Agencies and other activities to report under this category will be designated by the Fiscal Assistant Secretary of the Treasury.

## ISSUANCE OF INSTRUCTIONS

4. Financial statements and related information under this regulation shall be prepared and submitted by the agencies concerned, in the form and the manner prescribed in the procedural instructions issued by the Fiscal Assistant Secretary of the Treasury.

## WAIVERS

5. The Fiscal Assistant Secretary of the Treasury is authorized to waive the provisions of this regulation in whole or in part as to any agency or activity when it is determined that full compliance by such agency or activity is not necessary to accomplish the overall objective to obtain information required for the preparation of financial reports or for the purposes of the Bureau of the Budget.

## PERIODIC REPORTS REQUIRED

6. Agencies responsible for the administration of corporate or noncorporate activities of the type specified in paragraph 3 shall furnish for each such activity periodic financial statements, as follows:

a. A *Statement of Financial Condition* showing the assets, liabilities, and investments of the United States Government in the enterprise.

b. A *Statement of Income and Expense and Changes in Accumulated Net Income (or Deficit)* showing in condensed form the earnings or losses arising from operations and changes in accumulated net income (or deficit) for the fiscal year to the end of the reporting period.

c. A *Statement of Sources and Application of Funds* showing the manner in which funds have been applied to the acquisition of assets, to expenses, and to retirement of borrowings and capital; the manner in which funds have been provided by the realization

of assets, by income, by borrowings and capital contributions; and from which the net effect of such operations on the budget for the Government as a whole can be determined.

d. A *Statement of Long-range Commitments and Contingencies* containing a short description of the program and a statement showing the gross amount outstanding of loans guaranteed or insured by the reporting agency, insurance programs, obligations issued on credit of or guaranteed by the United States, long-range commitments and other contingent liabilities, and assets held as offsets to such liabilities.

#### ACCOUNTING SUPPORT FOR REPORTS

7. One of the principles upon which the Treasury Department is proceeding in connection with the responsibility for preparing central financial reports is that such reports should present fairly the financial condition and results of operations of the agencies as shown by their books and records. Hence, agencies shall furnish the Treasury Department with such information regarding the accounting basis for their reports submitted under this regulation, as may be required for proper evaluation of such reports.

#### EFFECTIVE DATE

8. This regulation, with the concurrence of the Director of the Bureau of the Budget, supersedes Budget-Treasury Regulation No. 3, dated September 1, 1944, and revised March 15, 1947, issued pursuant to Executive Order No. 8512 of August 13, 1940, as amended by Executive Order No. 9084 of March 3, 1942, and shall be effective with the period ending March 31, 1956.

W. RANDOLPH BURGESS,  
*Acting Secretary of the Treasury.*

#### TREASURY DEPARTMENT

#### FISCAL SERVICE

Washington

#### INSTRUCTIONS UNDER TREASURY DEPARTMENT CIRCULAR No. 966

Relating to the submission of business-type financial statements by Government corporations and certain unincorporated agencies

#### I. GENERAL

#### AUTHORITY FOR INSTRUCTIONS

1. These instructions are issued pursuant to Treasury Department Circular No. 966, issued under the authority contained in Section 114 of the Budget and Accounting Procedures Act of 1950 (31 U. S. C. 66b).

## SCOPE OF INSTRUCTIONS

2. These instructions explain the kinds of reports and other information to be furnished to the Treasury Department under the regulation; the periods of time to which the reports shall relate; and other reporting specifications, including information concerning accounting support of the data reported.

3. All questions pertaining to the regulations or these instructions should be submitted to the Bureau of Accounts, Treasury Department.

## KINDS OF REPORTS AND INFORMATION REQUIRED

4. The financial statements shall be submitted on the following standard forms:

Standard Form 220. Statement of Financial Condition

Standard Form 221. Statement of Income and Expense

Standard Form 222. Statement of Sources and Application of Funds

Standard Form 223. Statement of Long-range Commitments and Contingencies

The printed forms may be purchased through the General Services Administration. Supporting schedules to be submitted as hereinafter required should be prepared or reproduced on letter size (8 by 10½ inches) paper with appropriate title and references. Minus or "red" figures should be indicated by an asterisk (\*). A duly authorized officer of the reporting agency will sign the original Standard Form 221. The copies need not be signed but should bear the name of the signing officer.

5. Where there are several regional corporations or institutions in a financial system performing identical functions, such as the twelve banks of the Federal intermediate credit bank system, consolidated statements shall be prepared and submitted for the system. Separate statements for each regional corporation or institution are not required. Where a single fund operated by an unincorporated agency covers activities made up of unlike functions, agencies may be requested to submit separate statements on a program or functional basis.

6. Each item group reported on the Statement of Financial Condition and the Statement of Long-range Commitments and Contingencies submitted for the last quarter in each fiscal year, should be described, in reasonable detail, outlining the accounting principles followed in reporting each item group on these statements unless such descriptive material is included in annual reports of the agencies submitted under paragraph 8 below. The description of the item groups should cover such subjects as (1) nature of accounts, e. g., whether on a cash, accrual, or modified accrual basis; (2) basis of reporting, e. g., whether at cost or some other value; (3) methods used in determining and reporting allowances for losses; (4) extent of departure from the account classifications provided in the regulation; and (5) extent, if any, of departure in reporting from the preceding year. The descriptive matter should be presented in the same order in which the respective item groups appear in the statements.

*Reporting periods and distribution of statements*

Statement or schedule	Frequency	Original to Treasury	Two copies to Budget Bureau
<b>Forms:</b>			
Standard Form 220.....	Quarterly.....	X	X
Standard Form 221.....	do.....	X	X

3. Investments Other Than Public Debt Securities.....	Quarterly.....	X	X
4. Loans Receivable—Other Loans.....	do.....	X	X
5. Bonds, Debentures, and Notes Payable.....	do.....	X	X
Description of Items.....	Annually.....	X	X

The statements due quarterly as of the quarters ending September 30, December 31, March 31, and June 30 of each year shall be submitted on or before the 15th of the second month following those dates, except that all statements required at the fiscal year end should be submitted as soon as possible following the close of the fiscal year, but not later than the following September 30. Schedule 2—Investments in Public Debt Securities, provided for in paragraph 14f, shall be submitted each month within twenty days after the month for which it is rendered. The original of each statement and schedule shall be submitted to:

Report Preparation Branch  
Division of Central Reports  
Bureau of Accounts  
Treasury Department

Two copies of each statement indicated above for the Bureau of the Budget shall be submitted directly to that agency at the same time the originals are sent to the Treasury.

8. Any corporation or agency required to report under this regulation, which prepares an annual financial report for publication or general distribution outside the agency, shall furnish one copy thereof to the Division of Central Reports, Bureau of Accounts, Treasury Department and two copies to the Bureau of the Budget at the time the report becomes available for distribution.

## ACCOUNTING SUPPORT FOR REPORTS

9. As stated in the regulation, one of the principles upon which the Treasury Department is proceeding in connection with its responsibility for preparing central financial reports is that such reports present fairly the financial condition and results of operations of agencies, as shown by their books and records. The statements for the period ending June 30 should be in agreement with the corresponding statements submitted annually to the Bureau of the Budget for the last completed fiscal year, recognizing that the arrangement and grouping of items in accordance with the prescribed forms of this regulation may not provide a breakdown that is identical in all respects with that required for the corresponding Budget statements.

## EFFECTIVE DATE

10. These procedural instructions shall be effective with the reports to be submitted for the quarter ending March 31, 1956.

## II. STATEMENT OF FINANCIAL CONDITION

## GENERAL

11. The *Statement of Financial Condition (Standard Form 220)* will show in condensed form the assets, liabilities, investment of the United States Government, and other capital of each of the reporting corporations and enterprises. The items to be reported under each classification are described below with appropriate reference to the line number on Standard Form 220. For purposes of uniformity, reporting agencies will adhere to the group classifications provided. Certain group classifications contain blank lines for reporting items to be determined and titled by the reporting agency. Supporting detail for certain items shall be furnished in supplemental schedules as indicated. Other supplemental schedules in addition to those specified herein may on occasion be requested from selected reporting agencies.

12. *Interagency Items*.—Interagency receivables and payables representing amounts due to and from other Federal Government agencies on open accounts, notes, or similar indebtedness will be reported on the separate lines provided therefor under the appropriate asset and liability groups on the Statement of Financial Condition. Any reporting agency holding securities or a proprietary interest in the capital of another Government agency will report such holding under investments and include the same as a separate item in Schedule 3 (see paragraph 14f). Bonds, debentures, and notes payable of the reporting agency which are payable to other Government agencies shall be reflected on Schedule 5.

## REPORTING OF ASSETS

13. *Cash and Fund Balances*.—Report under this group cash belonging to the reporting agency or held for the account of others, including unexpended balances of funds made available by appropriation. Balances on deposit in banks and in the Treasury should be reflected on a basis of confirmed deposits and checks issued and consistent with the basis for determining unexpended balances of appropriations and funds in the Treasury central accounts. The itemization hereunder will show:

a. *Cash in banks (line 1)*.—Report on this line cash in commercial banks which is subject to withdrawal by the reporting agency for regular operations.

b. *Cash on hand and in transit (line 2)*.—Report on this line cash on hand. Imprest funds and advances with agent cashiers will be included only in cases where the amount of the initial advance was made from a commercial bank account or was treated as a reduction in the fund balance available with the United States Treasury. Imprest funds, advances to agent cashiers, and all other cash on hand not related to specific appropriations or funds but treated as part of the accountability of disbursing officers shall not be included. This item will also

include collections undeposited and deposits for which certificates of deposit have not been confirmed by depositaries as of the close of the period except where such amounts have been included in the accountability of disbursing officers.

c. *Fund balances with United States Treasury.*

(1) *Operating funds (line 3).*—Report on this line (a) amounts available in general, special, and revolving fund accounts including all amounts on deposit in corporation checking accounts with the Treasurer of the United States and on deposit with the Treasurer as special agent for the payment of matured principal and interest of bonds and debentures; and (b) unexpended balances of allocated working fund advances made to other agencies.

(2) *Trust and deposit funds (line 4).*—Report on this line balances of trust and deposit fund accounts which have been segregated as such under separate symbols in the Treasury and for which the liabilities are included on lines 46 and 47.

(3) *Allocations from other agencies (line 5).*—Report on this line unexpended balances of allocation and allocated working fund advances received from other agencies, regardless of the type of fund account from which advanced (consolidated reports prepared by the Treasury will eliminate this line together with the corresponding liability).

d. *Supplemental Schedule 1.*—A schedule showing the distribution by appropriation and fund account symbol of the amounts reported under "Cash and Fund Balances," by line item, will be presented in accordance with the format illustrated. In those instances where the statement covers only a single fund, the symbol of the fund may be shown in the stub for the appropriate line in lieu of submitting a separate schedule. Once each year, as of June 30, the amount of "Cash in banks" (line 1) will be itemized by bank, location, and amount in accordance with the format illustrated as Schedule 1a.

14. *Investments.*—Report under this group securities acquired and held for investment purposes. The itemization hereunder will show:

a. *Public debt securities (par value) (line 6).*—Report on this line the par value of investments in bonds, notes, bills or other public debt obligations issued by the United States.

b. *Securities of wholly owned Government enterprises (line 7).*—Report on this line investments in securities of wholly owned Government enterprises, including evidences of obligations, capital stock and paid-in surplus. Such securities shall be reported at par.

c. *Unamortized premium or discount (line 8).*—Report on this line the amount of unamortized premium (+) or discount (−) applicable to the securities reported on lines 6 and 7.

d. *Other securities (line 9).*—Report on this line all securities acquired and held for investment purposes other than those reported on lines 6 and 7 above. Such securities shall be reported at par, plus or minus unamortized premium or discount, if any.

e. *Allowance for losses (line 10).*—Report on this line the estimated losses on "Other securities" line 9.

f. *Supplemental Schedules 2 and 3.*—The supporting data for "Public debt securities (par value)" (line 6) will be prepared

monthly as illustrated by Schedule 2 and submitted each month within 20 days after the month for which it is rendered. Data supporting "Securities of wholly owned Government enterprises" (line 7) and "Other securities" (line 9) will be prepared *quarterly* to accompany the Statement of Financial Condition. The amounts of investments shown on line 7 shall be supported in detail in Schedule 3 showing for each issue, the name of the issuing agency, the date of the issue, the interest rate, the call and maturity dates, the par and book values, and whether guaranteed or not guaranteed by the United States. Investments reported on line 9 shall be shown on Schedule 3 itemized to show securities of mixed-ownership and Government-sponsored corporations separately from securities in other general classifications.

15. *Advances to Contractors and Agents.*—Report under this group the amount of unapplied advances outstanding with contractors or agents. The itemization hereunder will show:

a. *Government agencies (line 11).*—Report on this line advances made to other Government agencies net of the unexpended balances remaining in allocated working funds advanced to such agencies. (Since an advancing agency normally debits an advance account for the full amount of advances made, a reporting adjustment will be necessary at the end of each period transferring from this account to "Operating funds" line 3, an amount equal to the unexpended balance remaining in any allocated working fund held by the receiving agency. No such adjustment is necessary where the advance is made to a revolving fund or consolidated working fund.)

b. *Other (line 12).*—Report on this line the balance of advances made to private contractors and other individuals, except where such advances are included in the accountability of a disbursing officer.

16. *Accounts and Notes Receivable.*—Report under this group accounts and notes receivable. Notes receivable under this item normally should include only those short-term notes that have been accepted in liquidation of open accounts as distinguished from loans made in connection with authorized lending programs which should be reported under "Loans Receivable." The itemization hereunder will show:

a. *Government agencies (line 13).*—Report on this line receivables due from other Government agencies, exclusive of advances which are to be reported on line 11 above.

b. *Other (line 14).*—Report on this line the amount of accounts and notes receivable due from other than Government agencies, exclusive of advances which are to be reported on line 12 above.

c. *Allowance for losses (line 15).*—Report on this line the estimated losses on "Accounts and Notes Receivable—Other."

17. *Inventories.*—Report under this group inventories purchased, produced or acquired by forfeiture of loan collateral or donation. The itemization hereunder will show:

a. *Commodities for sale, finished goods, etc. (line 16).*—Report on this line commodities, completed work not yet delivered or finished goods available for sale or delivery though sometimes used by the reporting agency.

b. *Work-in-process (line 17).*—Report on this line the value of work-in-process.

c. *Materials and supplies (line 18).*—Report on this line supplies or materials to be used in the manufacture of a finished product or charged to expense when used. (Supplies normally charged to expense at time of purchase shall not be included.)

d. *Allowance for losses (line 19).*—Report on this line the estimated losses which may be realized on the disposition of the above inventories.

18. *Accrued Interest Receivable.*—Report under this group accrued interest receivable. The itemization hereunder will show:

a. *On public debt securities (line 20).*—Report on this line the amount of accrued interest receivable on direct obligations of the United States issued by the Treasury. The accrual should be computed on the same basis that the Treasury Department computes the accrued interest liability, as set forth in Treasury Department Circular No. 300, Revised, dated April 30, 1955.

b. *On securities of other agencies (line 21).*—Report on this line accrued interest on securities of other Government agencies. This item would include interest on obligations issued by other Government agencies whether guaranteed or not guaranteed by the United States.

c. *Other (line 22).*—Report on this line all accrued interest receivable not reported on lines 20 and 21.

19. *Loans Receivable.*—Report in this group the balance of outstanding loans receivable made, purchased or acquired by rediscount. The amounts reported hereunder will include matured and unmatured principal; extensions, and advances to borrowers. Deposits of borrowers held subject to refund or disbursement on behalf of the borrowers will be reported under the group "Trust and Deposit Liabilities." The itemization hereunder will show:

a. *Government agencies (line 23).*—Report on this line loans to Government agencies, which will usually be evidenced by notes receivable or other similar obligations.

b. *Other (line 24).*—Report on this line loans to other than Government agencies made pursuant to authorized lending programs of the agency. The amount of other loans will be supported by supplemental Schedule 4, showing the following information:

(1) *Loans to aid agriculture.*—Report under this item loans to farmers and to institutions whose primary purpose is to aid agriculture. In this classification will be included loans to agricultural credit corporations; cooperative associations; crop, livestock, and commodity loans; farm mortgage loans; and similar loans.

(2) *Loans to aid homeowners.*—Report under this item loans to homeowners and to institutions whose primary purpose is to aid homeowners. In this classification will be included mortgage loans; reconditioning loans; loans to savings and loan associations; and similar loans.

(3) *Loans to aid industry.*—Report under this item loans to industrial and commercial enterprises. In this classification will be included loans to railroads, manufacturing con-

cerns, and public utilities; ship construction and reconditioning loans; and similar loans.

(4) *Loans to aid States, Territories, etc.*—Report under this item loans to public bodies, such as States, Territories, possessions, municipalities, and similar governmental subdivisions.

(5) *Loans to aid financial institutions.*—Report under this item loans to general financial institutions such as banks, insurance companies, loan companies, and other similar financial institutions.

(6) *Foreign loans.*—Report under this item loans to foreign governments and private entities in foreign countries.

(7) *Other loans.*—Report under this item loans which cannot be appropriately classified under any of the previous loan classifications.

c. *Allowance for losses (line 25).*—Report on this line the estimated losses on "Loans Receivable—Other" (line 24).

20. *Acquired Security and Collateral.*—Report under this item real estate and other mortgage property and pledged collateral acquired and held for sale, including real estate acquired subject to redemption. This acquired security or collateral should be reported net of prior mortgages or liens not assumed. Where the reporting agency has assumed any mortgages or liens in connection with the acquisition of security or collateral, the value of such assets will be reported gross and the mortgage or lien assumed will be reported under "Other Liabilities" (line 52 or 53).

a. *Real estate (line 26).*—Report on this line real estate, including improvements, acquired in the liquidation of loans.

b. *Other (line 27).*—Report on this line other types of security and collateral acquired in the liquidation of loans where the collateral acquired is not commingled in the accounts of the agency with similar items purchased.

c. *Allowance for losses (line 28).*—Report on this line the estimated losses on "Acquired Security and Collateral."

21. *Land, Structures, and Equipment.*—Report under this group the cost of real and personal property acquired by purchase, donation or other methods of acquisition. Residential and farm properties, and other real estate and improvements acquired through foreclosure incident to a lending operation or other Federal-aid projects will not be reported in this section but will be included on line 26. Real property shall be determined for lines 29, 30, and 31 in accordance with General Services Administration Circular No. 80, as supplemented, except that buildings, structures and facilities in process of construction shall be included whether or not "available for service" as of the reporting date.

Line 32 "Leasehold improvements" shall include the cost of easements, rights-of-way, and leasehold improvements to land, buildings, or structures, and facilities occupied by the Government as lessee. However, cost of Government-owned buildings, structures, and facilities located on leased land shall be included on lines 30 and 31 as appropriate.

Line 33 "Machinery and equipment" shall include the cost of machinery and processing equipment, motor vehicles, office machinery, furniture, etc.

Accumulated depreciation (line 34) should represent the amount of depreciation (including amortization of leasehold improvements) applicable to the properties listed which has been charged to costs or depreciation expense.

22. *Other Assets*.—Report under this group all other assets which cannot be properly classified under any of the previous asset groups. Real estate or instalment sales contracts, purchase money mortgages, and similar long-term paper acquired in the sale of acquired security or collateral or other owned property will be reported under this group.

a. *Deferred and undistributed charges (line 35)*.—Report on this line prepaid expenses, unamortized discount on bonds or debentures issued and outstanding and other deferred charges applicable to the operations of future periods as well as debits arising from disbursements or other charges, the distribution or final disposition of which has not been made.

b. *Blank lines (lines 36 and 37)*.—Report on these lines, with appropriate descriptive titles, any other assets which cannot be properly classified under any of the previous asset groups.

c. *Allowance for losses (line 38)*.—Report on this line the estimated losses on "Other Assets."

#### REPORTING OF LIABILITIES

23. *Accounts Payable*.—Report under this group accounts payable consisting of amounts owed to creditors on open account (including voucher schedules not yet accomplished by disbursing officers). The itemization under this group will show:

a. *Government agencies (line 40)*.

b. *Other (line 41)*.

24. *Accrued Liabilities*.—Report under this group accrued interest and other accrued liabilities. Insofar as practicable, similar liabilities which have matured should be reported under "Accounts Payable." The itemization hereunder will show:

a. *Government agencies (line 42)*.—Report on this line accrued liabilities due Government agencies including accrued interest due the Treasury.

b. *Other (line 43)*.—Report on this line all other accrued liabilities, including interest on obligations issued to the public.

25. *Advances from*.—Report under this group the amount of unapplied advance payments received for goods or services to be furnished by the reporting agency. The itemization hereunder will show:

a. *Government agencies (line 44)*.—Report on this line the amount due Government agencies for advance payments received, including any unliquidated liability for goods and services in connection with an advance of funds under section 601 of the Economy Act or similar legislation (regardless of the type of fund from which advanced).

b. *Other (line 45)*.—Report on this line all other liabilities arising from advance payments for goods and services.

26. *Trust and Deposit Liabilities*.—Report under this group the liabilities for amounts held in trust or on deposit (including the unexpended balances of trust fund appropriations) covering such items as cash collateral, proceeds of loans held for the borrowers, time and demand deposits, withholding tax and United States savings bond

deductions, undeposited general fund receipts, and other deposits held subject to refund or application. The itemization hereunder will show:

a. *Government agencies (line 46).*—Report on this line the trust and deposit liabilities due Government agencies, including such items as withheld Federal taxes and undeposited general fund receipts.

b. *Other (line 47).*—Report on this line all other trust and deposit liabilities not recorded under line 46.

27. *Bonds, Debentures, and Notes Payable.*—Report under this group the par value of all outstanding bonds, debentures, notes, and other obligations of a similar character held by the public or other Government agencies (other than the Treasury). The itemization hereunder will show:

a. *Government agencies (line 48).*—Report on this line bonds, debentures, notes, etc., issued to other wholly owned Government corporations and agencies (other than the Treasury). Borrowings from the Treasury are to be reported under "United States Interest."

b. *Other (line 49).*—Report on this line bonds, debentures, notes, etc., issued to other than wholly owned Government corporations and agencies. All marketable obligations shall be reported here even though a portion may have been acquired by another Government agency.

c. *Supplemental Schedule 5.*—Information on the balances reported on these lines will be submitted as illustrated on supplemental Schedule 5 "Bonds, Debentures, and Notes Payable" showing the character, date of issue, the interest rate, the call and maturity dates, the par value of each issue outstanding and whether guaranteed by the United States. The fact that another Government agency may own marketable obligations issued to the public by the reporting agency need not be reported.

28. *Other Liabilities.*—Report under this group deferred and undistributed credits and on the blank lines provided, with appropriate descriptive titles, all liabilities which cannot be properly classified under any of the other liability groups.

a. *Deferred and undistributed credits (line 50).*—Report on this line deferred income, unamortized premium on bonds or debentures issued and outstanding and other credits applicable to operations of future periods as well as items arising from receipts or other credits, the distribution or final disposition of which has not been made.

b. *Accrued annual leave (line 51).*—Report on this line the amount of unpaid annual leave which has been charged to cost.

c. *Blank lines (lines 52 and 53).*—Items relating to loans receivable discounted with recourse, and guaranteed loans or other agreements of a guaranteed nature which are subject to redemption by the reporting agency at the option of the holder should be reported here. Any other liabilities which cannot be classified under any other liability group shall be reported here with appropriate descriptive title.

29. *Reserves.*—Report on blank lines 54 and 55 operating reserves established for deferred maintenance, liability reserves, reserves established for the benefit of equity holders and other similar special reser-

uations of earnings not classified as part of the "Accumulated net income or deficit" of the enterprise.

#### REPORTING OF NET INVESTMENT—PRIVATE INTEREST

30. *Private Interest*.—Report under this group the amount of capital provided from non-governmental sources and the accumulated income or deficit applicable thereto. The par value of the capital stock held by the public will be reported on line 57, and the accumulated net income or deficit, segregated as between reserved and unreserved, on lines 58 and 59.

#### REPORTING OF NET INVESTMENT—UNITED STATES INTEREST

31. *Interest-Bearing Investment*.—Report under this group capital stock, paid-in capital, paid-in surplus, advances from revolving funds, bonds, notes, or other capital items provided directly by the United States Treasury or through other Government agencies where interest is payable, without regard to earnings, to the Treasury or other Government agencies on such capital investment items. The itemization hereunder will show:

a. *Capital stock (line 60)*.

b. *Borrowings from Treasury (line 61)*.—Report on this line borrowings from Treasury represented by notes, bonds, or any other means of borrowing. The amount of unused borrowing authority remaining available shall be reported as a footnote.

c. *Blank line (line 62)*.—Report on this blank line, with appropriate title, any additional items necessary to reflect the proper total interest-bearing investment of the United States Government, including advances from revolving funds, paid-in capital, paid-in surplus, etc. The title "Paid-in capital" or "Paid-in surplus" shall be used only for those items of Government investment specifically identified as such in the legislation authorizing the capitalization. Where a portion of the capital made available by Congress for an item reported on this line is retained by the Treasury in a separate revolving fund or other holding account, the gross amount remaining available shall be reported as a footnote.

32. *Non-interest-bearing investment*.—Report under this group capital stock, paid-in capital, paid-in surplus, advances from revolving funds, bonds, notes, appropriations, or other capital items, which are non-interest bearing, provided directly by the United States Treasury or through other Government agencies, including the capitalization of assets. The itemization hereunder will show:

a. *Capital stock (line 63)*.

b. *Borrowings from Treasury (line 64)*.—Report on this line borrowings from Treasury represented by notes, bonds, or any other means of borrowing. The amount of unused borrowing authority enacted by the Congress shall be reported as a footnote.

c. *Appropriations*.—Report under this group the cumulative amounts made available through congressional appropriations to finance the activity being reported upon, net of appropriation balances rescinded, transferred to "Payment of Certified Claims" or otherwise returned to the Treasury. Agencies operating from

other than revolving funds will show on blank lines 65 and 66 a segregation of appropriations as between the amounts expended and unexpended. Revolving fund enterprises may use blank line 66 for reporting the amount of appropriated funds repaid to the Treasury as a capital transfer in those instances where such presentation is required.

d. *Capitalization of assets (line 67).*—Report on this line the net amount derived through recognition of the capitalized value of property, inventory, and other assets on hand at the inception of the fund, donated to the reporting agency or charged to appropriations other than those included in amounts reported on line 65 or 66 above.

e. *Blank lines (lines 68 through 70).*—Report on these lines with appropriate titles any other segregation of the investment of the Government which by statute or otherwise is required for full disclosure, including advances from revolving funds, paid-in capital, paid-in surplus, etc. The titles "Paid-in capital" or "Paid-in surplus" shall be used only for those items of Government investment specifically identified as such in the legislation authorizing the capitalization. Where a portion of the capital made available by Congress for an item reported on this line is retained by the Treasury in a separate revolving fund or other holding account, the amount so retained shall be reported as a footnote.

33. *Accumulated Net Income or Deficit.*—Report under this group the accumulated earnings or losses applicable to the "United States Interest," segregated as between reserved earnings as required by statute or otherwise and unreserved earnings or deficit. The itemization hereunder will show:

a. *Non-revenue producing operations (line 71).*—Report on this line as a deficit (\*) item the cumulative net expenses incurred for any programs set up by law to be non-revenue producing and not associated or identified with the regular revenue producing services provided by the agency.

b. *Reserved (line 72).*—Report on this line the reserves which are established by statute or otherwise from annual earnings. Normally direct charges should not be made to such reserves for losses incurred; such losses should be reflected in the income and expense statement.

c. *Unreserved (line 73).*—Report on this line the cumulative deficit or unreserved surplus resulting from operations.

34. *Deposit of General and Special Fund Revenues (line 74).*—Those enterprises which are not permitted to reuse or hold their receipts but are required to deposit their collections into the Treasury as miscellaneous receipts shall report the cumulative amount of such deposits on this line as a deduction from the investment of United States Interest. This will apply only to enterprises that are financed by other than revolving funds.

GSA REGULATIONS  
RE REAL PROPERTY  
MANAGEMENT

---

---

GENERAL SERVICES ADMINISTRATION

Transmittal Letter No. 2-30

Washington 25, D. C.

November 8, 1960

---

REGULATIONS OF THE GENERAL SERVICES ADMINISTRATION  
TITLE 2, REAL PROPERTY MANAGEMENT

---

To: Heads of Federal Agencies

1. Material Transmitted

Transmitted herewith are new Chapter XI, Annual Real Property Inventories; Exhibits 9, 9a, 10, 10a, 11, 11a, 11b, 12, and 12a, Appendix B; and revised page 10 and new page 12 of the Table of Contents, Title 2, Real Property Management, Regulations of the General Services Administration.

These regulations are a reissuance in codified form of instructions, heretofore prescribed in General Services Administration Circular No. 80, Revision No. 3, dated June 6, 1958.

2. Nature of Changes

The principal changes in the instructions heretofore in effect are as follows:

GSA Form 1166, Annual Report of Real Property Owned by the United States, and related instructions (Exhibits 9 and 9a, Appendix B, blocks 11, 17, and 23) and GSA Form 1166A, Annual Report of Real Property Leased to the United States, and related instructions (Exhibits 11 and 11a, Appendix B, blocks 11, 14, and 18) provide for an additional predominant usage classification of "research and development" for land, buildings, and other structures and facilities; and additional usage classifications of "airfield pavements"; "service"; "navigation and traffic aids"; and "trust structures and facilities" for other structures and facilities.

Other changes are: (a) the terminology "life interest" is changed to "long-term interest"; (b) land of less than 0.1 acres and costs from \$1 through \$499 shall be reported as "N" (negligible) rather than "0"; (c) reports for installations located in more than one county shall not show any city identification; and (d) the addition of a total of 7 cities in Alaska, Hawaii, Maryland, and Virginia to the list of major cities (Exhibit 11b, Appendix B).

3. Supplies of Forms

The September 1960 editions of GSA Forms 1166, 1166A, 1209, and 1209A may be obtained after April 1, 1961, from:

General Services Administration Region 3  
Office of Regional Administrative Assistant  
Reproduction and Distribution Division  
General Services Regional Office Building  
Washington 25, D. C.

4. Inquiries

For additional information regarding the content of Chapter XI, or any questions or problems relating thereto, agency representatives may communicate with the General Services Administration, Office of Comptroller, Washington 25, D. C., telephone: Government dial code 183, extension 4131.

5. Rescissions

General Services Administration Circular No. 80, Revision No. 3, dated June 6, 1958, is hereby superseded.

## CHAPTER XI ANNUAL REAL PROPERTY INVENTORIES

## PART 1 GENERAL PROVISIONS

## SECTION 101.00 GENERAL

101.01 Scope. This Chapter prescribes the policies and methods governing the preparation of annual reports necessary for the maintenance and publication of inventories of real property owned by and leased to the United States as of June 30, each year.

101.02 Background. The inventory of Federal real property was initiated and is being continued at the request of the Senate Committee on Appropriations.

The House Committee on Government Operations annually requests data on all federally owned real property for inclusion in its real and personal property inventory reports.

101.03 Program Objectives. The principal objectives of the Government-wide real property inventory program are:

- a. To provide a centralized source of information on Federal real property holdings;
- b. To achieve the most effective control and economical Government-wide utilization of available property;
- c. To facilitate disposal of surplus property;
- d. To provide a basis for the intelligent evaluation and appraisal of budgetary requirements; and
- e. To establish a ready reference for answering inquiries from the Congress; the press; trade associations; educational institutions; Federal, State, and local government agencies; and the general public.

101.04 Coverage. The inventory reports prescribed in this Chapter shall cover land, buildings, and other structures and facilities throughout the world, which are owned by or leased to the United States, including wholly owned Federal Government corporations.

101.05 Source of Data. Data reported shall be based on agency real property and accounting records.

GSA Reg. 2-XI-101.06  
(11-8-60)

101.06 Agency Liaison. Each reporting agency shall designate an official to serve as agency representative for each of the real property inventories. The same representative may be designated for the federally owned and leased real property inventories. General Services Administration, Office of Comptroller, Washington 25, D. C., shall be advised in writing of the names of all such representatives and subsequent changes.

GSA Reg. 2-XI-201.01  
(11-8-60)

PART 2 REPORTING OF REAL PROPERTY OWNED BY AND  
LEASED TO THE UNITED STATES

SECTION 201.00 ANNUAL REPORTS - REAL PROPERTY OWNED BY  
THE UNITED STATES

201.01 Reporting Agency. Reports on real property owned by the United States shall be submitted by the agency responsible for the maintenance of real property records and accounts as prescribed by GAO principles and standards and illustrated in 2 GAO 1270 and 2 GAO 7030; i.e., the agency which has control of and the authority to assign and reassign the use of the property or any portion thereof. For purposes of this inventory, the above rule shall apply regardless of the manner of acquisition or which agency is currently using the property. For example:

For general purpose buildings, such as office buildings or warehouses, which are occupied by a Federal agency or agencies upon determination by GSA, and for which GSA is responsible for elevator and guard service, and for cleaning and maintenance, GSA is the reporting agency.

For special purpose buildings, such as Coast Guard stations, military reservations, hospitals, and prisons, those agencies having control of building management and operation including authority to assign or reassign space in such buildings, will be considered as the reporting agencies.

201.02 Coverage. The annual reports of real property owned by the United States shall cover land, buildings, and other structures and facilities owned by the United States throughout the world. These reports shall include the following:

- a. Unreserved public domain lands;
- b. Public domain lands reserved for national forests, national parks, military installations, or other purposes;
- c. Real property acquired by purchase, construction, donation, and other methods;
- d. Real property in which the Government has a long-term interest considered by the reporting agency as being equivalent to ownership;
- e. Buildings or other structures and facilities owned by the Government whether or not located on Government-owned land;

GSA Reg. 2-XI-201.03  
(11-8-60)

- f. Excess and surplus real property. (The reporting agency, as defined in GSA Reg. 2-XI-201.01, shall continue to retain accountability and report excess and surplus real property pending its transfer to a Federal agency or disposal); and
- g. Buildings being acquired under the terms of the Public Buildings Purchase Contract Program or Lease Purchase Agreements (Public Law 519, 83rd Congress, as amended). Buildings shall be reported upon completion of construction.

Separate annual reports shall also be submitted for real properties held in trust by the Federal Government.

201.03 Exclusions. Annual inventory reports on real property owned by the United States shall not include the following:

- a. Properties acquired through foreclosure, confiscation, or seizure to be liquidated in settlement of a claim or debt to the Federal Government;
- b. Rights-of-way or easements granted to the Government;
- c. Sovereign-owned lands of the governments of the various United States territories and possessions;
- d. Lands administered by the United States under trusteeship by authority of the United Nations;
- e. Machinery and processing equipment which are not part of the realty; and
- f. Land held under permit from another Government agency.

201.04 Reports to be Submitted.

- a. Each agency shall prepare in accordance with instructions in Exhibit 9a, Appendix B, and submit to the Administration a separate report on GSA Form 1166, Annual Report of Real Property Owned by the United States (Exhibit 9, Appendix B), for:
  - 1. Each newly acquired or previously omitted installation;
  - 2. Each installation received by transfer from another Federal agency which is not merged with an existing installation;
  - 3. Each installation with increases or decreases in cost of \$1,000 or more affecting any line item or the total for the installation;

GSA Reg. 2-XI-201.05  
(11-8-60)

4. Each installation declared excess or surplus, in whole or in part;
  5. Each disposal of a complete installation; and
  6. Each installation for which a revision of an entry on a previous report is necessary to reflect a change in the name of an installation, date or method of acquisition of property, acreage, number and/or floor area of buildings, or predominant usage category of land, buildings, or other structures and facilities.
- b. Each agency shall prepare, in accordance with instructions in Exhibit 10a, Appendix B, and submit to the Administration a separate report on GSA Form 1209, Summary of Number of Installations Owned by the United States (Exhibit 10, Appendix B), for each bureau or other major organizational unit, for (1) properties in the United States; and (2) properties outside the United States.

Reports on GSA Form 1209 shall be submitted whether or not changes have occurred since the previous report.

201.05 Optional Reporting Method. Agencies with electrical accounting machine equipment may make arrangements with General Services Administration, Office of Comptroller, to furnish detailed machine listings together with the supporting punch cards, in lieu of GSA Forms 1166. However, GSA Forms 1209 shall be submitted as prescribed in section 201.04b.

201.06 Preparation and Due Dates. The annual inventory reports prescribed in section 201.04 shall be prepared as of June 30, each year. An original and one copy of each report shall be submitted to General Services Administration, Office of Comptroller, Washington 25, D. C., not later than September 1.

GSA Reg. 2-XI-202.01  
(11-8-60)

SECTION 202.00 ANNUAL REPORTS - REAL PROPERTY LEASED TO  
THE UNITED STATES

202.01 Reporting Agency. Reports on real property leased to the United States shall be submitted by the agency currently administering the lease and making payments to the lessor, regardless of which agency executed the original lease or is currently using the property.

202.02 Coverage. The annual report of real property leased to the United States shall include all real property leased from private individuals, organizations, and municipal, county, State, territorial, and foreign governments, as evidenced by a written agreement involving a monetary consideration and a **landlord-tenant relationship**. It shall also include right of use and occupancy obtained under eminent domain proceedings or equivalent procedures.

Real property leased rent free or for nominal rental may be included when the property is considered significant by the reporting agency. 35 Comp. Gen. 713 is suggested as a guide to help resolve questions pertaining to the definition of "nominal payment."

202.03 Exclusions. Items to be excluded from the annual reports are: (a) real property occupied under permit or other arrangements with other Federal agencies or wholly owned Federal Government corporations; (b) leasehold improvements (Government-owned buildings or structures located on leased land shall be reported as owned); (c) rights-of-way and easements; and (d) real property leased rent free or for nominal rent when property is not considered significant by the reporting agency.

202.04 Reports to be Submitted.

- a. Each agency shall prepare, in accordance with instructions in Exhibit 11a, Appendix B, and submit to the Administration a report of its leased real property holdings on GSA Form 1166A, Annual Report of Real Property Leased to the United States (Exhibit 11, Appendix B).
- b. Each agency shall prepare, in accordance with instructions in Exhibit 12a, Appendix B, and submit to the **Administration a separate report** on GSA Form 1209A, Comparative Summary of Properties Leased to the United States (Exhibit 12, Appendix B), for each bureau or other major organizational unit, for: (1) properties in the United States; and (2) properties outside the United States.

202.05 Optional Reporting Method. Agencies with electrical accounting equipment may make arrangements with General Services Administration, Office of Comptroller, to furnish detailed machine listings, together with the supporting punch cards, in lieu of GSA Forms 1166A. However, GSA Forms 1209A shall be submitted as prescribed in section 202.04b.

GSA Reg. 2-XI-202.06  
(11-8-60)

202.06 Preparation and Due Dates. The annual inventory reports prescribed in section 202.04 shall be prepared as of June 30, each year. An original and one copy of each report shall be submitted to General Services Administration, Office of Comptroller, Washington 25, D. C., not later than October 1.

Exhibit 9a, Appendix B  
GSA Reg. 2-XI-201.04  
(11-8-60)

INSTRUCTIONS FOR THE PREPARATION OF GSA FORM 1166,  
ANNUAL REPORT OF REAL PROPERTY  
OWNED BY THE UNITED STATES

1. General Instructions.

GSA Form 1166, Annual Report of Real Property Owned by the United States (Exhibit 9, Appendix B) shall be used by agencies to report their real property holdings, as defined in GSA Reg. 2-XI-201.00.

Agencies obtaining approval from the Administration may use the "optional method of reporting," in lieu of GSA Form 1166 (GSA Reg. 2-XI-201.05).

Reports shall be prepared annually as of June 30, and an original and one copy of each submitted to the Administration not later than September 1.

For purposes of this inventory, the reporting entity shall be an installation. An installation may consist of land, buildings, other structures and facilities, or any combination thereof. Installations may vary in size and may be a national forest, national park, hydroelectric project; or, on the other hand, may be a single office or warehouse building, or an unimproved site. The determination as to the real property to be included in an installation shall be made by the reporting agency. However, it shall be in conformance with the agency's real property and accounting records.

In the case of an installation located in more than one State, the portion located in each State shall be treated as a separate installation and made the subject of a separate report.

A complete report covering the entire installation shall be submitted for:

- a. Each newly acquired or previously omitted real property installation;
- b. Each transfer of an installation from another Federal agency which is not merged with an existing installation; and
- c. Each previously reported installation having an increase or decrease of \$1,000 or more, affecting any line item or total cost for the installation; or for a change in acreage, irrespective of cost. A complete report shall also be submitted for changes in the number and/or floor area of buildings and predominant usage category of land, buildings, or other structures and facilities.

Exhibit 9a, Appendix B  
GSA Reg. 2-XI-201.04  
(11-8-60)

In the case of item c. above, the adjusted report shall be a complete restatement, giving effect to all realty changes involving the installation, such as; acquisitions, dispositions, new construction, and correction of errors or omissions in the previous report.

A report, requiring no entries for Blocks 11 through 25 on GSA Form 1166, shall be submitted for:

- a. Disposal of a complete installation;
- b. Transfer of a complete installation to another Federal agency;
- c. An installation declared excess or surplus, in whole or in part (the reporting agency, as defined in GSA Reg. 2-XI-201.01, shall continue to retain accountability and report excess and surplus real property pending its transfer to a Federal agency or disposal); and
- d. Revision of the name of an installation or of the date or method of acquisition of the real property.

An appropriate notation regarding the above transactions or revisions shall be made in Block 26, Remarks.

A report shall not be submitted for a previously reported installation in which no change has occurred.

## 2. Specific Instructions.

### a. Date, Agency, and Property Identification.

Block 1. Report as of. Enter the effective date of the report.

Block 2. Agency Control No. For identification purposes, each reporting agency may assign an agency control number to each installation.

Block 3. GSA Control No. The GSA Control Number consists of two parts, separated by a dash. The first part, comprised of four digits, is the agency-bureau code, while the second part, comprised of five digits, is the installation number. These control numbers are assigned by the Administration.

Exhibit 9a, Appendix B

GSA Reg. 2-XI-201.04

(11-8-60)

The reporting agency shall fill in the GSA Control Number for previously reported installations. Enter the same control number shown on the latest machine listings of installations furnished to each reporting agency by the Administration. Use all nine digits, e.g., 1413-07984; not 1413-7984. It is essential that this GSA Control Number be filled in by the reporting agency so that the current report can be identified with the corresponding report previously submitted.

When an installation is reported for the first time, this block shall not be filled in by the reporting agency.

- Block 4. Name of Installation. Enter the name assigned to the installation; such as, U. S. Customs House, Fort Bragg, or Rock Island Arsenal. When an installation is located in more than one State, a separate report is required to cover the portion of the installation located in each State.

Abbreviate the name of the property, when necessary, so that it shall not exceed 23 type spaces, including blank spaces between letters or words. For example: "Yellowstone National Park" which has 25 type spaces may be abbreviated "Yellowstone Nat Park."

- Block 5. Reporting Agency. Enter the name of the reporting agency, that is, the department, commission, administration, or authority. For example: Department of Commerce, Atomic Energy Commission, Veterans Administration, or Tennessee Valley Authority.

- Block 6. Bureau or Other Major Organization. Enter the name of the reporting bureau or comparable major organizational unit within the reporting agency. For example: National Bureau of Standards.

b. Location

- Block 7. State or Continent. Enter the name of the State (in U. S.) or continent (outside U. S.) in which the real property is located. When an installation is located in more than one State, a separate report shall be submitted to cover the portion of the installation located in each State.

Exhibit 9a, Appendix B  
GSA Reg. 2-XI-201.04  
(11-8-60)

- Block 8. City or Town. Enter the name of the city or town in or near which the installation is located, provided (1) the installation is in one county only; and (2) the designated city or town is in the same county as the location of the installation (block 9). When these circumstances do not apply, enter "No city identification."
- Block 9. County or Country. Enter the name(s) of the county, counties, parish, or parishes (in U. S.) or U. S. territory or possession, or foreign country (outside U. S.) in which the real property is located. Separate reports for each county in the same State are not required. If space is insufficient, complete the list of counties under Remarks, Block 26, or on the reverse of the form.
- Block 10. Street Address , RFD, Route No., or Other Local Designation. Enter the street address, RFD, route number, or other local designation.

Geog. Code Geographical Code. Enter the appropriate numerical code for the location of the installation as shown in Blocks 7, 8, and 9 in the following sequence: State or Continent (2 digits), City or Town (4 digits), County or Country (3 digits). (Example: Coral Gables, Dade County, Florida, will be shown as 09-0670-025, and Paris, France, Europe, will be shown as 93-6300-350.)

Codes shall be obtained from the publication, "Geographical Location Codes," issued by the General Services Administration, Office of Comptroller. (See GSA Circular No. 146, Revision No. 2, dated June 30, 1960.) Do not fill in this space if the geographical location code is not known.

When the location of the installation cannot be identified with any city (Block 8), the code under "City" shall be reported as 9999. When the installation is located in more than one county (Block 9), the code under "County" shall be reported as 999.

- c. Land. Report all land areas or sites owned by the Government as of the inventory date. In the case of an installation comprised of both Government-owned and trust lands, separate reports on GSA Form 1166 shall be prepared for each.

Exhibit 9a, Appendix B

GSA Reg. 2-XI-201.04

(11-8-60)

Do not include the following: (1) land acquired through foreclosure, confiscation, or seizure to be liquidated in settlement of a claim or debt to the Federal Government; (2) rights-of-way and easements granted to the United States Government; (3) sovereign-owned land of the governments of the various U. S. territories and possessions; (4) lands administered by the United States under trusteeship by authority of the United Nations; and (5) land held under permit from another Government agency.

Block 11. Usage Code and Classification. Enter in this block the present predominant use and related code (see below) of the land area or site being reported. Sites acquired for new projects or on which construction is in process shall be classified for its eventual use. A breakdown of secondary usages is not required. If there are significant secondary usages, mention thereof should be made under Remarks.

Enter one of the following usage codes and classifications in Blocks 11(A) and 11(B), respectively, as appropriate:

<u>Code</u>	<u>Classification</u>
01	<u>Agricultural</u> . Land under cultivation for production of food and fiber.
04	<u>Grazing</u> . Those conservation lands primarily administered for the preservation, protection, management, and development of grass and other forage resources suitable for livestock.
07	<u>Forest and Wildlife</u> . Those conservation lands primarily administered for the preservation, protection, management, and development of timber, wildlife, watershed, and recreational resources.
08	<u>Parks and Historic Sites</u> . Land administered for national parks, historical parks, monuments, military parks, memorial parks, battlefield parks, battlefield sites, historic sites, memorials, cemeteries, parkways, recreation areas, and national capital parks.
10	<u>Office Building Locations</u> . Land on which office buildings are located or are to be constructed.

Exhibit 9a, Appendix B  
GSA Reg. 2-XI-201.04  
(11-8-60)

<u>Code</u>	<u>Classification</u>
11	<u>Military</u> (except airfields). Land under the control of Department of Defense (military functions) which cannot be classified elsewhere.
12	<u>Airfields</u> . Land used for military air bases or stations and military or civilian landing fields.
13	<u>Harbor and Port Terminals</u> . Land used for harbor and port facilities.
15	<u>Power Development and Distribution</u> . Land used for power development and distribution projects.
16	<u>Reclamation and Irrigation</u> . Land used for reclamation and irrigation projects.
18	<u>Flood Control and Navigation</u> . Land used for flood control and navigation projects.
19	<u>Vacant</u> . Land not being utilized.
20	<u>Institutional</u> . Land used for institutional purposes such as hospitals, prisons, schools, libraries, chapels, and museums.
30	<u>Housing</u> . Land used primarily for public housing projects, military personnel quarters, and dwellings for other Federal personnel.
40	<u>Storage</u> . Land used primarily for supply depots and other storage areas.
50	<u>Industrial</u> . Land used for industrial plants engaged in the production and manufacture of ammunition, aircraft, ships, vehicles, electronic equipment, chemicals, aluminum, magnesium, etc.
70	<u>Research and Development</u> . Land used directly in basic or applied research in the sciences (including medicine) and in engineering.

Exhibit 9a, Appendix B  
GSA Reg. 2-XI-201.04  
(11-8-60)

<u>Code</u>	<u>Classification</u>
80	<u>Other Land.</u> Land which cannot be classified elsewhere.
99	<u>Trust Land.</u> All land held in trust by the reporting agency.

The above usage codes and classifications shall be used exclusively by all agencies for purposes of reporting land on GSA Form 1166.

When the report covers only Government-owned buildings and/or structures and facilities, but the land is (1) leased, (2) held under permit, or (3) jointly held and another agency is reporting such land, so state in this block. Give additional details in Block 26, when necessary. However, no entries shall be made in Blocks 12-16 when land is held under these circumstances.

Block 12. Acquisition Code. Enter the code number for each method of acquisition of land being reported. The codes to be entered in this block are as follows:

<u>Code No.</u>	<u>Method of Acquisition</u>
1.	Public domain (applicable only for installations in the United States).
2.	Purchase, donation, exchange, etc.
3.	Long-term interest (applicable only for installations in the Canal Zone and foreign countries).

Include under Code 1 all public domain lands including those withdrawn from public domain. The term original public domain land embraces all the area title to which was vested in the United States Government by virtue of its sovereignty. Public domain lands are original public domain lands which have never left Federal ownership and also include lands within Federal ownership which were obtained by the Government in exchange for public lands or for timber on such lands. It also includes original public domain lands which have reverted to Federal ownership through the operation of public land laws.

Exhibit 9a, Appendix B  
GSA Reg. 2-XI-201.04  
(11-8-60)

Include under Code 2 any land acquired by purchase, condemnation, donation, exchange, and other methods of acquisition (other than public domain or long-term interest).

Include under Code 3 all land in which the United States Government has a long-term interest; such as, that acquired by treaty or long-term lease, (e.g., 99 years, in perpetuity) and which the reporting agency, as a matter of policy, considers as the equivalent to ownership by the United States.

Block 13. Date(s) Acquired. Enter the year(s) in which the land was originally acquired by the Federal Government for each method of acquisition set forth in Block 12. For public domain land withdrawals, show the year of the Executive order or the public land order as the year of acquisition. If various portions were acquired in different years, indicate the range of years; e.g., 1910-1921.

Blocks 14. Area - Urban and Rural. For each item in block 11, and 15. enter the area of the land to the nearest tenth of an acre. If acreage to be reported is a whole number, enter "0" to the right of the decimal point; e.g., 10.0. If acreage to be reported is less than a whole number, enter "0" to the left of the decimal point; e.g., 0.4. If acreage to be reported is less than 0.1 of an acre, enter the letter "N" (negligible). GSA Forms 1166 shall be submitted, as of June 30, 1961, for installations previously reported, when the land area to be reported is less than 0.1 of an acre.

Urban. Land shall be classified as urban when (1) located in an incorporated place of 2,500 or more; (2) in a densely settled unincorporated place of 2,500 or more; or (3) in a densely settled urban fringe area around cities of 50,000 or more. (Reference: the 1950 Census of Population, Volume I, Number of Inhabitants.)

Enter in this block the area of urban land, to the nearest tenth of an acre, acquired by each method of acquisition reported in Block 12.

Rural. Classify as rural all properties not classified as urban. Enter in this block the area of rural land, to the nearest tenth of an acre, for each method of acquisition reported in Block 12.

Exhibit 9a, Appendix B  
GSA Reg. 2-XI-201.04  
(11-8-60)

Block 16. Cost. Enter the cost of land to the Federal Government, rounded to the nearest thousand dollars, for each entry in Block 11. For example: if the records indicate a cost of \$500, report as "1"; similarly, enter "1" for cost of \$1,400. If cost is \$1 through \$499, enter the letter "N" (negligible). GSA Forms 1166 shall be submitted as of June 30, 1961, for installations previously reported when the cost to be reported is less than \$500.

No cost shall be entered in Block 16 for the following types of land: (1) land held in trust; (2) unreserved public domain; (3) public domain reserved for national forests, national parks, military installations, or other purposes, and (4) land donated for historical sites. Properties in categories (1) through (4) shall be shown as "0" in this block.

Cost need not be reported for acquired lands which are intermingled with public domain lands and which constitute a relatively minor portion thereof.

The cost of sites for monuments, memorials, and statues shall be reported (except for sites of the types described in the two preceding paragraphs.)

The cost of items incidental to the acquisition or preparation of land for use should generally be included in the cost of the land. Cost may include:

Appraisal	Plats and surveys
Clearing	Removal and relocation of the property of others as part of purchase contract
Damage to property of others	
Drainage	Removal of structures or facilities purchased, but not used
Grading	
Landscaping	Legal fees and expenses

The above land improvements when applied to public domain lands shall be reported as costs under Other Structures and Facilities, Code 80, All Other, Blocks 23 and 24, and identified as such in Remarks, Block 26; rather than as costs under Land.

Exhibit 9a, Appendix B  
GSA Reg. 2-XI-201.04  
(11-8-60)

When records for acquisition costs are not available, report estimated costs and enter the letter "E" after the amount. Such estimates shall be based on costs at date of original acquisition by the Government, adjusted for subsequent capital changes.

Estimate, if not known, the "cost" of property acquired through donation, devise, forfeiture, or judicial process. The estimated "cost" should represent the amount the Government would have had to pay for the land if purchased at the date of original acquisition.

- d. Buildings. Report all federally owned buildings completed and available for service as of the inventory date.

A temporary building (not demountable) on a concrete foundation shall be reported as real property. However, temporary buildings set up for purposes related to construction shall not be reported.

In the case of an installation comprised of both Government-owned and trust buildings, a separate report on GSA Form 1166 shall be prepared for each category. With regard to buildings held in trust by the reporting agency, Blocks 20, 21, and 22 shall not be completed.

For purposes of this inventory, include buildings being acquired under the Public Buildings Purchase Contract Program or Lease-Purchase Agreements, Public Law 519, 83rd Congress, as amended. Buildings shall be reported upon completion of construction.

- Block 17. Usage Code and Classification. The present predominant use of a building shall govern its classification. The various usage categories are pre-printed in this block. The coverage of each of these categories follows:

<u>Code</u>	<u>Classification</u>
10	<u>Office.</u> Buildings used primarily for office space.
21	<u>Hospital.</u> Buildings used primarily for furnishing in-patient diagnosis and treatment under the supervision of physicians and which have 24-hour-a-day registered graduate nursing services. Include

Exhibit 9a, Appendix B  
GSA Reg. 2-XI-201.04  
(11-8-60)

<u>Code</u>	<u>Classification</u>
	medical laboratories used in routine testing. Exclude buildings used directly in basic or applied research in medicine which should be reported as Research and Development.
22	<u>Prison.</u> Buildings under the jurisdiction of the Department of Justice used for the confinement of Federal prisoners.
23	<u>School.</u> Buildings used primarily for formally organized instruction; such as, schools for dependent children of Federal employees, Indian schools, and military training buildings.
29	<u>Other Institutional Uses.</u> Buildings used for institutional purposes other than schools, hospitals, and prisons. Include libraries, chapels, museums, out-patient clinics, etc.
30	<u>Housing.</u> Buildings used primarily for dwelling purposes; such as, apartment houses, single or row houses, and barracks. Includes public housing, housing for military personnel, housing for personnel in various Federal agencies, and housing for institutional personnel.
40	<u>Storage.</u> Buildings used for storage purposes; such as, warehouses, ammunition storage, and cover sheds. Also include in this category, garages used primarily for storage of vehicles or materials. Do not include such facilities as water reservoirs and oil storage tanks, which are to be reported as Other Structures and Facilities, Blocks 23 and 24.
50	<u>Industrial.</u> Buildings specifically designed and used primarily for production or manufacturing. Include buildings used for the production or manufacture of ammunition, aircraft, ships, vehicles, electronic equipment, chemicals, aluminum, and magnesium. Also include laboratories used for routine testing of industrial products.

Exhibit 9a, Appendix B  
GSA Reg. 2-XJ-201.04  
(11-8-60)

<u>Code</u>	<u>Classification</u>
60	<u>Service.</u> Buildings used in connection with service activities; such as, maintenance and repair shops, laundry and dry cleaning plants, post exchanges, stores, and airport hangars. Also include garages used primarily for vehicle maintenance and repair.
70	<u>Research and Development.</u> Buildings used directly in basic or applied research in the sciences (including medicine) and in engineering. Include buildings used in the design, development, and testing of prototypes and processes such as chemistry, physics, and medical laboratories and observatories for meteorological research. Do not include medical or industrial laboratories used in routine testing which should be reported as Hospital and Industrial, respectively.
80	<u>All Other.</u> Buildings which cannot be classified elsewhere. Whenever this classification is utilized, give a brief description of use in Remarks block.
99	<u>Trust Buildings.</u> All buildings held in trust by the reporting agency. Whenever this classification is utilized, give a brief description of use in Remarks block.
Block 18.	<u>Number of Buildings.</u> Enter the number of buildings for each applicable usage classification printed in Block 17.
Block 19.	<u>Date(s) Acquired.</u> Enter the year the building was originally acquired by the Federal Government. When several buildings of the same classification were acquired in different years and are being reported as a single line item, enter the range of years; e.g., 1930-1942. When a building, previously reported has undergone a major expansion (e.g., addition of a new wing), both the year of original acquisition and the year of expansion should be included in the range of years.
Block 20.	<u>Gross Floor Area - Total Square Feet.</u> Enter the total gross floor area (applies to outer dimensions of the building) in square feet for each class of building reported. Include the total floor area of the building(s) regardless of any secondary usages or occupancy by another agency. Floor area for buildings held in trust shall <u>not</u> be reported.

Exhibit 9a, Appendix B  
GSA Reg. 2-XI-201.04  
(11-8-60)

Block 21. Gross Floor Area - Percent Occupied. Enter the estimated percentage of occupancy or use by the Federal Government for each applicable class of building printed in Block 17. However, percent occupied shall not be reported for buildings held in trust by the reporting agency.

For buildings which are outleased 100 percent, enter the letters "OL" in this column. When only a portion of a building is outleased, the percent occupied shall be the percentage used by the Federal Government. A brief statement regarding the outlease shall be included in the Remarks block.

Block 22. Cost. Enter in this block the total cost to the Federal Government for each classification of building reported. Cost of \$500 and over should be rounded to the nearest thousand dollars as described for Block 16. If cost is \$1 through \$499, enter the letter "N" (negligible). GSA Forms 1166 shall be submitted as of June 30, 1961, for installations previously reported when the cost to be reported is less than \$500.

For purposes of reporting federally owned real property, the cost of each building shall include the cost of such fixtures and equipment as are normally required for its functional use. For example, include plumbing, heating and lighting fixtures, elevators, air-conditioning systems, as well as safes and vaults which are built into the building or are permanently affixed thereto, the removal of which would materially damage the structure. However, the cost of machinery and processing equipment, as well as furniture, laboratory equipment, and special use items which are not part of the realty, shall not be included.

The cost of buildings shall include the cost of all capital improvements incurred subsequent to date of original acquisition by the Government. Capital improvements, as prescribed in the GAO Policy and Procedures Manual, Section 7030, Par. 30, are defined as: "Betterments or improvements to realty are capitalized when they: (1) constitute an enlargement of a structure, (2) provide additional or enlarged facilities, or (3) constitute a major renovation or other substantial improvement which materially increases the usefulness, productivity, or other value of real property, or substantially extends the useful life of the real property."

Exhibit 9a, Appendix B  
GSA Reg. 2-XI-201.04  
(11-8-60)

Costs of federally owned buildings located on land not owned by the Government (e.g., land under lease or other right of occupancy) shall be reported. However, the cost of buildings held in trust by the reporting agency shall be excluded.

In the absence of any recorded data as to costs, they shall be estimated and noted by the letter "E" after the amount. Estimates shall be based on costs at date of original acquisition by the Government, adjusted for subsequent capital changes.

Estimate, if not known, the "cost" of the buildings acquired through donation, exchange, devise, forfeiture, or judicial process. The estimated "cost" should represent the amount the Government would have had to pay for the buildings if purchased at the date of original acquisition.

The cost of buildings being acquired under the Public Buildings Purchase Contract Program or Lease-Purchase Agreements, Public Law 519, 83rd Congress, as amended, shall be recorded at purchase price (total amount of principal payments), plus all other capitalized costs, such as; drawings and specifications; architectural, engineering and inspection fees; and miscellaneous project costs. For identification purposes, the letter "P" should be inserted after the amount and a brief explanation given in Block 26, Remarks.

- e. Other Structures and Facilities. Include only structures and facilities completed and available for service as of the reporting date.

In the case of an installation comprised of both Government-owned and trust structures and facilities, a separate report on GSA Form 1166 shall be prepared for each category.

Block 23. Usage Code and Classification. The various usage categories are preprinted in this block. The coverage of each of these usage categories follows:

Exhibit 9a, Appendix B  
GSA Reg. 2-XI-201.04  
(11-8-60)

<u>Code</u>	<u>Classification</u>
12	<u>Airfield Pavements.</u> Include runways, helicopter landing pads, taxiways, and aprons.
13	<u>Harbor and Port Facilities.</u> Include docks, piers, jetties, and breakwaters.
15	<u>Power Development and Distribution.</u> Include hydroelectric and other power development projects which produce power for resale (generally consisting of dams and powerhouses). Transmission lines which are an integral part of Federal power development systems shall also be included even though the power is produced by another Federal agency.
16	<u>Reclamation and Irrigation.</u> Include canals, laterals, pumping stations, storage, and diversion dams.
18	<u>Flood Control and Navigation.</u> Include river improvements, revetments, dikes, dams, and docks.
40	<u>Storage (Other than Buildings).</u> Include storage tanks, silos, igloos, underground vaults, and open storage areas (improved only).
50	<u>Industrial (Other than Buildings).</u> Include structures and facilities (other than buildings) used for production or manufacturing; such as, sliding shipways, retaining basins, and pipelines.
60	<u>Service (Other than Buildings).</u> Include structures used for maintenance and repair; such as, under-ground fueling systems, vehicle washing and greasing facilities, aircraft boresight ranges, guided missile maintenance facilities, and ship repair.
70	<u>Research and Development (Other than Buildings).</u> Include structures and facilities used directly in basic or applied research in the

Exhibit 9a, Appendix B  
GSA Reg. 2-XI-201.04  
(11-8-60)

CodeClassification

sciences (including medicine) and in engineering; such as, facilities used in design, development, and testing of prototypes and processes. Do not include facilities used in routine testing which should be reported as Hospital and Industrial, respectively.

71

Utility Systems (Heating, Sewage, Water and Electrical Systems). Include heating, sewage, **water, and electrical systems** when they serve several buildings and/or other structures of an installation. When they serve a single building which is reported separately, the cost of such utility systems shall be included in the cost of the building.

The usage category for "utility systems" includes heating plants and related steam and gas lines; sewage disposal plants, storm and sanitary sewer lines; water treatment plants, wells, pump houses, reservoirs, and pipelines; and electrical substations, standby or auxiliary power plants, lighting structures, and conduits.

Structures and facilities utilized by an installation in the production of its own power requirements (not for resale) shall be included in this category.

72

Communications Systems. Include telephone and telegraph lines and radio towers.

73

Navigation and Traffic Aids. Include structures, other than buildings, which provide for aircraft and ship navigation and **traffic aids; such as, beacon lights, antenna systems, ground control approach systems, and obstruction lighting.**

76

Roads and Bridges. Include federally owned highways, roads, related culverts, and connecting bridges. Also include roads within national parks and forests and other Federal installations.

Exhibit 9a, Appendix B  
GSA Reg. 2-XI-201.04  
(11-8-60)

<u>Code</u>	<u>Classification</u>
77	<u>Railroads.</u> Include tracks and bridges, tunnels, and fuel and water stations servicing railroads.
78	<u>Monuments and Memorials.</u> Include all Federal monuments, memorials, and statues.
79	<u>Miscellaneous Military Facilities.</u> Include all structures and facilities of the Department of Defense (military functions) not included in any other classification.
80	<u>All Other.</u> Include sidewalks, parking areas, fences, and trails, which cannot be readily classified under the above categories. Include also, improvements to public domain lands; such as, drainage, grading, and landscaping.
99	<u>Trust.</u> All structures and facilities held in trust by the reporting agency. Identify in Remarks, Block 26.

Block 24. Cost. Enter in this block the total cost to the United States for each classification of other structures and facilities reported. Cost of \$500 and over should be rounded to the nearest thousand dollars as described for Block 16. If cost is \$1 through \$499, enter the letter "N" (negligible). GSA Forms 1166 shall be submitted as of June 30, 1961, for installations previously reported when the cost to be reported is less than \$500.

Costs shall include any capital improvements (as defined under Block 22) incurred subsequent to the date of acquisition.

The cost of Government-owned structures and facilities located on land not owned by the Government (e.g., leased land) shall be included.

Costs shall not be reported for (1) other structures and facilities held in trust and (2) historic structures, monuments, memorials, and statues donated to the Federal Government.

Exhibit 9a, Appendix B  
GSA Reg. 2-XI-201.04  
(11-8-60)

In the absence of any recorded data, costs shall be estimated and noted by the letter "E" after the amount. Estimates shall be based on costs at date of original acquisition by the Government, adjusted for subsequent capital changes.

Estimate, if not known, the "cost" of structures and facilities acquired through donation, exchange, devise, forfeiture, or judicial process. The estimated "cost" should represent the amount the Government would have had to pay for the structures or facilities if purchased at the date of original acquisition.

Block 25. Total Cost: Land, Buildings, and Other Structures and Facilities. Enter the sum of the totals of Blocks 16, 22, and 24.

f. Remarks.

Block 26. Remarks. Enter in this block any notation necessary to clarify or expand any entry in the report. Reasons for changes in a report for an installation previously reported should be especially noted; e.g., capital improvement, writeoffs, refinement of data, etc.

Other pertinent notations may include: from whom property was acquired, to whom property was sold (public, State, city, etc.), any unusual or significant feature regarding acquisition, omission, transfer, disposal, or revision.

When an installation is considered excess to the needs of the reporting agency, in whole or in part, a notation to this effect should be entered. Include the GSA Control Number assigned to SF 118, Report of Excess Real Property, where applicable (see GSA Reg. 2-IV-201.00).

If space provided in this block is insufficient, continue on reverse of the form.

g. Type of Transaction.

Block 27. Type of Transaction. Check the appropriate box to reflect the nature of the real property change between the current and the prior inventory report.

Exhibit 9a, Appendix B  
GSA Reg. 2-XI-201.04  
(11-8-60)

When practicable, include in Remarks a short notation giving an explanation of the change. Descriptions of the various types of transactions follow:

<u>Code</u>	<u>Descriptions</u>
1	<u>New Acquisition.</u> Include newly acquired installations obtained by purchase, construction, or other means. Do not include transfers from other Federal agencies or additions to installations previously reported.
2	<u>Omission.</u> Include only complete installations erroneously omitted from the inventory for the prior fiscal year.
3	<u>Transfer-In.</u> Include only installations transferred from other Federal agencies or major organizational units within the agency which are not merged with existing installations. (Transfers-in which become part of an existing installation shall be coded 6.)
4	<u>Disposal.</u> Include only complete installations disposed of by the Federal Government through sale, donation, exchange, or other disposition to private citizens and organizations or to State and local governments. Do not include transfers to other Federal agencies or major organizational units within the agency.
5	<u>Transfer-Out.</u> Include only complete installations transferred to other Federal agencies or major organizational units within the agency.
6	<u>Revision.</u> Include all changes not covered by one of the above codes. These changes include additions to installations previously reported, disposition of a part of an installation previously reported, capital improvements, writeoffs, and corrections to prior years reports.

Exhibit 9a, Appendix B

GSA Reg. 2-XI-201.04

(11-8-60)

h. Signature and Date.

Block 28. Prepared By. Type in the name and title of the official responsible for the preparation of this report.

Block 29. Signature. The official designated in Block 28 shall sign his name in this block.

Block 30. Date. Enter date on which the report was prepared.

Exhibit 10a, Appendix B  
GSA Reg. 2-XI-201.04  
(11-8-60)

INSTRUCTIONS FOR THE PREPARATION OF GSA FORM 1209,  
SUMMARY OF NUMBER OF INSTALLATIONS  
OWNED BY THE UNITED STATES

1. General Instructions.

GSA Form 1209, Summary of Number of Installations Owned by the United States (Exhibit 10, Appendix B), shall be used by reporting agencies to summarize the real property holdings, as defined in GSA Reg. 2-XI-201.00, of each bureau or other organizational unit.

This form shall be submitted even though no inventory changes have occurred since the previous submission. GSA Form 1209 shall be submitted whether inventory reporting is by GSA Form 1166 (GSA Reg. 2-XI-201.04) or by detailed machine listings and supporting punch cards (GSA Reg. 2-XI-201.05).

A separate GSA Form 1209 shall be prepared for each bureau or other comparable organizational unit for (a) properties in the United States, and (b) properties outside the United States. An original and one carbon copy of these forms shall be submitted together with either the related GSA Forms 1166 or related detailed machine listings and supporting punch cards. Reports shall be prepared annually as of June 30, and submitted to General Services Administration not later than September 1.

2. Specific Instructions.

- a. Summary Identification. Enter the effective date of the report. Place a check mark in the appropriate box to indicate whether the accompanying GSA Forms 1166 or detailed machine listings cover properties in the United States or outside the United States.
- b. Reporting Agency. Enter in this block the name of the reporting agency, that is, the department, commission, administration, or authority. For example: Department of Commerce, Atomic Energy Commission, Veterans Administration, or Tennessee Valley Authority.
- c. Bureau or Other Major Organizational Unit. Enter on this line the name of the bureau or other comparable major organizational unit within the reporting agency. For example: National Bureau of Standards or Bureau of Land Management.

Exhibit 10a, Appendix B  
GSA Reg. 2-XI-201.04  
(11-8-60)

d. Items.

- Item A. Installations at End of Prior Year. Enter the number of installations previously reported as of the end of the prior fiscal year. This number must agree with that shown in the detailed electrical accounting machine listings of the previous inventory reports, copies of which have been furnished by General Services Administration to each reporting agency.
- Item B. New Installations Acquired Since Prior Report. Enter (in both columns) the number of installations acquired since the prior report. Do not include omissions (Item C) or transfers from other Federal agencies or major organizational units of the same agency (Item D).
- Item C. Complete Installations Omitted from Prior Reports. Enter (in both columns) the number of complete installations erroneously omitted from the inventory in the prior fiscal year.
- Item D. Installations Transferred from Other Federal Agencies. Enter (in both columns) the number of reports representing transfers of either complete or partial installations from other Federal agencies, or major organizational units of the same agency. Transfers in which become a part of an existing installation shall be reported in Item G.
- Item E. Complete Installations Disposed of Since Prior Report. Enter (in both columns) the number of complete installations disposed of by the Federal Government since the prior report. Transfers to other Federal agencies or major organizational units of the same agency shall be reported separately in Item F.
- Item F. Complete Installations Transferred to Other Federal Agencies. Enter (in both columns) the number of reports representing the transfer of complete installations to other Federal agencies or major organizational units of the same agency.
- Item G. Reports Adjusting Those Submitted in Prior Years. Enter the number of reports affecting installations previously reported and still in the inventory for which changes have occurred during the fiscal year. Include all revised reports not specifically provided for in Items B through F, above.

Exhibit 10a, Appendix B  
GSA Reg. 2-XI-201.04  
(11-8-60)

Item H. Installations at End of Current Year. Enter the sum of Items A, B, C, and D less the sum of Items E and F. This figure represents the total number of installations controlled by the reporting agency as of the inventory date.

Item I. Total Number of GSA Forms 1166 Submitted. Enter the sum of Items B, C, D, E, F, and G. This figure represents the total number of GSA Forms 1166 currently being submitted.

- e. Remarks. Enter a brief summary statement of all major or significant changes in the bureau's or agency's real property inventory during the fiscal year. Summary may include changes in acreage, buildings, floor area, costs, predominant usages of land, buildings, and other structures and facilities. Cite examples of changes and identify by GSA control numbers.

Include significant trends, new or continuing programs or policies or any other pertinent information reflecting the bureau's or agency's real property activities for the fiscal year.

- f. Signature and Date.

Prepared By. Type in the name and title of the official responsible for the preparation of the report.

Signature. The official designated as responsible for the preparation of the report shall sign his name in this block.

Date. Enter date on which the report was prepared.

INSTRUCTIONS FOR THE PREPARATION OF GSA FORM 1166A,  
ANNUAL REPORT OF REAL PROPERTY LEASED  
TO THE UNITED STATES

1. General Instructions

GSA Form 1166A, Annual Report of Real Property Leased to the United States (Exhibit 11, Appendix B) shall be used by agencies to report their leased real property holdings, as defined in GSA Reg. 2-XI-202.00.

Reports shall be prepared annually as of June 30, and an original and one copy of each submitted to General Services Administration not later than October 1.

An individual report shall be submitted for a lease or combination of leases covering: (a) land, (b) buildings or portions thereof, (c) other structures and facilities, or (d) combinations thereof. Real property leased to the United States shall be reported as follows:

- a. Single Leases - Single Reports. Each lease executed for a building location(s), other structures and facilities, or combination thereof (whether or not land is included), with a total annual rental of \$2,000 or more, shall be the subject of a single report. Each lease executed for land only, with an annual rental of \$500 or more, shall be the subject of a single report.
- b. Multiple Leases - Single Reports. At the discretion of the agency, a lease executed for a building location(s), other structures and facilities, or combinations thereof (whether or not land is included), with a total annual rental of less than \$2,000, may be combined with similar leases to form a single report, provided the location(s) of the properties is in one of the following geographical areas:
  - (1) The same major city (in the United States only - limited to cities listed in Exhibit 11b, Appendix B);
  - (2) The same State (excluding leases for properties in major cities); and
  - (3) The same U. S. territory and possession or foreign country.

Exhibit 11a, Appendix B  
GSA Reg. 2-XI-202.04  
(11-8-60)

A lease executed for land only, with an annual rental of less than \$500, may be combined with similar leases to form a single report, provided it meets the location restrictions outlined in b.(1), (2), and (3), above.

When leases have been combined to form a single report, supporting detailed information for each lease shall be available in the files of the reporting agency.

In no case shall one report cover real property in more than one State. When a lease covers property in more than one State, a separate report shall be prepared for the property in each State.

## 2. Specific Instructions.

### a. Date, Agency, and Property Identification.

Block 1. Report As Of. Enter effective date of the report.

Block 2. Agency Control No. For purpose of identification, each agency may assign a control number for each report submitted.

Block 3. GSA Control No. Leave this space blank. For use by General Services Administration, Central Office only.

Block 4. Name of Property. Enter the commonly used name for the property being reported; such as, U. S. Post Office, American Embassy, or Wilkins Building. When a property has no name, use the street address or other local designation. For consolidated reports covering more than one lease, enter the word "Consolidation" in this block.

Abbreviate the name of the property, when necessary, so that it will not exceed 23 type spaces including blank spaces between letters or words. For example: "First National Bank Building" which has 23 type spaces may be abbreviated "First Nat Bank Bldg."

Block 5. Reporting Agency. Enter the name of the agency currently administering the lease and making rental payments to the lessor, regardless of which agency made the original lease or is currently using the property. For example: Department of Commerce, Atomic Energy Commission, or Tennessee Valley Authority.

Exhibit 11a, Appendix B

GSA Reg. 2-XI-202.04

(11-8-60)

Block 6. Bureau or Other Major Organization. Enter the name of the reporting bureau or comparable major organizational unit within the reporting agency; for example, National Bureau of Standards.

b. Location.

Block 7. State or Continent. Enter the name of the State (in U. S.) or continent (outside U. S.) in which the real property is located. When an installation is located in more than one State, a separate report shall be submitted to cover the portion of the installation located in each State.

Block 8. City or Town. Enter the name of the city or town in or near which the real property is located, provided (1) the property is in one county only; and (2) the designated city or town is in the same county as the location of the property (Block 9). When these circumstances do not apply, enter "No city identification."

Block 9. County or Country. Enter the name(s) of the county, counties, parish, or parishes (in U.S.) or U. S. territory or possession, or foreign country (outside U. S.) in which the real property is located. Separate reports for each county in the same State are not required. If space is insufficient, complete the list of counties under Remarks, Block 24, or on the reverse of the form.

Block 10. Street Address, RFD, Route No., or Other Local Designation. Enter the street address, RFD, route no., or other local designation. When the street address is the same as the building name, this block may be left blank.

Geog. Code    Geographical Code. Enter the appropriate numerical  
Block        geographical code for the location of the property as shown in Blocks 7, 8, and 9 in the following sequence: State or Continent (2 digits), City or Town (4 digits), County or Country (3 digits). (Example: Coral Gables, Dade County, Florida, will be shown as 09-0670-025.)

Codes may be obtained from the publication "Geographical Location Codes," issued by General Services Administration. (See GSA Circular No. 146, Revision No. 2, dated June 30, 1960.)

Exhibit 11a, Appendix B  
 GSA Reg. 2-XI-202.04  
 (11-8-60)

Do not fill in this space if the geographical location code is not known.

When the location of the property or properties cannot be identified with a city (Block 8), the code under "City" shall be reported as 9999. When the property or properties are located in more than one county (Block 9), the code under "County" shall be reported as 999.

- c. Land. Land shall be reported only when specifically provided for in the lease. Leases may include unimproved lands as well as lands upon which federally owned buildings or other improvements have been constructed. (The Federal agency controlling these buildings or other structures shall report them on GSA Form 1166.)

Easements, rights-of-way, and encroachments shall not be reported.

- Block 11. Usage Code and Classification. Enter the predominant use and related code of land area or site as of the effective date of the report. A breakdown of secondary usages is not required.

Leased land shall be classified on the same basis as federally owned land except for Post Offices. Land leased in conjunction with a Post Office and used predominantly as a general service and access area, shall be reported as Code 14 - Post Office Land. Applicable definitions of all usage categories, other than Post Office Land, are contained in Exhibit 9a, Appendix B.

- Blocks 12 and 13. Area - Urban and Rural. For each entry in Block 11, enter the area of the land to the nearest tenth of an acre. If acreage to be reported is a whole number, enter "0" to the right of the decimal point; e.g., 10.0. If acreage to be reported is less than a whole number, enter "0" to the left of the decimal point; e.g., 0.4. If acreage to be reported is less than 0.1 of an acre, enter the letter "N" (negligible).

- Block 12. Urban. For purposes of this report, land shall be classified as urban when (1) located in an incorporated place of 2,500 or more, (2) in a

Exhibit 11a, Appendix B  
GSA Reg. 2-XI-202.04  
(11-8-60)

densely settled unincorporated place of 2,500 or more, or (3) in a densely settled urban fringe area around cities of 50,000 or more. (Reference: The 1950 Census of Population, Volume I, Number of Inhabitants.) Enter in this block the total acreage of urban land acquired for each usage category reported in Block 11.

Block 13. Rural. Classify as rural all properties not covered under "urban" as defined above. Enter in this block the total acreage of rural land for each usage category reported in Block 11.

d. Buildings.

Block 14. Usage Code and Classification. For purposes of this report, the predominant use of the space in each leased building location, as of the effective date of the report, shall govern its classification.

Leased buildings shall be classified on the same basis as federally owned buildings, except for Post Offices. Buildings or portions of buildings leased for use as Post Offices should be reported as Code 14 - Post Office. Applicable definitions of all usage categories, other than Post Offices, are contained in Exhibit 9a, Appendix B.

Block 15. Number of Locations. Enter the number of building locations for each applicable usage classification printed in Block 14. A lease location is the space in each building covered by a lease. When a lease covers several buildings, space in each is considered a location. When several leases cover one building, the space covered by each lease is considered a leased building location.

Block 16. Floor Area Leased - Total Square Feet. Enter the square feet of floor area under lease for each class of building reported. Include the total floor area under lease, regardless of any secondary usages or areas used by other occupying agencies under permit or other arrangements.

e. Other Structures and Facilities.

Block 17. Place a check mark in the space provided in Block 17 if the lease provides for the rental of any structures or facilities.

Exhibit 11a, Appendix B  
GSA Reg. 2-XI-202.04  
(11-8-60)

Block 18. Enter the usage classification and a brief description of leased structures or other facilities. The usage classification applicable to the federally owned real property, as defined in Exhibit 9a, Appendix B, shall also be used exclusively for reporting leased structures and facilities in this block.

- f. Lease Terms. When the report covers a single lease, entries shall be made in Blocks 19 through 23.

When a consolidated report is made covering leases within the same installation, State, country, or city, entries shall be made only in Blocks 19 and 23.

Block 19. Number of Leases Reported. Enter the number of leases included in this report.

Block 20. Effective Date. Enter the numerical designation, using six digits, for the month and year that the current lease became effective; e.g., 06-1958 for June 1958.

Block 21. Expiration Date. Enter the numerical designation using six digits for the month and year that the current lease will terminate; e.g., 12-1965 for December 1965. If any option has been exercised, the expiration date of the extended period shall be used. In no case shall this date be prior to the effective date of the report. When the expiration date of the lease is indefinite, such as in a month to month or year to year lease, enter 99-9999.

Block 22. Period of Renewal Option. When the agreement provides that the U. S. Government may renew the lease beyond the expiration date of the current lease, enter the remaining renewal period to the nearest whole year using two digits; e.g., (3 years) 03. Enter an "X" in this block if one of the following conditions exists: (1) the lease contains no renewal provisions; (2) the renewal option is for less than six months; (3) the expiration date of the lease is indefinite.

Block 23. Annual Rental Rate. Enter the annual rental rate for the leased property to the nearest whole dollar. When the rental period is less than one year or the rental is paid on a monthly, daily, or other

Exhibit 11a, Appendix B  
GSA Reg. 2-XI-202.04  
(11-8-60)

than an annual basis, convert the rate to an annual basis. If the rental is nominal or free, but the lease provides for payments to the lessor for utilities and/or services, enter the annual rental rate as specified in the lease. The other amounts paid to the lessor shall not be included in the rental figure. If the agency wishes to report such payments, they shall be entered in the Remarks block.

g. Remarks.

Block 24. Remarks. When it is necessary to clarify or expand any entries beyond the space provided in the various blocks, make such notations in this block and continue, as necessary, on the reverse of the form.

h. Signature and Date.

Block 25. Prepared By. Type in the name and title of the official responsible for the preparation of the report.

Block 26. Signature. The official designated in Block 25 shall sign his name in this block.

Block 27. Date. Enter the date on which the report was prepared.

INSTRUCTIONS FOR THE PREPARATION OF GSA FORM 1209A,  
COMPARATIVE SUMMARY OF PROPERTIES LEASED  
TO THE UNITED STATES

1. General Instructions.

GSA Form 1209A, Comparative Summary of Properties Leased to the United States (Exhibit 12, Appendix B), shall be used by reporting agencies to summarize leased real property holdings, as defined in GSA Reg. 2-XI-202.00, of each bureau or other organizational unit.

GSA Form 1209A is intended to provide (a) a control over individual inventory reports on leased properties submitted on GSA Form 1166A for the current year, and (b) a comparison between data reported for the prior and current years to show changes in lease data between inventory reports.

A separate GSA Form 1209A shall be prepared for each bureau or other comparable organizational unit for (a) properties in the United States, and (b) properties outside the United States. An original and one carbon copy of this form, together with the related GSA Forms 1166A, shall be prepared annually as of June 30, and submitted to General Services Administration by October 1.

2. Specific Instructions.

- a. Summary Identification. Enter the current and prior year dates for which data are being reported.

Check the applicable block in the upper right corner of the form to indicate if the summary is for real property located (a) in the United States, or (b) outside the United States.

- b. Agency and Bureau Identification.

Reporting Agency. Enter in this block the name of the reporting agency, that is, the controlling department, commission, administration, or authority. For example: Department of Commerce, Atomic Energy Commission, Veterans Administration, or Tennessee Valley Authority.

Exhibit 12a; Appendix B  
GSA Reg. 2-XI-202.04  
(11-8-60)

Bureau or Other Major Organization. Enter in this block the name of the bureau, or comparable major organizational unit, within the reporting agency: for example, National Bureau of Standards.

c. Summary Data.

Column (c) Current GSA Forms 1166A. This column shall contain a summarization and consolidation of statistics included in the Annual Reports of Real Property Leased to the United States, GSA Forms No. 1166A, submitted for the current inventory. Data for each line of this column shall be entered as described below:

Line 1. Enter the total number of GSA Forms 1166A submitted in the current report.

Line 2. Enter the total number of leases in effect on the inventory date by adding the entries in Block 19 of all GSA Forms 1166A submitted.

Line 3. Enter the total acreage leased by adding the totals of Blocks 12 and 13 of all GSA Forms 1166A submitted.

Line 4. Enter the total number of building locations leased by adding the totals of Block 15 on all GSA Forms 1166A submitted.

Line 5. Enter the total square feet of floor area leased by adding the totals of Block 16 of all GSA Forms 1166A submitted.

Line 6. Enter the total annual rental reported for leased real property by adding the entries in Block 23 of all GSA Forms 1166A submitted.

Column (d) Prior GSA Forms 1166A. This column shall not be completed for the first year an agency submits its report. Data for completion of this column shall be obtained from the previous year's detailed listing of leases furnished to each agency by the General Services Administration.

Column (e) Difference. Enter on each line the result of column (c) minus column (d). Enter negative quantities in parentheses, e.g., (312). Column (e) shall not be completed for the initial report submitted by an agency.

- d. Remarks. Significant changes in leases between the prior and current report shall be explained or commented on in this block. When as a result of a new program or termination of an old program,

Exhibit 12a, Appendix B  
GSA Reg. 2-XI-202.04  
(11-8-60)

an agency's leasing activity changes, the cause thereof shall be noted. Property management activities of a bureau or other major organization which result in net economies to the Government shall be explained. Program plans which will affect future leasing operations shall also be noted. All items which the bureau believes would interest the Congress, regulatory executive agencies, or the general public shall be described in this block.

e. Signature and Date

Prepared By. Type in the name and title of the official responsible for the preparation of the report.

Signature. The official designated as responsible for the preparation of the report shall sign his name in this block.

Date. Enter date on which the report was prepared.

UNIVERSITY OF ILLINOIS-URBANA
